AGENDA IRVINE RANCH WATER DISTRICT BOARD OF DIRECTORS REGULAR MEETING

December 12, 2022

CALL TO ORDER 5:00 p.m.

PLEDGE OF ALLEGIANCE

ROLL CALL Directors Reinhart, Withers, Swan, McLaughlin, and President LaMar

This meeting will be held in-person at the District's headquarters located at 15600 Sand Canyon Avenue, Irvine, California. The meeting will also be broadcasted via Webex for those wanting to observe the meeting virtually.

To observe this meeting virtually, please join online using the link and information below:

Via Web: https://irwd.webex.com/irwd/j.php?MTID=m875e7083773ae457c73898a9ee0b1315

Meeting Number (Access Code): 2486 585 8778

Meeting Password: 7M8CeSfyhj8

PLEASE NOTE: Webex observers of the meeting will be placed into the Webex lobby when the Board enters closed session. Participants who remain in the "lobby" will automatically be returned to the open session of the Board once the closed session has concluded. Observers joining the meeting while the Board is in closed session will receive a notice that the meeting has been locked. They will be able to observe the meeting once the closed session has concluded.

PUBLIC COMMENT NOTICE

Public comments are limited to three minutes per speaker on each subject. If you wish to address the Board of Directors on any item, you may attend the meeting in person and submit a "speaker slip" to the Secretary. Forms are provided outside of IRWD's Board Room. If attending via Webex, please submit your request to speak, or your comment, via the "chat" feature and your remarks will be read into the record at the meeting. You may also submit a public comment in advance of the meeting by emailing comments@irwd.com before 12:00 p.m. on Monday, December 12, 2022.

COMMUNICATIONS TO THE BOARD

- 1. A. Written:
- 2. B. <u>Oral:</u>
- 3. ITEMS RECEIVED TOO LATE TO BE AGENDIZED

Recommendation: Determine the need to discuss and/or take immediate action on item(s).

PRESENTATION

4. PRESENTATION OF PROCLAMATION(S)

Staff will present proclamation(s) to recipients.

BOARD WORKSHOP

5. REVIEW OF 2022 ADVOCACY ACTIVITIES AND 2023 LEGISLATIVE AND REGULATORY ISSUES PLANNING

Recommendation: That the Board provide input on the proposed 2023 regional, state, and federal legislative issues of interest to IRWD, and receive and file the proposed "Initial 2023 Legislative and Regulatory Resource Allocation Plan" and the "Legislative / Regulatory Issues and Activities of High Concern to IRWD in 2023."

CONSENT CALENDAR, ITEMS 6-10

6. BOARD MEETING MINUTES

Recommendation: That the minutes of the November 28, 2022 Regular Board meeting be approved as presented.

7. FISCAL YEAR 2021-22 ANNUAL COMPREHENSIVE FINANCIAL REPORT

Recommendation: That the Board approve the FY 2021-22 Annual Comprehensive Financial Report.

8. 2022 GENERAL DISTRICT ELECTION RESULTS

Recommendation: That the Board adopt a resolution declaring results of November 8, 2022 General District Election.

9. AUTHORIZATION FOR PURCHASING BACKHOES

Recommendation: That the Board authorize the General Manager to execute a contract with Coastline Equipment Company in the amount of \$309,858 for the replacement of two backhoe loaders.

Reso. No. 2022-19

CONSENT CALENDAR, ITEMS 6-10, continued

10. IRWD GENERAL COUNSEL CONTRACT FOR 2023

Recommendation: That the Board authorize the General Manager to execute a Professional Services Agreement with Hanson Bridgett LLP for general counsel legal services focused on municipal law, transactional and non-complex issues, and rate-setting with a term of January 1, 2023, to December 31, 2023, and a not-to-exceed value of \$1,155,000.

ACTION CALENDAR

11. TURTLE ROCK ZONE 3 RESERVOIR CHLORAMINE BOOSTER STATION BUDGET INCREASE AND CONSTRUCTION AWARD

Recommendation: That the Board authorize a budget increase in the amount of \$2,308,000, from \$1,705,000 to \$4,013,000, and authorize the General Manager to execute a construction contract with Pacific Hydrotech Corporation in the amount of \$2,881,680 for the Turtle Rock Zone 3 Reservoir Chloramine Booster Station, Project 11840.

12. <u>CONCEPTUAL TERMS FOR SPECIAL ACTIVITIES AGREEMENT WITH</u> <u>THE GROUNDWATER BANKING JOINT POWERS AUTHORITY</u>

Recommendation: That the Board authorize the General Manager to execute a Special Activities Agreement with the Groundwater Banking Authority Joint Powers Authority and Rosedale-Rio Bravo Water Storage District for use of the West Enos and Stockdale North facilities based on the terms presented, subject to non-substantive changes.

13. ELECTION OF OFFICERS FOR 2023

Recommendation: That the election be conducted of the President and Vice President of the Board of Directors of the Irvine Ranch Water District for 2023.

OTHER BUSINESS

Pursuant to Government Code Section 54954.2, members of the Board of Directors or staff may ask questions for clarification, make brief announcements, and make brief reports on his/her own activities. The Board or a Board member may provide a reference to staff or other resources for factual information, request staff to report back at a subsequent meeting concerning any matter, or direct staff to place a matter of business on a future agenda. Such matters may be brought up under the General Manager's Report or Directors' Comments.

- 14. General Manager's Report
- 15. Receive oral update(s) from District liaison(s) regarding communities within IRWD's service area and provide information on relevant community events.
- 16. Directors' Comments
- 17. Closed Session

CLOSED SESSION CONFERENCE WITH LEGAL COUNSEL – EXISTING LITIGATION – Pursuant to Government Code Section 54956.9(d)(1): *IRWD v. OCWD*, *et al.*, Case No. 30-2016-00858584-CU-WM-CJC.

- 18. Open Session
- 19. Adjournment

Availability of agenda materials: Agenda exhibits and other writings that are disclosable public records distributed to all or a majority of the members of the above-named Board in connection with a matter subject to discussion or consideration at an open meeting of the Board are available for public inspection in the District's office, 15600 Sand Canyon Avenue, Irvine, California ("District Office"). If such writings are distributed to members of the Board less than 72 hours prior to the meeting, they will be available from the District Secretary of the District Office at the same time as they are distributed to Board Members, except that if such writings are distributed one hour prior to, or during, the meeting, they will be available electronically via the Webex meeting noted. Upon request, the District will provide for written agenda materials in appropriate alternative formats, and reasonable disability-related modification or accommodation to enable individuals with disabilities to participate in and provide comments at public meetings. Please submit a request, including your name, phone number and/or email address, and a description of the modification, accommodation, or alternative format requested at least two days before the meeting. Requests should be emailed to comments@irwd.com. Requests made by mail must be received at least two days before the meeting. Requests will be granted whenever possible and resolved in favor of accessibility.

December 12, 2022

BOARD WORKSHOP

REVIEW OF 2022 ADVOCACY ACTIVITIES AND 2023 LEGISLATIVE AND REGULATORY ISSUES PLANNING

SUMMARY:

This report reviews IRWD's 2022 legislative and regulatory priorities and advocacy activities. It also presents an overview of expected 2023 legislative and regulatory issues at the federal, state, and local levels. Also described are proposals that the District's associations and stakeholders are sponsoring. The report details the 2023 staff resource allocation plan for legislative and regulatory issues of importance to IRWD in the coming year. Staff recommends that the Board provide input on the proposed 2023 regional, state, and federal legislative issues of interest to IRWD, and receive and file the proposed "Initial 2023 Legislative and Regulatory Resource Allocation Plan" and the "Legislative / Regulatory Issues and Activities of High Concern to IRWD in 2023."

BACKGROUND:

2022 IRWD Priorities and Activities:

In December 2021, the Board reviewed an overview of expected 2022 legislative issues in Washington, D.C. and Sacramento, including proposals that IRWD's statewide associations were considering for introduction. At that time and after providing input, the Board received and filed the initial 2022 Legislative and Regulatory Resource Allocation Plan and the Legislative / Regulatory Issues and Activities of High Concern to IRWD in 2022. The document helped guide the District's governmental relations efforts this past year.

The 2022 priorities included actively engaging in the discussions related to the implementation of the "Making Water Conservation a California Way of Life" legislation, legislation seeking to change the Indoor Residential Water Use Standard, legislation that would establish a low-income water rate assistance program, development of a dam safety program at the state level, protecting IRWD's various revenue sources, and engagement on a number of regulatory proposals. Over the past year, staff and IRWD's state legislative and regulatory advocates worked on each of these issues and other issues of importance to the District, including the Governor's drought emergency proclamations, State Water Resources Control Board emergency regulations, and the California Water and Wastewater Arrearages Program (CWWAP) implementation and funding.

The 2022 priorities at the federal level included reauthorization of the Water Storage Program, federal funding for the Kern Fan Groundwater Storage Project, the creation of a federal dam safety program, advocating for an increased funding authorization for Title XVI's Water Reclamation and Reuse Program, regulatory and legislative measures to address PFAS contamination, and rulemaking related to a definition of "Waters of the United States."

No. 5 Leg and Reg Planning

Board Workshop: Review of 2022 Advocacy Activities and 2023 Legislative and Regulatory Issues Planning
December 12, 2022
Page 2

Expected 2023 Federal Legislative and Regulatory Issues:

While it is expected that in 2023 Congress and federal agencies will work on many issues of interest to the water and wastewater communities, staff expects discussions and actions related to the Infrastructure Investment and Jobs Act (IIAJ) and Inflation Reduction Act (IRA) funding to be the primary focus of water and wastewater policy discussions. The IIAJ allocated tens of billions of dollars for drinking water and wastewater infrastructure through the Environmental Protection Agency and the State Revolving Fund Program, and nearly \$8.4 billion for western water infrastructure through Bureau of Reclamation. The IRA contained another \$4 billion targeted toward drought relief in the Colorado River states. While some spending of this funding has already begun – including funding for Upper Colorado River Basin conservation efforts and the recent announcement of \$250 million for the Salton Sea project – staff expects the pace of spending to accelerate in the first quarter of next year. Additionally, staff expects an accounting of the Bureau of Reclamation's outlays in the same timeframe that should provide some added transparency in how these funds are being used.

Staff also expects significant activity on federal regulations, including finalization of a U.S. EPA rule designating Perfluorooctanoic Acid (PFOA) and Perfluorooctanesulfonic Acid (PFOS) as hazardous substances under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA).

Staff, joined by the District's federal advocates, will discuss the expected 2023 political environment and federal issues. Among the federal issues staff will discuss with the Committee are:

- Reauthorization of the Water Storage Program and/or increased funding for similar programs;
- Federal funding for the Kern Fan Groundwater Storage Project;
- Possible creation of a federal dam safety program;
- Federal funding for the Irvine Lake and Santiago Dam Outlet Tower and Spillway Project; and
- Seeking additional federal funding for the Syphon Reservoir Improvement Project.

Expected 2023 Statewide Legislative and Regulatory Issues:

As is typical at the beginning of each legislative year, staff expects that the California Legislature and State regulatory agencies will take up a number of issues of interest to the water and wastewater communities in 2023. Staff, joined by IRWD's state advocates, will discuss the expected 2023 political environment and state issues. More detailed information is provided below on expected issues of significant importance to the District.

Board Workshop: Review of 2022 Advocacy Activities and 2023 Legislative and Regulatory Issues Planning

December 12, 2022

Page 3

Outlook for a "\$24 Billion Budget Problem" and Ongoing Deficits:

In its "California's Fiscal Outlook" for the Fiscal Year (FY) 2023-24 Budget published on November 16, 2022, the Legislative Analyst's Office (LAO) projected a \$24 billion state budget deficit for FY 2023-24. The LAO also projected revenue \$41 billion lower that the assumptions used to develop the FY 2022-23 Budget Act, and budget deficits of \$17 billion for FY 2024-25 and \$8 billion in FY 2026-27. In the document, the LAO suggests that the Legislature reevaluate current budget funding that has not been distributed, and that there may be programs associated with the current merit pause, delay, or reassessment.

Given the potential impact of the State's finances and the FY 2022-23 Budget on IRWD, staff will continue to work with the District's associations and industry partners to monitor developments associated with the State budget and proposals related to local government revenues including property taxes and reserves, among others.

"Making Water Conservation a California Way of Life" Implementation:

In 2023, the State Board will establish regulations and standards related to the 2018 "Making Water Conservation a California Way of Life" legislation. This effort is expected to be substantial, following a very active year on these matters in 2022. In 2022, legislation that reduces the indoor residential water use standard to 47 gallons per capita daily (gpcd) by 2025 and to 42 gpcd by 2030, SB 1157 (Hertzberg), was signed into law, and the State Board adopted a regulation establishing water loss performance standards for urban retail water suppliers. On September 29, 2022, the Department of Water Resources (DWR) transmitted a memorandum to the State Board making recommendations for the long-term water use efficiency standards that are to developed pursuant to the "Making Water Conservation a California Way of Life" legislation. DWR has also noted that it will begin reviewing and likely updating the irrigation design standards in the Model Water Efficient Landscape Ordinance (MWELO). The update to MWELO will likely impact the standards being set by the State Board, along with any legislation related to the elimination of turf.

IRWD staff has already been engaging in discussions with members of the State Board in advance of the State Board's forthcoming rulemaking and will be engaging with DWR as the MWELO update occurs.

Low-Income Water Rate Assistance Program

As discussed throughout the 2021-22 two-year legislative session, <u>SB 222</u> (Dodd, D-Napa) would have required the State Board to develop and administer a Water Rate Assistance Program (WRAP) to provide rate assistance to low-income residential water and wastewater ratepayers. IRWD joined an Association of California Water Agencies-led coalition seeking amendments to the bill to address concerns relating to funding and program administration. The Legislature passed this bill during the final week of the 2022 legislative session, but the Governor vetoed the bill, stating in his veto message that the bill did not identify funding and that signing the bill would result in significant state General Fund pressures at a time when the state was facing lower-than-expected revenues. Senator Dodd will return to the Senate in 2023, as his current

Board Workshop: Review of 2022 Advocacy Activities and 2023 Legislative and Regulatory Issues Planning
December 12, 2022
Page 4

four-year term in the Senate ends in 2024. It is expected that legislation to establish a low-income water rate assistance program will again be introduced in 2023, and that the Legislature will consider potential funding for Low-income Rate Assistance (LIRA).

Surplus Land Act Changes

In 2022, AB 2357 (Ting, D-San Francisco) and SB 361 (Umberg, D-Santa Ana) proposed to revise the rules related to local agencies' disposal of surplus land. The rules that govern a local agency's disposition of surplus land in California is known as the Surplus Land Act (SLA). Specifically, AB 2357 would have revised the definition of "surplus land" within the Government Code and would restrict a special district's ability to dispose of land that is exempt from the SLA, and SB 361 would have made leases subject to the SLA.

Because the bills would have the potentially to impacted IRWD's investment and real property transactions, staff engaged heavily on these two bills. In 2023, it is expected that similar proposals will be reintroduced and discussed by the Legislature.

Other State Issues of Interest to IRWD:

In addition to the issues discussed above, staff, joined by the District's state advocates, will discuss the following state legislative and regulatory issues with the Committee:

- Executive and regulatory actions related to the drought;
- CARB's Proposed Advanced Clean Fleets Regulation;
- CNRA's Water Resilience Portfolio Implementation and Resiliency 2.0 Implementation;
- DWR's 2023 California Water Plan Update;
- State Board's development of a "Cross-Connection Control Policy Handbook;"
- State Board's Direct Potable Reuse Regulations;
- State Board's implementation of the Lead and Cooper Rule;
- State Board's development of a maximum contaminant level for per- and polyfluoroalkyl substances (PFAS);
- State Board's <u>Safe and Affordable Funding for Equity and Resilience (SAFER) Drinking Water Program;</u>
- South Coast AQMD's Cumulative Impacts from Air Toxics for CEQA Projects;
- Water and resilience funding, including funding for dam safety, and/or bond(s); and
- Other State Board and other State agency regulations.

Expected 2023 Association Proposals:

IRWD's association and industry partners are in the process of completing their 2023 legislative planning. A summary of those planning efforts is provided as follows:

Board Workshop: Review of 2022 Advocacy Activities and 2023 Legislative and Regulatory Issues Planning

December 12, 2022 Page 5

Association of California Water Agencies (ACWA):

ACWA held its 2023 legislative planning meeting on October 28, 2022. The ACWA State Legislative Committee (SLC) considered five proposals for sponsorship in 2023. The SLC decided to sponsor two of the proposals while deferring action on the other three until January 2023. This next year, ACWA will be sponsoring legislation to streamline the regulatory permitting of water supply and flood risk reduction projects and will be sponsoring legislation that seeks to avoid lawsuits related to water and sewer rates by requiring that constitutional issues of concern related to those rates to be brought up during the rate-setting process for someone to sue. That proposal will also seek to codify a record-review rule, as limited by a 1995 California Supreme Court holding that established narrow exemptions, applying the rule to Proposition 218 litigation.

Bioenergy Association of California (BAC):

BAC will hold its annual planning meeting on December 7, 2022. At the time of the writing of this report, no specific proposals or topics have been released for consideration at the meeting. Staff will provide an update on any new information.

California Association of Sanitation Agencies (CASA):

CASA will hold its annual planning meeting on December 9, 2022. At the time of the writing of this report, no specific proposals or topics have been released for consideration at the meeting. Staff will provide an update on any new information.

California Municipal Utilities Association (CMUA):

CMUA held its 2023 legislative and regulatory planning meeting on November 10, 2022. The CMUA Legislative Committee considered one proposal for sponsorship in 2023 and decided to sponsor that proposal. This next year, CMUA will be sponsoring legislation that would create a High Road Training Partnership program under the California Workforce Development Board that would facilitate the development of a skilled workforce for utilities, including those that provide water, wastewater, electric, or telecommunications services. Staff will provide the Committee and Board updates, as appropriate, as this proposal moves forward.

California Special Districts Association (CSDA):

CSDA held its 2023 legislative and regulatory planning meeting on October 27, 2022. CSDA will again sponsor a concurrent resolution recognizing Special Districts Week and will also sponsor legislation that would extend the January 1, 2024, sunset date of AB 361 (Robert Rivas, D-Hollister) in order to allow local agencies to use teleconferencing without complying with the teleconferencing requirements imposed by the Ralph M. Brown Act during COVID. Staff will provide updates to the Committee and the Board, as appropriate, as these proposals move forward.

Board Workshop: Review of 2022 Advocacy Activities and 2023 Legislative and Regulatory Issues Planning
December 12, 2022
Page 6

WateReuse California:

The WateReuse Association of California has not yet met to discuss its 2023 legislative and regulatory efforts. Staff will provide an update on any new developments.

FISCAL IMPACTS:

Not applicable.

ENVIRONMENTAL COMPLIANCE:

Not applicable.

COMMITTEE STATUS:

This item was reviewed by the Water Resources Policy and Communications Committee on December 8, 2022.

RECOMMENDATION:

THAT THE BOARD PROVIDE INPUT ON THE PROPOSED 2023 REGIONAL, STATE, AND FEDERAL LEGISLATIVE ISSUES OF INTEREST TO IRWD, AND RECEIVE AND FILE THE PROPOSED "INITIAL 2023 LEGISLATIVE AND REGULATORY RESOURCE ALLOCATION PLAN" AND THE "LEGISLATIVE / REGULATORY ISSUES AND ACTIVITIES OF HIGH CONCERN TO IRWD IN 2023."

LIST OF EXHIBITS:

- Exhibit "A" Proposed Legislative / Regulatory Issues and Activities of High Concern to IRWD in 2023
- Exhibit "B" Proposed IRWD's Initial 2023 Legislative and Regulatory Resource Allocation Plan

EXHIBIT "A"

LEGISLATIVE / REGULATORY ISSUES AND ACTIVITIES OF HIGH CONCERN TO IRWD IN 2023

As a state and federal leader in water resources public policy and governance, IRWD works to promote policy initiatives that allow the District, along with other water purveyors in California, to enhance the quality and reliability of water supplies throughout the state. While IRWD will engage in a number of legislative and regulatory issues of interest to the District, the following are specific issues and activities of high concern to IRWD in 2023:

2023 Federal Issues and Activities of High Concern:

- 1) Seek federal funding for the Kern Fan Groundwater Storage Project;
- 2) Advocate for the reauthorization of the federal Water Storage Program and an increased funding authorization for the program, or other similar programs;
- 3) Seek the creation of a federal dam safety program to provide federal funding to improve dam safety and modernization at reservoirs used for water supply;
- Seek federal funding for the Irvine Lake and Santiago Creek Dam Outlet Tower and Spillway Project;
 and
- 5) Continue to engage with the Bureau of Reclamation and congressional staff on additional funding for the Syphon Reservoir Improvement Project.

2023 State Issues and Activities of High Concern:

- 1) Protect IRWD's various revenue sources, and method of setting rates and other charges, to ensure that the District can continue to provide high quality services to its customers at low rates. Specifically, retain the District's ability use its water budget-based rate structure and ability to achieve invest its replacement fund.
- 2) Continue to advocate that the State's drought response be based on a data-driven approach and consider the reliability of urban water supplier supply portfolios by using a water efficiency standardsbased approach as eliminating mandatory percent reductions for those agencies whose total water demands are below the cumulative standards.
- 3) Engage with the Legislature, State Board and Department of Water Resources on legislation related to and regulations implementing the "Making Water Conservation a California Way of Life" legislation enacted, changes to the Model Water Efficient Landscape Ordinance and restrictions on landscape types.
- 4) Seek the creation of a state dam safety program to provide state funding to improve dam safety and modernization at reservoirs used for water supply.
- 5) Engage with the State Board, the Department of Water Resources, and the California Air Resources Board on policy, regulatory and permits issues of concern to IRWD.

Note: This page is intentionally left blank.

EXHIBIT "B"

DRAFT

IRWD's Initial 2023 Legislative and Regulatory Resource Allocation Plan

The proposed initial resource allocations are aimed at balancing the importance of an issue to IRWD, the projected level of District resources available to work on the issue, and the likelihood that the issue will be raised and the District will be able to shape the policy, legislative and regulatory discussions or outcomes related to the issue in 2023. The allocation of District resources may change over the course of the year, based on continued input from the Water Resources Policy and Communications Committee and the Board of Directors. The allocation categories are intended to reflect the following expected levels of resource use:

Very High: IRWD's resource allocation would be significant. Staff and IRWD's

legislative advocates would dedicate a larger portion of their overall advocacy efforts to the issues designated "Very High" and would actively seek to be a key stakeholder shaping the policy, legislative or regulatory

discussions related to those issues.

High: IRWD's resource allocation would be considerable. Staff and IRWD's

legislative advocates would work to create strategic opportunities to shape the policy, legislative or regulatory discussions and outcomes related to

issues designated "High."

Moderate: IRWD's resource allocation would be modest. Staff and IRWD's advocates

would actively engage in association and industry conversations on issues designated "Moderate" but would expect to work largely through issuespecific coalitions on these issues. Staff and IRWD's advocates would work to identify and capitalized on opportunities to shape narrow aspects of

a policy, legislative or regulatory outcome related to such issues.

Low: IRWD's resource allocation would be low. Staff and IRWD's advocates

would track policy, legislative and regulatory discussions and outcomes related to issues designated "Low" and would continue to seek positive outcomes for the District through IRWD's association and industry partners. Staff and IRWD's advocates would work on such issues should resources be available. For issues that are currently not expected to be acted upon legislatively or regulatorily this next year and are given a "Low" initial allocation, staff will reevaluate the allocation when action appears likely

and increase it, as appropriate.

| FEDERAL ISSUES | |
|---|-----------|
| Kern Fan Groundwater Storage Project – Seek federal funding for the project by engaging with the Bureau of Reclamation and Congress on the project. | Very High |
| Water Storage Program Reauthorization – Advocate for the reauthorization of the federal Water Storage Program and an increased funding authorization for the program, or other similar programs. | Very High |
| Dam Safety Program – Advocate for federal investment in dam safety and the modernization of dams important to water supplies. | High |
| Irvine Lake and Santiago Creek Dam Outlet Tower and Spillway Project – Seek funding for the Irvine Lake and Santiago Creek Dam Outlet Tower and Spillway Project. | High |
| Syphon Reservoir Improvement Project – Continue to engage with the Bureau of Reclamation and congressional staff on additional funding for the project. | High |
| PFAS CERCLA Exemption – Engage on efforts to designate PFOA and PFOS as "hazardous substances" under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), and advocate for exemptions from liability for water and wastewater utilities. | Moderate |
| PFAS – Advocate for a science-based and cost-based approach in the development of PFAS regulations | Moderate |
| Atmospheric River Research – Advocate for federal programs and funding for atmospheric river research aimed at improving reservoir operations. | Low |
| Clean Water Act Definition of "Waters of the U.S." – Advocate for a definition of "Waters of the U.S." that limits impact to IRWD and it is facilities and includes an exemption for constructed treatment wetlands. | Low* |
| Bureau of Reclamation's Title XVI, Water Reclamation and Reuse Program, Reauthorization – Advocate for the reauthorization of Title XVI and an increased funding authorization for the Water Reclamation and Reuse Program. | Low |
| Delta Conveyance Implementation – Advocate for a change in the operation of the Delta, consistent with the co-equal goals of ecosystem protection and water supply reliability; seek the federal actions necessary to implement a permanent solution in the Bay Delta. | Low |
| Lead and Copper Rule— Monitor developments, and if the administration decides to revise the federal Lead and Copper Rule, advocate for changes that effectively protect public health while limiting the annual testing burden on water agencies (e.g. seek modification to the proposed school and childcare facility testing schedule). | Low |
| Syphon Reservoir Improvement Project – Engage with the Bureau of Reclamation and congressional staff on funding for the project. | Low |
| Tax-Exempt Municipal Bonds – Maintain the current tax-exempt status of municipal bonds with the exception of restoring the tax-exempt status of local government advanced refundings. Oppose prohibitions on the use of tax-exempt bonds within WIFI or any similar program. | Low |
| Tax Parity for Water Efficiency Rebates – Advocate for tax parity between water and energy efficiency rebates. | Low |

| DRAFT | Proposed |
|--|----------------|
| Expected 2023 Legislative and Regulatory Issues | Allocation of |
| | IRWD Resources |
| | |

| Total Maximum Daily Load Limits – Advocate that the Environmental Protection Agency use the best available science when setting Total Maximum Daily Load (TMDL) limitations related to Clean Water Act compliance and approve TMDLs for California based on relevant studies related to California's environment and local conditions. | Low |
|---|-----------|
| Water Resource Development Act – Seek enactment of a WRDA bill every two years which is beneficial to IRWD and Orange County, and which includes authorizations for the water infrastructure programs and funding supported by IRWD. Look for opportunities to clarify that water resources projects and water resources development projects are to be considered environmental infrastructure projects and eligible for consideration under WRDA. | Low |
| STATE ISSUES | |
| CARB – Engage with the California Air Resources Board on policy, regulatory and permits issues of concern to IRWD. | Very High |
| Conservation, Water Use Efficiency Regulations – Engage with the Legislature, State Board and Department of Water Resources (DWR) on legislation related to and regulations implementing the "Making Water Conservation a California Way of Life" legislation enacted, changes to the Model Water Efficient Landscape Ordinance and restrictions on landscape types. | Very High |
| Dam Safety Program – Advocate for state investment in dam safety and the modernization of dams important to water supplies. | Very High |
| DWR – Engage with DWR on policy, regulatory and permits issues of concern to IRWD. | Very High |
| Drought Response – Continue to advocate that the State's drought response be based on a data-driven approach and consider the reliability of urban water supplier supply portfolios by using a water efficiency standards-based approach as eliminating mandatory percent reductions for those agencies whose total water demands are below the cumulative standards. | Very High |
| Low Income Water and Wastewater Rate Assistance Program – Continue to engage in discussion regarding the creation of a statewide Low-Income Water and Wastewater Rate Assistance Program that is consistent with the Board's adopted policy on a statewide public goods charge, opposing a statewide tax on water for Low-Income Rate Assistance, or to fund other resiliency efforts. | Very High |
| State Board – Engage with the State Board on policy, regulatory and permits issues of concern to IRWD. | Very High |
| Water Rates & District Revenues—Protect IRWD's various revenue sources, and method of setting rates and other charges, in order to ensure that the District can continue to provide high quality services to its customers at low rates. Specifically, retain the District's ability use its water budget-based rate structure and ability to achieve invest its replacement fund. | Very High |
| CECs and PFAS – Engage with stakeholders, industry associations, and regulatory agencies on establishing better processes for identifying and regulating contaminants of emerging concern (CECs). Engage with stakeholders, industry associations, and regulatory agencies on microplastics and PFAS, and the regulatory actions proposed by state agencies including regulatory actions that would restrict land application or other uses of Class A and Class B biosolids due to PFAS. | High |
| Proposition 218 Reforms –If Proposition 218 reforms are proposed, engage in discussions surrounding the reform efforts to protect IRWD's interests. Communicate the District's concern | High |

| DRAFT | Proposed |
|--|----------------|
| Expected 2023 Legislative and Regulatory Issues | Allocation of |
| | IRWD Resources |
| | |

| over any water rate legislation which is not consistent with the California Constitution, not | |
|---|----------|
| voluntary in nature, or that does not provide sufficient clarity or flexibility to water agencies. | |
| Plumbing Code Updates – Seek clarification that Chapter 15 of the California Plumbing Code does not apply to recycled water irrigation sites. Work with the Building Standards Commission, Housing and Community Development Department, and Department of Water Resources on revisions to the California Plumbing Code during code revisions. | High |
| Potable Reuse – Advocate for the expansion of potable reuse in California and support a science-based and fit-for-purpose regulatory approach to the various types of potable reuse considered in the California Water Code Section 13561. | High |
| Biosolids – Seek a broader spectrum of permissible uses of biosolids byproducts including a possible "healthy soils" designation. Engage on the State Board's review of the General Order (WDR) for the use of biosolids on land. | Moderate |
| Climate Change Adaptation – Engage in policy discussions related to climate change adaptation within the water and wastewater sectors. | Moderate |
| Groundwater Clean-up – Support efforts to obtain State funding to clean up groundwater contamination in the Orange County Basin, and funding for basin replenishment. | Moderate |
| Homelessness – Within the larger discussions on addressing homeless, ensure that the impacts of homeless on water and wastewater agencies is recognized, and that agencies continue to retain adequate authority to secure their facilities. | Moderate |
| Public Fleets – Oppose efforts to expand regulatory authority over public fleets, and proposals designed to accelerate the replacement of existing public fleet stock without consideration of cost and age and technology of the current stock, and the availability of mandated replacement technology. Engage on regulatory efforts that require zero emission vehicle purchases and advocate that the regulations reflect commercial and operational viability and the availability of mandated replacement technology. Oppose proposals governing the public fleets of water and wastewater providers that do not consider the constraints of certain technologies on the provision of essential public services during or after an emergency. | Moderate |
| Recycled Water – Promote the expanded use of recycled water, and its acceptance as a resource, by advocating for the removal of hindrances to recycled water projects and storage. Seek to: • Remove recycled water as a waste, including addressing recycled water discharge requirements. • Promote a "Fit for Purpose" regulatory approach for recycled water. • Promote the development of needed potable water reuse regulations. • Eliminate operational constraints on recycled water operations and use, including unintended impacts created by the Enclosed Bays and Estuaries Policy. • Seek updates to Title 17 and 22, including relief of dual-plumbed inspection/testing requirements. | Moderate |
| Safe Drinking Water- Engage on the implementation of the Safe and Affordable for Equity and Resilience Program (SAFER) to ensure that the program is implemented in a way to effectively move communities to sustainable access to safe drinking water | Moderate |
| Water Transfers and Markets – Engage with the California Department of Water Resources and the Bureau of Reclamation, in coordination with IRWD's Water Banking partners, in advocating for expedited processes to facilitate transfers between Central Valley Project and State Water Project Contractors and streamlined water marketing. | Moderate |
| | |

| Water Law Modernization – Monitor an engage, as appropriate, on the efforts to "modernize" California's water law. | Moderate |
|--|----------|
| Water Quality – Engage productively in policy discussions related to changes in water quality and various discharge permits in order to protect the District's interests. | Moderate |
| Wildfire Prevention and Liability – Seek to ensure that proposals related to wildfire prevention and liability proposals consider the perspective of water and wastewater providers. | Moderate |
| 30 Percent by 2030 – Engage on the implementation of 30 percent by 2030 to ensure water supplies and resources are adequately considered, and to limit impacts to existing and future water infrastructure and operations. | Low |
| Delta Conveyance Implementation – Advocate for a change in the operation of the Delta, consistent with the co-equal goals of ecosystem protection and water supply reliability. Seek the State actions necessary to implement a solution in the Bay Delta and oppose efforts to make implementation of a solution more difficult. | Low |
| Emergency Supplies – Seek recognition of the importance of emergency water supplies and protects their use during droughts or other water shortages. | Low |
| Energy – Advocate for policies that encourage energy reliability in Orange County, and energy efficiency or reductions in embedded energy in the water and wastewater sectors, including use of energy conservation funding within the water sector, and expanded availability of direct access programs, without an increase in cost to or mandates on local entities; seek incentives for energy self-reliance projects (e.g., storage, generation, efficiency). | Low |
| Groundwater Management – Engage productively in discussions of groundwater management in California to protect IRWD's interests. Promote greater water banking opportunities to benefit IRWD banking programs. | Low |
| Integrated Regional Water Management Program – Oppose program changes that expand the scope of the IRWM Program, and that expand funding eligibility to projects that do not further water supply reliability. | Low |
| Lead Testing Requirements – Engage in policy discussions related to expanding lead testing requirements in order to protect IRWD's interests. | Low |
| Limitations on Ocean Discharges – Engage productively in discussions surrounding proposals to eliminate ocean discharges to protect the District's interests. Support efforts to promote funding of treatment process upgrades that improve water quality and reuse options. | Low* |
| Operators Certifications – Address inconsistent certification processes for operator certifications (treatment, distribution, and recycling). Monitor for changes in certification requirements. | Low |
| Political Reform Act/FPPC Issues – Monitor for changes to the Political Reform Act and FPPC regulations that could impact IRWD. | Low |
| Property Tax Allocations— Protect existing property tax allocations to special districts. | Low |
| Public Agency Liability and Public Contracting – Oppose efforts to impose greater liability on public agencies for work performed by its contractors. Oppose proposals that make public contracting for labor, service, or public works projects more cumbersome including reductions in contract retentions or changing the criteria agencies may consider when awarding contracts. | Low |

| DRAFT | Proposed |
|---|----------------|
| Expected 2023 Legislative and Regulatory Issues | Allocation of |
| | IRWD Resources |
| | |

| Public Records Act – Monitor proposed changes to the Public Records Act that could impact IRWD costs including new requirements for local agency websites, data production and reporting. | Low | |
|---|------|--|
| Real Estate Investments – Engage on regulatory or legislative proposals that may impact IRWD's ability to maintain a high return of investment on its real estate investments. | Low | |
| Unfunded Pension Liability – Oppose legislation or regulations that would increase IRWD's pension liability either by making local agencies responsible for the pension liabilities of other entities (e.g., joint powers authorities) or by failing to recognize the liability reduction benefits of Section 115 Trust and other pre-funding efforts. Seek state support for refinements in the GASB rules that limit recognition of the benefits Section 115 Trust. | Low | |
| Water Tax – Consistent with the Board's adopted policy on a statewide public goods charge, oppose a statewide tax on water for Low Income Rate Assistance or to fund other resiliency efforts | Low | |
| Zero Carbon Energy – Advocate for the inclusion of hydropower, bioenergy derived from biosolids, and other categories of energy generation invested in by the water and wastewater sectors in the types of energy generation that is defined as zero carbon for California's Zero Carbon goal. | Low | |
| Video Recording Retention Periods – Advocate for greater flexibility for special districts related to the required retention period prescribed by law for video recordings. | Low | |
| REGIONAL ISSUES | | |
| Santa Ana and San Diego Regional Water Quality Control Boards –Work with the Board on issues of concern to IRWD including adjusting storm-induced overflow protections and expand the use of recycled water in decorative lakes. | High | |
| Recycled Water Use Site Inspection and Testing – Work with Orange County Health Care Agency on completion of the Orange County Guidelines which include the frequencies and methods for conducing recycled water use site visual inspections and periodic cross-connection tests. | Low | |

^{*}Increase allocation of resources if warranted due to legislative activity.

BOARD MEETING MINUTES

SUMMARY:

Provided are the minutes of the November 28, 2022 Regular Board meeting for approval.

FISCAL IMPACTS:

None.

ENVIRONMENTAL COMPLIANCE:

Not applicable.

COMMITTEE STATUS:

Not applicable.

RECOMMENDATION:

THAT THE MINUTES OF THE NOVEMBER 28, 2022 REGULAR BOARD MEETING BE APPROVED AS PRESENTED.

LIST OF EXHIBITS:

Exhibit "A" – November 28, 2022 Minutes

No. 6 Minutes

Note: This page is intentionally left blank.

EXHIBIT "A"

MINUTES OF REGULAR MEETING –NOVEMBER 28, 2022

The regular meeting of the Board of Directors of the Irvine Ranch Water District (IRWD) was called to order at 5:00 p.m. by Acting President McLaughlin on November 28, 2022 at the District offices, 15600 Sand Canyon Avenue, Irvine. This meeting was also held via teleconference using Webex pursuant to AB 361 (Remote meetings).

Directors Present: Swan (via teleconference), Withers, Reinhart, LaMar (via teleconference) and McLaughlin

Directors Absent: None.

Written and Oral Communications: None.

Also Present: Executive Director of Operations Chambers, Executive Director of Finance and Administration Clary, Executive Director of Technical Services Burton, Executive Director of Water Policy Weghorst, Director of Treasury and Risk Management Jacobson, Director of Strategic Communications and Advocacy / Deputy General Counsel Compton, Director of Water Resources Sanchez, Director of Human Resources Mitcham, Director of Maintenance Manning, Director of Information Services Kaneshiro, Secretary Bonkowski, Assistant Secretary Swan, General Counsel Collins, Consultant Newell, and members of the staff and public.

CONSENT CALENDAR

Following a motion by Withers and seconded to approve Consent Calendar Items 4 through 9, prior to the vote, Director Swan asked to make a substitute motion to amend the recommended motion for No. 8, ANNUAL BOARD OF DIRECTORS' FEES to defer the five percent compensation increase for calendar year 2023 at this time. Prior to voting on the substitute motion, Acting President McLaughlin said that pertaining to Item No. 7 on the Consent Calendar of today's agenda that on November 14, 2022, the Board conducted its annual Performance Evaluation of the General Manager. She said that this evening the Board is considering changes to his compensation based on that performance review. Pursuant to Government Code Section 54953(c)(3), prior to taking final action on changes to the General Manager's compensation, that she will provide a summary of the recommended action before us. She said that the recommendation is to: 1) increase the base salary of the General Manager from \$334,156 to \$364,751 per year (a 9.2% increase), effective October 1, 2022; 2) increase the General Manager's automobile allowance from \$800 to \$875 per month; and 3) provide a one-time performance award for the General Manager in the amount of \$32,100 as a taxable lump sum cash payment. She further said that all other aspects of the General Manager's compensation remain unchanged. On MOTION by Swan, seconded by LaMar, and unanimously carried by a roll call vote (Reinhart, Swan, Withers, LaMar, and McLaughlin voting ave (5-0), CONSENT CALENDAR ITEMS 4 THROUGH 9 WERE APPROVED AS AMENDED AS FOLLOWS:

4. BOARD MEETING MINUTES

Recommendation: That the minutes of the November 14, 2022 Regular Board meeting be approved as presented.

CONSENT CALENDAR (Continued)

5. OCTOBER 2022 TREASURY REPORT

Recommendation: That the Board receive and file the Treasurer's Investment Summary Report, the summary of fixed and variable rate debt, and disclosure report of reimbursements to board members and staff, approve the October 2022 summary of payroll ACH payments in the total amount of \$2,357,738, and approve the October 2022 accounts payable disbursement summary of warrants 431013 through 431652, Workers' Compensation distributions, ACH payments, virtual card payments, wire transfers, payroll withholding distributions and voided checks in the total amount of \$39,456,642.

6. PROPOSED 2023 INVESTMENT POLICY

Recommendation: That the Board approve the proposed 2023 Investment Policy and adopt the following resolution by title.

RESOLUTION NO. 2022-18

RESOLUTION OF THE BOARD OF DIRECTORS OF THE IRVINE RANCH WATER DISTRICT APPROVING AN INVESTMENT POLICY AND AUTHORIZING THE TREASURER AND ASSISTANT TREASURERS TO INVEST AND REINVEST FUNDS OF THE DISTRICT AND OF EACH OF ITS IMPROVEMENT DISTRICTS AND TO SELL AND EXCHANGE SECURITIES

7. GENERAL MANAGER COMPENSATION CHANGES

Recommendation: That the Board approve an increase to the annual salary of the General Manager to the amount of \$364,751, an increase to the General Manager's automobile allowance to \$875 per month, and a one-time performance award in the amount of \$32,100, all effective October 1, 2022.

8. ANNUAL BOARD OF DIRECTORS' FEES

Recommendation: That the Board defer the five (5%) percent compensation increase for calendar year 2023 at this time.

9. <u>PLANNING AREA 1 ORCHARD HILLS NEIGHBORHOOD 4 RECYCLED WATER IMPROVEMENTS</u>

Recommendation: That the Board authorize the General Manager to accept Irvine Community Development Company, LLC's construction contract with FYDAQ Company, Inc. in the amount of \$888,981, and authorize a budget increase for Project 01722 in the amount of \$713,500, from \$566,500 to \$1,280,000, for the Planning Area 1 Orchard Hills Neighborhood 4 Recycled Water Improvements.

ACTION CALENDAR

MICHELSON WATER RECYCLING PLANT FUELING FACILITY BUDGET INCREASE AND CONSTRUCTION AWARD

Executive Director of Technical Services Burton reported that the Michelson Water Recycling Plant (MWRP) Fueling Facility project will install a compressed natural gas (CNG) fueling facility, replace the existing diesel and gasoline fueling systems, and install an additional diesel storage tank to increase the storage capacity to account for three days of emergency diesel fuel use. In addition, the MWRP perimeter road will be extended and an emergency access road over the flood control berm will be constructed. Mr. Burton said that in parallel to this project, the District began planning measures to increase the emergency fuel storage capacity throughout the service area to account for three days of emergency fuel use for generators. The Operations Center has nine stationary generators and 11 portable generators. This project will install an additional above-ground diesel storage tank to supply the three days of emergency diesel fuel.

Mr. Burton said that road improvements were also added to the scope of work. The MWRP perimeter road will be extended at the existing cul-de-sac to connect with the northeast corner of the Biosolids access road, creating a continuous perimeter road. In addition, an emergency access road over the existing flood control berm will be constructed to allow access to MWRP when the flood gates are installed on Riparian View at the entrance to the MWRP. The soil cut from the hillside to construct the fueling facility will be used to construct the road over the flood control berm. These improvements will not impact the flood protection of the MWRP.

Mr. Burton said that the project was advertised to a select bidders list of 22 mechanical contractors on September 28, 2022. The bid opening occurred on November 9, 2022, with four bids with Innovative Construction Solutions as the apparent low bidder with a bid of \$9,547,000. He said that the bids ranged from 41 to 59 percent higher than the engineer's estimate of \$6,779,000 and that the discrepancy between the bids and the engineer's estimate can be attributed to an underestimate of the cost for CNG equipment. The overall complexity of the project also likely contributed to the discrepancy between the bids and the engineer's estimate. Construction bids have been observed to be higher in the current market. He further said that Innovative Construction Solutions has experience with mechanical projects and is well qualified to construct the fueling facility.

Following Mr. Burton responding to Director Swan's inquiries on the project, on MOTION by LaMar, seconded by Reinhart, and unanimously carried by a roll call vote (Reinhart, Swan, Withers, LaMar, and McLaughlin voting aye (5-0), THE BOARD AUTHORIZED BUDGET INCREASES IN THE AMOUNT OF \$1,546,000, FROM \$2,630,000 TO \$4,176,000, FOR PROJECT 07881 AND IN THE AMOUNT OF \$2,717,000, FROM \$5,257,000 TO \$7,974,000, FOR PROJECT 07882, AND AUTHORIZED THE GENERAL MANAGER TO EXECUTE A CONSTRUCTION CONTRACT WITH INNOVATIVE CONSTRUCTION SOLUTIONS IN THE AMOUNT OF \$9,547,000 FOR THE MICHELSON WATER RECYCLING PLANT FUELING FACILITY, PROJECTS 07881 AND 07882.

ETWD-IRWD SOUTH ORANGE COUNTY WASTEWATER AUTHORITY RIGHTS ASSIGNMENT AND ASSUMPTION AGREEMENT

Executive Director of Technical Services Burton reported that staff has been evaluating withdrawal options regarding IRWD's participation in the South Orange County Wastewater Authority (SOCWA) for the Effluent Transmission Main (ETM) and Aliso Creek Ocean Outfall (ACOO) that handle ocean discharges from IRWD's Los Alisos Water Recycling Plant in Lake Forest. Mr. Burton said that an Assignment and Assumption Agreement with El Toro Water District (ETWD) has been prepared that will allow IRWD to withdraw from SOCWA while maintaining use of the ETM and the ACOO. He said that the draft Agreement was provided to SOCWA as well as all the SOCWA member agencies on September 6, 2022, and to date, neither IRWD nor ETWD have received any comments regarding the Agreement from either SOCWA or any of the SOCWA member agencies.

Mr. Burton said that the agreement between IRWD and ETWD was approved by the ETWD Board on November 22, 2022. He said that upon IRWD Board approval of the agreement and execution by both ETWD and IRWD, IRWD plans to submit a formal letter of withdrawal to SOCWA and the member agencies along with the executed agreement. He further said that per the SOCWA JPA, the withdrawal letter must be received by SOCWA and all member agencies at least 120 calendar days in advance of June 30, 2023, to be effective on the start of the next fiscal year that commences July 1, 2023.

Director Reinhart said that this item was reviewed by the Engineering and Operations Committee on February 15, 2022 and suggested submitting the withdrawal well in advance of the 120 days advance notice. On MOTION by Reinhart, seconded by Withers and unanimously carried by a roll call vote (Reinhart, Swan, Withers, LaMar, and McLaughlin voting aye (5-0), THE BOARD AUTHORIZED THE GENERAL MANAGER TO EXECUTE THE EL TORO WATER DISTRICT / IRVINE RANCH WATER DISTRICT SOUTH ORANGE COUNTY WASTEWATER AUTHORITY RIGHTS ASSIGNMENT AND ASSUMPTION AGREEMENT SUBJECT TO NON-SUBSTANTIVE CHANGES.

GENERAL MANAGER'S REPORT

Mr. Burton provided an update on the microturbines at the Biosolids Dewatering and Energy Recovery Facilities.

COMMUNITY UPDATE

Consultant Newell reported that there was no activity to report in the Santiago Canyon.

DIRECTORS' COMMENTS

Director Withers reported that he attended the meetings listed on the report. He said that the Orange County Sanitation District is in the progress of hiring a new General Manager to replace the Mr. Herberg, who will be retiring. He further said that this week he will be attending an ACWA conference along with an IRWD community tour.

Directors Reinhart, Swan and LaMar said that they attended the meetings listed on the report.

Director McLaughlin said she attended a South Orange County Watershed Management Area Executive Committee meeting.

FISCAL YEAR 2021-22 ANNUAL COMPREHENSIVE FINANCIAL REPORT

SUMMARY:

IRWD's auditor Davis Farr LLP has completed its annual audit of the District's financial statements for the Fiscal Year (FY) ended June 30, 2022. As stated in its report, Davis Farr concluded that in all material aspects, the statements fairly present the District's financial position as of June 30, 2022 and conform with generally accepted accounting principles.

A draft of the Annual Comprehensive Financial Report (ACFR), including the Introductory Section, audited financial statements, accompanying auditor's report, Management's Discussion and Analysis, and Statistical Section is provided as Exhibit "A". The draft is being presented for review and comment by the Committee.

BACKGROUND:

At the Committee meeting, Davis Farr will present its required Auditor Communication pursuant to Statement on Auditing Standards 114 *The Auditor's Communication with Those Charged with Governance*. This letter, provided as Exhibit "B", reflects the auditor's understanding of key management assumptions and practices, and indicates that there were no disagreements with management during the scope of the audit. The auditors have also provided a *Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards*, provided as Exhibit "C", which states that the audit did not identify any material weakness in internal control. In addition, the report states that the result of the audit disclosed no instances of noncompliance or other matters that were required to be reported under government auditing standards.

The IRWD Annual Comprehensive Financial Report:

The FY 2021-22 ACFR is being prepared for the 19th consecutive year by IRWD. All of IRWD's previous ACFRs have won awards from the Government Finance Officers Association (GFOA), which encourages state and local governments to prepare and publish expanded financial reports in conformity with generally accepted accounting principles (GAAP) and provides awards to recognize contributions to the practice of government finance that exemplify outstanding financial management. The awards stress practical, documented work that offers leadership to the profession and promotes improved public finance.

Staff will continue to produce an enhanced electronic version with key references hyperlinked throughout the document. The ACFR will be made available on IRWD's website.

Introductory Section

Irvine Ranch Water District Fiscal Year Ended June 30, 2022

This page intentionally left blank.

December 12, 2022

To the Board of Directors, Irvine Ranch Water District:

Management of the Irvine Ranch Water District (IRWD or the District) has prepared an Annual Comprehensive Financial Report of IRWD for the fiscal year ended June 30, 2022. This document, which contains a complete set of basic financial statements, is presented in conformity with generally accepted accounting principles (GAAP) and audited in accordance with generally accepted government auditing standards by a firm of licensed certified public accountants. State law requires that all special-purpose local governments publish these basic financial statements within six months of the close of the agency's fiscal year.

This report contains management's representations concerning the finances of the District. Management assumes full responsibility for the completeness and reliability of the information contained in this report. To provide a reasonable, rather than absolute, basis for making these representations, IRWD management has established a comprehensive framework of internal controls. These controls are designed to protect the District's assets from loss, theft, or misuse, and to ensure sufficiently reliable information for the preparation of the District's basic financial statements in conformity with GAAP. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the basic financial statements are free of any material misstatements. As management, we assert that this financial report is complete and reliable in all material respects.

The District's basic financial statements have been audited by Davis Farr LLP, a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the basic financial statements of the District for the fiscal year ended June 30, 2022 were free of material misstatements. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the basic financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. The independent auditor rendered an unmodified opinion that the District's basic financial statements for the fiscal year ended June 30, 2022 are fairly presented in conformity with GAAP. The independent auditor's report is presented as the first component of the financial section of this report.

A profile of the District is presented in this Introductory Section. In the Financial Section, Management's Discussion and Analysis (MD&A) immediately follows the independent auditor's report and provides an overview and analysis of the basic financial statements. This letter of transmittal and introduction is designed to complement the MD&A and should be read in conjunction with it.

Profile of Irvine Ranch Water District

Overview

Irvine Ranch Water District was established in 1961 as a California Water District under the provisions of the California Water Code. As a special district, IRWD focuses on four primary services - providing potable water, collecting sewage, producing and distributing recycled and other non-potable water, and implementing urban runoff source control and treatment programs.

IRWD is an independent public agency governed by a five-member, publicly elected Board of Directors. The members of the Board each have varied professional backgrounds, coupled with an average tenure for the Board members of approximately 22 years. The District is a leader in developing and implementing resource management initiatives such as water recycling, urban runoff control and treatment, water efficiency, energy management, and water banking. The District is a pioneer in financial management practices such as variable rate debt financing and long-term infrastructure replacement program development and funding.

The District serves a 181 square mile area, which includes all of the City of Irvine and portions of the cities of Tustin, Newport Beach, Costa Mesa, Orange and Lake Forest, as well as certain unincorporated areas of Orange County. Extending from the Pacific Coast to the top of the foothills of eastern Orange County, the District's region is semi-arid with a mild climate and an average annual rainfall of approximately 12 inches. The total estimated daytime population served is approximately 600,000 and includes approximately 122,000 water and 117,000 sewer service and recycled water connections. The number of service connections has increased by approximately 22% over the last ten years.

The District provides its core services to its customers by focusing on the following areas:

- Operational Reliability having multiple sources of water supply, various sewage treatment alternatives, preventive maintenance programs, and emergency power capabilities to ensure reliable services.
- *Organizational Strength* having professional staff work in close collaboration with the Board of Directors striving to exceed the expectations of our customers.
- Long-Term Financial Planning ensuring sufficient funds are available to construct, operate, maintain, and replace facilities, while retaining competitive rates now and in the future.

People

Field Crew on Site

The District employed an average of 392 staff who are responsible for administering daily operations and implementing strategic objectives and policies set forth by the Board. The District actively promotes the training and education of employees to increase effectiveness and retention. The average tenure of District employees is approximately 11 years.

Services

The District is functionally organized into four core service areas:

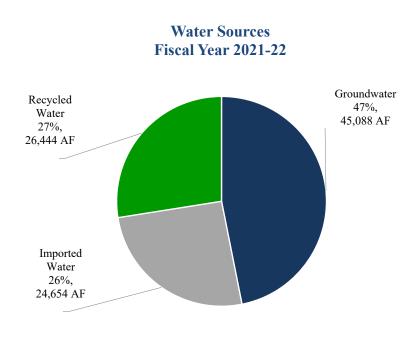

Drinking or "Potable" Water System

For many years, the District received virtually all of its drinking water from imported sources. To minimize this dependence on imported water, in the early 1980's, the District developed a series of local wells known as the Dyer Road Wellfield to access high quality groundwater from the Orange County Groundwater Basin, managed by the Orange County Water District (OCWD).

IRWD also operates other groundwater wells, and several groundwater wells require treatment before use. In Fiscal Year (FY) 2021-22, local groundwater accounted for 47% of the District's total water supply.

Currently, groundwater is significantly less expensive, more reliable, and less energy intensive than imported water that is transported over hundreds of miles into Southern California and subsequently treated.

The District purchased 26% of its water supply in FY 2021-22 from the Municipal Water District of Orange County (MWDOC), the regions local wholesale water supplier who purchases its water from the Metropolitan Water District of Southern California. This water is imported from both the Colorado River, which is transported approximately 240 miles to Southern California, and from the Delta, from which water is transported approximately 400 miles from Northern California.

Recycled and Non-Potable Water Systems

The District treats sewage to provide water for irrigation, commercial, industrial and agricultural purposes which further reduces its reliance on more expensive imported water and increases its system reliability. Sewage from the community is collected and recycled to California State Water Resources Control Board Title 22 standards at IRWD's Michelson Water Recycling Plant (MWRP) and the Los Alisos Water Recycling Plant, which have the combined capacity to produce nearly 33.5 million gallons of tertiary recycled water per day.

Once treated, the recycled water is distributed throughout the service area and in FY 2021-22 accounted for approximately 27% of the District's total water supply. Approximately 85% of all business and community landscaped areas (parks, school grounds, golf courses, street medians, etc.) within the District's service area are irrigated with recycled water. The District also provides recycled water for various industrial and commercial uses. IRWD's goal is to continue recycling its sewage flows to provide 25% to 30% of its total water supply once the District's service area is fully developed.

The District operates a non-potable system which includes 5 wells, 5 open reservoirs and 12 storage tanks that store water for non-potable uses. In total, the District has approximately 4,500 acre feet of active recycled water storage capacity. IRWD has 75% ownership in Irvine Lake, a 25,000 acre-feet reservoir that can capture and store both stormwater and imported water supplies.

Sewage Collection and Treatment System

The District has an extensive network of gravity sewers, force mains, sewage lift stations, and siphons that convey sewage to two District-owned water recycling plants or to the Orange County Sanitation District (OC San). In FY 2021-22, the District treated approximately 80% of its sewage, and the remainder was diverted for treatment to OC San treatment facilities. In FY 2020-21, the District completed construction and began operation of the MWRP Biosolids and Energy Recovery Facility. This facility enables IRWD to process biosolids generated at the Michelson Water Recycling Plant which eliminates the need to send them to OC San for treatment. The District plans to expand its treatment capacity when and if necessary to serve its growing population. This expansion is discussed in more detail in the *Major Initiatives* section of this document.

Urban Runoff Source Control and Treatment System

IRWD is statutorily authorized to control and treat urban runoff and conduct various projects and programs as part of an effort to protect water quality in the San Diego Creek watershed. In the 1990s, the District constructed wetlands at the San Joaquin Marsh, where natural biological processes remove a substantial pollutant load from San Diego Creek's dry weather flow before it reaches the environmentally sensitive Upper Newport Bay State Ecological Reserve. In addition, the District operates a regional urban runoff treatment network known as the Natural Treatment System (NTS). As of June 30, 2022, the NTS consists of 45 constructed wetland treatment sites located throughout the San Diego Creek Watershed and one outside the IRWD service area, with several more currently under construction. The Peters Canyon Wash, Muddy Canyon, and Los Trancos diversion facilities add to these sites and pump runoff high in selenium into the OC San's sewers, where it eventually, after treatment, flows to OCWD's groundwater replenishment system.

San Joaquin Marsh

Infrastructure Assets

The District builds and maintains significant capital infrastructure in order to provide superior service to its customers. The table below provides key information relating to its water and sewer system assets from 2013 to 2022.

| Infrastucture Assets | | |
|---|---------|---------|
| | 2013 | 2022 |
| Potable System | | |
| Miles of Water Line | 1,516 | 1,979 |
| Number of Storage Tanks | 36 | 37 |
| Maximum Storage Capacity (acre feet) | 456 | 467 |
| Number of Pumping Stations | 37 | 39 |
| Number of Wells | 26 | 27 |
| Well Production Capacity (cfs) | 124 | 118 |
| Water Banking Storage Capacity (acre feet) | 109,600 | 126,000 |
| Potable Treatment Plants | 4 | 5 |
| Non-Potable and Recycled Systems | | |
| Miles of Recycled Line | 488 | 576 |
| Number of Storage Tanks | 12 | 12 |
| Number of Open Reservoirs | 5 | 5 |
| Maximum Storage Capacity (acre feet) | 24,155 | 24,155 |
| Number of Pumping Plants | 20 | 19 |
| Number of Wells | 5 | 5 |
| Well Production Capacity (cfs) | 10.0 | 10.0 |
| Sewer System | | |
| Miles of Sewer Line | 971 | 1,374 |
| Number of Lift Stations | 13 | 13 |
| Treatment Plants | 2 | 2 |
| Treatment Capacity (mgd) (Tertiary) | 23.5 | 33.5 |
| Sewage Flows to Michelson Plant | 69% | 68% |
| Sewage Flows to Los Alisos Plant | 14% | 12% |
| Sewage Flows to Orange County Sanitation District | 17% | 20% |
| Natural Treatment System | | |
| Urban Runoff Treatment Facilities | N/A | 45 |
| Nuisance Water Diversions | N/A | 3 |
| 1 acre foot = 325,900 gallons | | |
| cfs = cubic feet per second | | |
| mgd = millions gallons per day | | |
| N/A = Not Available | | |

2022 Accomplishments

The District conducts a Strategic Planning Process where the Board annually adopts goals and target activities and monitors accomplishments against those goals. Major accomplishments achieved in FY 2021-22 were as follows:

- 1. Continued to deliver superior service to customers during the Coronavirus Pandemic without any interruptions in customer service, governance or operations. There have been no customer shut offs or late fees charged for water service since March 2020 and customers were provided the opportunity to temporarily increase their residential water budget if needed. The District received \$2.0 million in State funding and applied it to qualified customers past due accounts. In addition, customers facing financial hardship have been offered payment plans to assist with their water bills.
- 2. Continued to promote long-term water use efficiency measures resulting in District customers having among the lowest residential gallons per capita per day (gpcd) rates in California. In FY 2021-22, IRWD's residential water use (indoors and outdoors) averaged 68 gpcd, which was 32% lower than the statewide residential water use average of 100 gpcd. District finances were not negatively impacted by lower water usage as IRWD recovers its costs from customers through fixed and variable charges.
- 3. Received \$12.2 million in Federal Funding on the Syphon Reservoir Improvement Project which will significantly expand the Districts recycled water supply.
- 4. Secured a tenant for a long-term lease of approximately 70,000 square feet of available office space for one of the District's real property investments. The District's ownership of real property investments helps fund a portion of the long-term replacement cost for water and sewer facilities and assists in keeping customer rates the lowest in Orange County.
- 5. Purchased land for the Groundwater Banking Joint Powers Authority, a partnership between IRWD and Rosedale Rio-Bravo Water Storage District to design, construct and operate the Kern Fan Groundwater Storage Project needed for additional supply reliability.
- 6. Completed a Master Agreement related to Irvine Lake real property matters and the use of Irvine Lake with Serrano Water District, County of Orange, and the Irvine Company.
- 7. Enhanced cybersecurity measures to protect the District's computer systems.
- 8. Maintained fully funded status of the IRWD employee pension plan.
- 9. Received several national honors including the U.S. Environmental Protection Agency's WaterSense Sustained Excellence, WaterSense Partner of the Year; the national WateReuse Association's Excellence for Public Outreach and Excellence in Action; the national WateReuse Association Service Award to General Manager Paul Cook; the American Water Works Association's 2022 Public Communications Achievement Award; the National Institute of Governmental Purchasing Achievement of Excellence; and Government Finance Officers Association Certificate of Achievement for Excellence in Financial Reporting. State honors included the California Association of Sanitation Agencies' Project of the Year and Public Outreach awards.

Future Goals

The Strategic Planning Process resulted in the Board adoption of nineteen Strategic Goals which it expects to accomplish within the next 5 years along with Target Activities that are typically accomplished within 12 to 18 months. The Board adopted Strategic Goals are as follows:

- 1. Optimize and protect local groundwater utilization: develop and implement projects to increase IRWD's access to local groundwater and stormwater capture; also implement solutions to remove emerging contaminants of concern (e.g., PFOA/ PFOS).
- 2. Optimize use of Irvine Lake as a water resource facility for IRWD and its current and future partners: implement projects which will enhance the long-term operational reliability of the reservoir.
- 3. Develop water recycling facilities and applications for optimal benefit: identify new opportunities for IRWD to utilize recycled water locally.
- 4. Maximize resource recovery from fully functional biosolids and other resource recovery facilities: optimize the start-up of IRWD's Biosolids and Energy Recovery Facilities.
- 5. Develop and implement maintenance and replacement programs and other systems that enhance safety, sustained operations at the District's facilities: Evaluate risk based analysis of all IRWD dams. Conduct a criticality analysis and asset condition assessments of sewage collection and treatment facilities to efficiently prioritize activities.
- 6. Improve energy service reliability, manage demands, and control greenhouse emissions, and control costs: develop capability to continue operation of key facilities during short and long-term power outages; update Energy and Greenhouse Gas Master Plan/Climate Action Plan.
- 7. Implement opportunities that enhance safety, security and emergency preparedness throughout the District: protect the health and safety of IRWD employees and the public.
- 8. Maximize water use efficiency in the community: explore future opportunities for increased water use efficiency and expand database for improved analytics.
- 9. Maximize watershed protection: control and treat urban runoff and prevent sewer spills.
- 10. Evaluate and invest in projects and programs that will enhance future long-term water supply reliability and resiliency to climate change: pursue projects and supply arrangements to enhance water supply reliability, including increased water banking and water recycling. Provide additional water storage opportunities for regional water supply reliability. Develop additional sources of funding for the Syphon Reservoir Improvement Project.
- 11. Develop water banking supplies for IRWD by working with current and future partners: develop capabilities for recharge, storage, and extraction capacity and store water as it becomes available. Continue development of IRWD water banking facilities in Kern County.
- 12. Develop and implement the Kern Fan Groundwater Storage Project through the Groundwater Banking Joint Powers Authority: execute agreements and secure additional water storage investment funding. Secure rights of way and land as needed and complete initial design for elements of the Project.
- 13. Ensure financial and rate stability: ensure adequate funding for future infrastructure replacement needs. Continue to provide low rates for IRWD customers. Maintain strong financials through solid debt service coverage, liquidity balances, mixed debt profile, and pension plan obligation funding of at least 90 percent.
- 14. Identify, assess and implement new technologies, systems and facilities to improve operating efficiency: protect existing and future systems through advanced cybersecurity measures.
- 15. Recruit, develop and retain a highly skilled, motivated, and educated work force: develop employee skills. Develop and implement employee expectations for corporate values and ensure appropriate employee compensation.
- 16. Collaborate with other agencies and entities through leadership and innovation: engage at a high-level in industry associations, regional water agencies, and development of opportunities of mutual benefit for IRWD and partners.

- 17. Enhance customer communications: strategically extend community outreach.
- 18. Guide and lead local, state and federal policies and legislation: actively engage in issues of key interest to IRWD including water use efficiency, water rate structures, water storage projects, PFAS regulations and others.
- 19. Engage and shape policies and regulations put forth by local, state and federal agencies: influence regulations to align with best practices for water loss regulations, water efficiency standards and emergency water supplies.

Water Use Efficiency

The District continues to be a leader in the innovation and implementation of water use measures that promote the most efficient use of water, both on a per capita and per acre basis.

The District's budget-based tiered rate structure, first implemented in 1991, is carefully designed to promote the efficient use of water by providing customers pricing signals related to over-use of water in a financially sustainable way. This structure is recognized as a model for other agencies to emulate.

In 2018, legislation was passed to "Make Conservation a Way of Life In California". As a result, the state will establish new long-term water efficiency objectives by December 31, 2022. IRWD has a long history of implementing cost-effective water efficiency programs, and is well positioned to meet the future efficiency standards. The District's customers have one of the lowest residential gallons per capita per day (gpcd) rates in California.

The District's Water Use Efficiency Implementation Plan (Plan), adopted April 2020, provides a comprehensive strategy to implement cost-effective water use efficiency measures for the District and its customers. Specifically, the Plan addresses:

- Engaging in policy discussions and implementing targeted programs to ensure the District is well-positioned to meet the new statewide water use efficiency objectives.
- Continuing to implement cost-effective demand management programs that minimize the need to purchase more expensive imported water, and thereby maintain a lower unit cost of water for the District and its customers.
- Focusing on outdoor water use which remains the biggest potential water conservation opportunity
 for the District, and the associated urban runoff (typically the result of "over-watering") to
 minimize water quality degradation from fertilizers, pesticides and animal waste in creeks, rivers
 and the ocean.
- Reducing water demands, which reduces energy usage and related costs needed to convey water.

The basic tenets of the Plan include local, state and national policy development and leadership, focused customer interface, extensive education and outreach, technology advances, and the development of financial incentives. During the past fiscal year, the District provided financial incentives to residential and business customers to install water efficient devices such as irrigation equipment and conversions from high water use turf landscape to water-efficient landscapes. The District has also pioneered the use of recycled water beginning in the late 1960s and presently serves over 6,100 sites, with approximately 26,000 acre feet of recycled water sold in FY 2021-22 representing 27% of the District's total water supply. The use of recycled water reduced the District's need to import more expensive potable supplies. Due to the investments made by the District to diversify its resources, expand the use of recycled water and improve water use efficiency, IRWD is well prepared to withstand the current statewide drought. IRWD does not project any water shortages and will continue to provide reliable, high quality water to its customers in a cost-effective manner.

Water Shortage Contingency Planning

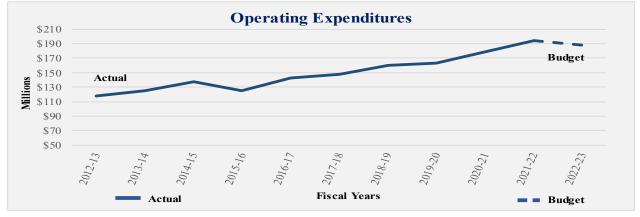

In compliance with California Water Code Section 10632, IRWD adopted an updated Water Shortage Contingency Plan (WSCP) in June 2021. The WSCP allows the District to strategically reduce water use through a number of potential actions that are staged dependent upon the severity of water shortages. The WSCP incorporates six standard water shortage levels corresponding to progressive ranges of up to 10%, 20%, 30%, 40%, 50%, and greater shortages. For each level or shortage, the WSCP includes a list of voluntary measures, non-rate response measures, and potential cost-of-service based rate response strategies. The WSCP provides the Board with the framework to respond to water shortages should they occur. In May 2022, the State Water Resources Control Board adopted its emergency regulation which includes prohibitions on the irrigation of non-residential, non-functional turf with potable water. The regulation also requires each water supplier to implement the demand management response actions defined in its WSCP associated with a Level 2 water shortage. In June 2021, the Board implemented the voluntary responses associated with Level 2 of the WSCP. In February 2022, the Board adopted cost-of service rates associated with the possible action required to achieve each of the six standard water shortage levels should it be required. Implementation of these rates would not go into affect unless the Board took additional action to implement these rates.

Legislative and Regulatory Affairs

The District actively monitors and works to influence local, state and federal legislation, policies and regulatory actions that could affect IRWD's operations, existing and future facilities and strategic planning efforts. The Board of Directors is frequently engaged in, and takes active positions on, relevant pending legislation and regulatory actions. The District continues to engage proactively in policy discussions surrounding water use efficiency, recycled water, and water policy in California. The District and its Board of Directors also actively participate in state and regional trade associations including the Association of California Water Agencies, the California Association of Sanitation Agencies, the WaterReuse Association, the California Special District Association, the California Municipal Utilities Association, and the Bioenergy Association of California.

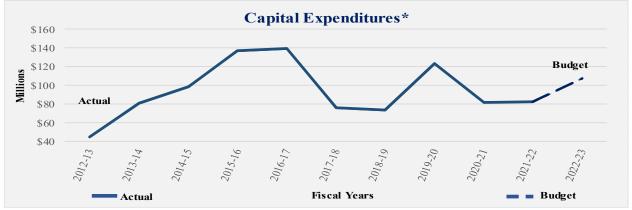

Financial Plan

In April 2021, the Board approved a two-year (biennial) operating budget for FY 2021-22 and FY 2022-23. The goal of the District's operating budget process is to appropriately fund the resources required to provide quality service to IRWD customers as cost-efficiently as possible. The graph below shows the actual operating expenditures through FY 2021-22, as well as the Board approved operating budget for FY 2022-23. Increases reflect costs associated with customer growth within the District, as well as an increase in overall operating expenses. Increases have been kept to a minimum by aggressively pursuing reductions in expenses to offset uncontrollable expenses, such as pass-through rate increases from outside agencies.

The approved two-year budget anticipated an increase from \$180.2 million in FY 2021-22 to \$187.7 million in FY 2022-23. The primary reasons were increases in retirement funding, labor and associated benefits for additional positions necessary to support increased regulatory requirements and software cybersecurity and complexity, higher costs of electricity due to expected rate increases from outside agencies, and increased operating and maintenance costs associated with new facilities coming online as well as maintenance of aging infrastructure of existing facilities.

The Board also approved a two-year capital budget in April 2021 based on new, enhancement and replacement infrastructure needs. The following chart shows the actual capital expenditures through FY 2021-22 and the budget for FY 2022-23.

* Actual capital expenditures excluding overhead, intangibles and capitalized interest.

The reduced spending in FY 2017-18 from prior years represents the District's completion of several large projects including the Baker Water Treatment Plant. Higher spending beginning in FY 2013-14 represents the design and construction phases for the Michelson Biosolids and Energy Recovery Facilities, which began construction in FY 2013-14 and spending peaked in FY 2016-17. The Board approved capital budget is \$107.5 million for FY 2022-23. Many capital budget projects extend beyond one fiscal year.

User Rates & Charges

User rates and charges are primarily used to fund the District's operation and maintenance expenses. The District separates the cost of constructing water and sewer infrastructure from the cost of daily operations and maintenance. User rates, as discussed below, are billed to customers on a monthly basis, and include a component for the inevitable replacement of existing infrastructure. The District collects replacement funds in advance of their need and invests for future use. This helps stabilize rates and avoid significant potential future rate spikes. In 2021, the District completed a detailed cost of service study which confirmed that user rates billed to customers are based on actual costs to provide the services. The District allocates capital costs within its service area through the use of water and sewer improvement districts, for which general obligation bond authorization is obtained and used as needed to fund new capital projects. Ad valorem property tax rates are set biannually by the District, as are connection fees paid by property developers and landowners. Generally, the District's policy is to allocate the cost of new infrastructure evenly between the developers/landowners and the ultimate property owners who utilize the water and sewer infrastructure.

Water Rates

The District's rate structure for water use is separated into a commodity charge component and a fixed service charge component. The commodity charge reflects the cost of providing the District's water supplies while the fixed service charge funds the fixed operational and

FY 2021-22 Residential Rate Structure – Potable Water (Commodity Charge)

| | | Cost per ccf* | | |
|-------------|----------------------|-----------------------|-----------|--|
| | Percent of Estimated | July 2021 to February | | |
| Tier | Customer Need | January 2022 | June 2022 | |
| Low Volume | 0 - 40% | \$1.47 | \$1.53 | |
| Base Rate | 41 - 100% | \$2.00 | \$2.42 | |
| Inefficient | 101 - 140% | \$4.86 | \$5.15 | |
| Wasteful | 141% + | \$13.63 | \$14.64 | |

^{*}One ccf (100 cubic feet) = 748 gallons

maintenance expenses of the District. Considering the hardship many of the District's customers experienced due to the impacts from COVID-19, the Board deferred planned water and sewer rate increases from FY 2020-21 until February 2022. The District will recover its costs for the two-year budget cycle over a 16-month period (February 2022 to June 2023).

For FY 2021-22, the District's water fixed service charge was \$10.35 per month until February 2022 when it was increased to \$10.75 for a 5/8-inch by 3/4-inch meter. The District has a long history of planning for the inevitable replacement of capital infrastructure and sets monies aside into enhancement and replacement funds for this purpose to avoid large, sudden rate increases in the future. The FY 2021-22 monthly fixed service charge includes a user enhancement and replacement component of \$0.70 and \$2.08, respectively which is intended to fund current and future replacement and refurbishment costs that provide reliability and redundancy to the District's infrastructure.

The District has a four-tiered rate structure that promotes water use efficiency. A basic use allocation is established for each customer account that provides a reasonable amount of water for the customer's needs based on factors such as the number of occupants, type or classification of use, size of the irrigated area, evapotranspiration rate for the billing period and other consistently applied criteria. The chart above illustrates the four-tier structure that reflects the FY 2021-22 rates and higher cost associated with usage in the higher tiers. As of June 2022, approximately 82% of the District's customers were within the first two tiers and approximately 94% of customers fell within the first three tiers. IRWD residential bills are consistently among the lowest in Orange County.

Sewer Rates

The District's sewer service rates are the lowest in Orange County. For a typical residential customer, the fixed monthly service charge covering the collection and treatment of sewage remained at the FY 2019-20 rate of \$19.55 in FY 2021-22 until February 2022 when it was increased to \$20.45. The monthly service charge includes a user enhancement and replacement component of \$0.68 and \$7.65, respectively, per month, which is intended to fund current and future capital costs to replace, refurbish and upgrade the existing system.

Historic Rate Trends

The following chart reflects the annual "base rate" charge for a typical customer's water and sewer service through FY 2021-22. As stated previously, the Board elected to defer an approved increase for FY 2021-22 until February 2022. Increased costs reflect pass-through increases from outside agencies and wholesale supplies and increased operational costs for both water and sewer, including funding for future infrastructure replacement.

\$60 \$50 \$40 Monthly Rate \$30 \$20 \$10 \$0 2016 2013 2014 2015 2017 2018 2019 2020 2021 2022 Fiscal Year ■ Sewer Charge ■ Water Charge

Factors Affecting Financial Condition

The information presented in the Financial Section is best understood in the context of the economic environment in which the District operates, as discussed below.

State and Local Economy

Orange County is the third most populous county in California with over 3.2 million residents and a varied economy in which no single industry is considered dominant. With a location central to Orange County, the District's service area is the home to numerous corporate headquarters such as Oakley, Edwards Life Sciences, Blizzard Entertainment, Bandai Namco Holdings USA Inc. and Glidewell Laboratories. The District is also home to various educational institutions, including University of California Irvine, Concordia University, two community colleges, and other colleges and universities with satellite campuses. The total estimated daytime population served is approximately 600,000.

During FY 2021-22, the District continued to expand its operating facilities to accommodate approximately 3,900 new water and sewer service connections constructed within District boundaries. Development and entitlement needs of the builders continue to change and there remains less than 20% of land available for future development. Requirements for these areas have been included in the planning and these facilities are included in the capital budget. The assessed value of land within the District's service area has grown significantly in the last decade from \$37.8 billion in 2013 to more than \$79.7 billion in 2022, demonstrating the strength of the local economy.

Long-Term Water Use Efficiency

IRWD has a long history of implementing cost-effective water efficiency programs and is well prepared to meet the future efficiency standards. The District is well positioned to sustain any potential reduction in revenues and meet future efficiency targets with minimal impact on net revenues due to its rate structure which effectively splits costs into variable and fixed rate components. Any decrease in consumption would be offset by a decrease in related variable costs while the fixed rate component would cover the fixed operating and maintenance costs.

^{*} The typical District customer uses 12 ccf water per month, has a 5/8 inch meter, and is in the lowest sewer rate tier.

COVID-19

The outbreak of coronavirus (COVID-19) and related government containment measures created challenges for essential service providers in the water and sewer industry, including IRWD. Due to COVID-19 and its ramifications to District customers, the Board elected to defer rate increases related to the approved budget for FY 2021-22 until February 2022. Rates implemented in February 2022 provide cost equity based on approved budgets for both FY 2021-22 and FY 2022-23 and will be effective through the end of FY 2022-23. Staff anticipates resuming the normal two-year rate review cycle consistent with the adoption of the two-year budget for FY 2023-24 and FY 2024-25.

In mid-March 2020, prior to the Executive Order issued by the Governor to suspend water shut-offs to customers for non-payment of services, the District proactively suspended all shut-offs and late payment penalties to customers. Payment arrangements as well as temporary variances for additional water usage for added people in the house were offered to all customers. Customer shut-offs will resume in fall 2022.

The State Water Resources Control Board received federal funding allocated through the California Water and Wastewater Arrearage Payment Program (CWWAPP). This program assisted Californians by providing payments to participating water and sewer service agencies for their customers' past-due water and sewer bills from March 4, 2020 to June 15, 2021, allowing this debt to be forgiven. IRWD applied for and received approximately \$2.0 million in funding for eligible customers under this program.

Financial Planning & Budgeting

Short-Term

The Board of Directors approves operating and capital budgets every two years and allocates required funding accordingly. The General Manager has limited discretion to transfer capital between activities and Board approval is required for any overall increase or substantial changes. Throughout the fiscal year, actual expenditures are compared to budget. Variances between budget and actual results are analyzed and evaluated to ensure the District's financial goals and objectives are being met. The budget process is further supported by the District's long-term financial models, enabling the Board to make informed decisions on setting rates and charges that ensure the long-term stability of the District. Funding needs are assessed using these financial planning models.

Long-Term

Meeting the goals of reliable, cost effective long-term water and sewer service requires substantial planning for both capital improvements and changing operating conditions. The District's capital program anticipates the need to update, expand or provide redundancy as well as refurbish and replace existing facilities as they reach the end of their useful life. District staff identifies future infrastructure requirements well in advance of needs to ensure the necessary funding for those projects is available. Capital projects are funded through a combination of connection fees, property taxes and user rates.

The District has a long history of planning for the enhancement and replacement of aging water and sewer infrastructure. Recognizing that infrastructure replacement is both inevitable and costly, the District established infrastructure Enhancement and Replacement Funds to provide funding for updating, expanding, creating redundancy, as well as replacing and refurbishing various components of the water and sewer systems. The objective of the funds is to help moderate the financial impact on future user rates attributable to expenditures associated with enhancing and replacing capital facilities. For FY 2021-22, the combined water and sewer user enhancement/replacement were \$34.3 million.

Over time, the District has transitioned from a newly developing area to a more fully developed area. While many of IRWD's projects slated for construction will provide additional capacity for ultimate demands, the focus of the District is transitioning from building new infrastructure projects to ongoing

operations and maintenance activities, as well as upgrading and replacing existing infrastructure. Connection fees paid by developers, which generated \$18.9 million for new capital in FY 2020-21 decreased to \$10.4 million in FY 2021-22 due to slowing development. The District utilizes a sophisticated financial model to factor in such variables as future development, construction costs, growth rates, inflation, redevelopment and other criteria in order to project rate setting for funding future capital needs.

The District completed a strategic review of its existing current capital funding plan which resulted in a master consolidation plan that combined certain improvement districts to maintain the future financial viability of each area. Diversification of the District's water supply and sewage treatment options are also major objectives of the District's master plan. Those objectives are discussed in further detail in the *Major Initiatives* section of this introduction.

The District's approach to infrastructure replacement and funding is consistent with the industry best practice and illustrates the District's commitment to financial stability and protection of its customers from significant future rate increases.

Pension Funding

The District recognizes that defined benefit plans and the related future pension obligations pose significant issues for many government agencies. The District has taken a proactive approach to address the issue and, in 2013, established an irrevocable Pension Benefits Trust to substantially fund its CalPERS unfunded liability. The Pension Benefits Trust provides the District with an additional funding option to CalPERS that allows for investment by a professional advisor selected and monitored by the District. The Pension Benefits Trust holds the funding contributions for the District pending future remittance to the CalPERS pension trust fund which will pay all retiree benefit payments to employees associated with the plan and will be transferred from the Pension Benefits Trust to CalPERS at the District's discretion.

Investment policy and asset allocation decisions relating to the Pension Benefits Trust are made by a Retirement Board consisting of two members from the IRWD Board of Directors and the District's General Manager. The District made an initial \$35.0 million contribution to the Pension Benefits Trust, and since then has made additional contributions ranging from \$1.9 million to \$12.8 million. As of June 30, 2022, the fair value of the assets in the Pension Benefits Trust was approximately \$94.8 million. The following schedule shows the recent history of pension plan assets and liabilities including the trust assets (in thousands):

| Fiscal | Total Pension | Total Pension | Total Pension Assets as a Percentage of the Total |
|----------|------------------|------------------|---|
| Year (1) | Liability | Assets | Pension Liability |
| 06/30/20 | \$291,334 | \$301,256 | 103.4% |
| 06/30/21 | 306,889 | 315,287 | 102.7% |
| 06/30/22 | 323,147 | 391,236 | 121.1% |

⁽¹⁾ As of the measurement date June 30, 2019, 2020, and 2021 respectively.

Cash Management Policies and Practices

The District is regulated by State law (primarily California Government Code Section 53600, et seq.) as to the types of fixed-income securities in which it can invest cash assets. In addition, the Board of Directors annually adopts an investment policy that is generally more restrictive than the State codes. The District's standard practice is to maintain an appropriate balance between safety, liquidity and yield of investments to fund required expenditures in conformance with all applicable State laws, the District's investment policy, and prudent cash management principles.

For FY 2021-22, the District's fixed-income investment portfolio consisted primarily of short-term securities with a portfolio average maturity of approximately 8 months. These securities included U.S. Treasury notes, U.S. government agency notes and the State-managed Local Agency Investment Fund. The average annual return for all District cash investments in FY 2021-22 was 0.49%. Including real estate investments, the weighted average rate of return was 2.85% for the same period.

At June 30, 2022, the District's cash and investments totaled approximately \$401.1 million. Cash balances are allocated to various funds including the Replacement Fund, New Capital Fund, Debt Service Fund and others.

Real Property Investments

As a means to match a portion of its long-term replacement cost for water and sewer facilities when they reach the end of their useful lives with long-term funding investments, the District obtained legislative authority from the State to invest a portion of its capital facilities Replacement Fund in real property located in Orange County.

As of June 30, 2022, the District owns or has an interest in six properties with an approximate fair value of \$278.6 million. The District's income-producing real estate investments have a weighted average return (based on cost) for FY 2021-22 of 12.3%. Net revenues of \$9.8 million generated in FY 2021-22 from the District's real estate investments are retained within the Replacement Fund and effectively reduce future increases in user rates.

Debt Management Policies and Practices

The District strives to minimize the cost of its long-term debt. In 1984, the District obtained State legislation that allowed for the use of variable rate debt to help achieve this goal. The Board minimizes its exposure to interest rate risk by utilizing both fixed and variable rate debt and has leveraged opportunities provided by the low interest rate environment in recent years. The District maintains a healthy balance between fixed and variable rate debt. As of June 30, 2022, its debt portfolio included 62.0% of fixed rate debt and 38.0% of variable rate debt. The average all-in cost of debt, including the District's fixed rate payer swaps, was 3.00% for the fiscal year.

The District has a Debt Management Policy Statement (Debt Policy). The Debt Policy objectives formalize District guidelines related to timing and amount of future debt issuance, allowable debt types and structures and spending requirements of bond proceeds. The Debt Policy also addresses underwriter selection and allowable methods of sale, continuing disclosure requirements, financial advisor and credit rating agency relationships and other key debt-related topics.

As of June 30, 2022, there were eight outstanding General Obligation (GO) bond issues consisting of \$237.3 million in variable rate mode and \$276.2 million in fixed rate mode (excluding any unamortized premium or discount).

As of June 30, 2022, the District also had one outstanding Certificate of Participation (COP) issue with a balance of \$109.7 million in fixed rate mode.

The District has secured direct pay letters of credit to enhance certain issues of its variable rate debt. The GO bond issues are secured by the District's ability to levy ad valorem property taxes to pay debt service. Although the District has elected to use a combination of ad valorem property taxes and other legally available funds to pay debt service, the legal authority exists to fully fund GO bond debt service through such ad valorem taxes. In addition to the ad valorem tax pledge, certain GO bond issues and the COPs issue are secured by the net revenues of the District. The District is required under its debt covenants to collect revenues sufficient to provide net revenues equal to 125% (1.25 times) of senior debt service coverage during the fiscal year. As of June 30, 2022, the District had net revenues equal to 3.5 times senior debt service coverage.

Prior to FY 2003-04, the District's outstanding debt was all in a variable rate mode and the Board of Directors took certain actions to manage and mitigate the interest rate risk. The District's practice has been to maintain a target amount of cash and fixed income investment assets equal to at least 75% of the District's outstanding unhedged variable rate debt. In addition, in 2004 the District began an interest rate swap program under which LIBOR-based fixed payer interest rate swaps were executed to hedge a portion of the District's variable rate exposure. The current \$60 million notional amount of outstanding interest rate swaps allow the District to limit the interest rate risk exposure on approximately \$89.5 million of its remaining tax-exempt variable rate debt to 3.81% (assuming a historical ratio for the tax-exempt SIFMA Index versus taxable 1-month LIBOR of 67%).

In 2017, the U.K. Financial Conduct Authority announced that it will no longer require its participating banks to provide daily submissions of LIBOR rates in the future, which will effectively discontinue the LIBOR index when that occurs. In January 2021, IRWD's Board of Directors approved the adherence to the ISDA LIBOR Fallback Protocol, and the District has completed the adherence process. When the 1-month LIBOR index is discontinued, the fixed payer swaps will transition to the selected Fallback Rate. It is currently anticipated that the 1-month LIBOR index will be discontinued mid-2023.

In FY 2010-11, the District issued \$175 million of general obligation fixed rate debt utilizing the taxable Build America Bond (BABs) program. BABs, created under the American Recovery and Reinvestment Act, are taxable bonds with subsidy payments made by the Treasury Department to issuers equaling 35% of the interest costs. In FY 2021-22, Federal subsidy payments were cut by 5.7% under permanent congressionally mandated sequestration. As a result of the reduced subsidy payments, the net interest rate for the District's BABs issue increased from 4.30% to 4.44%.

Risk Management

The Risk Management Department identifies potential risk and loss exposures and safeguards the District, its capital assets, and employees through its self-insurance and loss control programs, purchasing of appropriate insurance coverages, and developing risk management policies and procedures. The District utilizes a combination of self-insurance and third-party liability insurance to minimize loss exposures from property claims, third-party liability claims and workers compensation claims. The District self-insures the first \$25,000 per occurrence for property losses, \$100,000 per occurrence for third-party liability claims and \$125,000 per occurrence for workers compensation claims. Various control techniques used to minimize loss include, but are not limited to, regular employee safety meetings and training sessions, the use of uniform language in contracts designed to limit or prevent liability exposure, general risk assessments, and the development of emergency plans, including a business continuation plan. The District engages an outside firm to periodically evaluate its

network security. The external network security and cybersecurity assessments, and ongoing staff education and awareness, are just a few of the continuous efforts by the District to safeguard information.

Major Initiatives

The District's major initiatives during FY 2021-22 include continuing programs to secure water supplies, as well as expanding sewage treatment capacity and diverting sewage flows, water education programs, and the continuing implementation of the Water Use Efficiency Plan.

Water Supply Reliability

Groundwater Program

One of the goals of the District's Water Resources Master Plan is to identify a reliable water supply mix which includes developing sufficient groundwater production capacity to pump IRWD's portion of the Orange County Ground Water Basin, additional local groundwater production, and to have enough capacity to meet demands during outage conditions. Currently, the District meets these goals and has the ability to produce approximately 45,000 - 50,000 acre feet per year (AFY) of potable groundwater and 4,000 - 5,000 AFY of non-potable groundwater.

Water Banking

In addition to developing its local groundwater and recycled water systems, the District is further improving its water supply reliability by developing and operating water banking facilities in Kern County, California. These neighboring projects are known as the Strand Ranch Integrated Banking Project and the Stockdale West Integrated Banking Project (collectively, the IRWD Water Bank). The IRWD Water Bank is situated on groundwater recharge lands that overlie the regional Kern County groundwater basin. The purpose of the IRWD Water Bank is to improve the District's water supply reliability by capturing and storing low cost water available during wet hydrologic periods for use during dry periods. The IRWD Water Bank enhances the District's ability to respond to drought conditions and potential long-term water supply interruptions and enables it to reduce the cost of water delivered under such conditions.

The District has entered into agreements for a 30-year water banking partnership with the Rosedale-Rio Bravo Water Storage District (Rosedale) in Kern County. These agreements provide for Rosedale to operate the IRWD Water Bank on behalf of the District and permits the District: (i) to store up to 126,000 acre feet of water in the aquifer; (ii) to recharge a minimum of 44,600 acre feet of water per year in the aquifer; and (iii) to recover a minimum of 28,750 acre feet of water per year from the aquifer.

The District has constructed groundwater recharge ponds and related facilities at its IRWD Water Bank that are necessary to divert water from an adjacent canal into the ponds. Groundwater wells have been constructed on the Strand Ranch and Stockdale West properties. The District, in partnership with Rosedale and others, has also constructed additional wells that will increase the ability to recover water from the IRWD Water Bank during peak summer demand periods. The District has secured water from a number of sources for recharge at the IRWD Water Bank.

The District has entered into agreements with Metropolitan Water District of Southern California (MWD) which allows it to transfer water from the IRWD Water Bank into the District's service area.

Since 2010, the District has delivered a total of approximately 75,317 acre feet of water to the IRWD Water Bank through its water supply partnerships. The District has returned its partner's share of the

water and holds approximately 30,000 acre feet of water in storage for future use in IRWD's service area. The District is currently pursuing additional potential water supply opportunities for diversion into the IRWD Water Bank.

Kern Fan Groundwater Storage Project

The Kern Fan Groundwater Storage Project (Kern Fan Project) will become a regional water bank in the Kern Fan area to capture, recharge and store unallocated Article 21 water from the State Water Project (SWP) and other water supplies during wet hydrologic periods. Water stored in the Kern Fan Project would be extracted when needed to provide ecosystem, emergency supply and water supply benefits. IRWD's share of the Kern Fan Project would be used in conjunction with the Strand Ranch and Stockdale West Integrated Banking Projects to meet IRWD's contingency storage needs at build-out. IRWD's goal for contingency storage is to secure supplies adequate to backfill the loss of imported supplies for three consecutive years. The Kern Fan Project, along with the IRWD Water Bank will allow IRWD to meet this goal. The project will be developed, implemented and operated by the Groundwater Banking Joint Powers Authority, which was formed between IRWD and Rosedale-Rio Bravo Water Storage District in April 2020.

In August 2017, IRWD and Rosedale jointly submitted a grant application to the California Water Commission (CWC) for the proposed Kern Fan Project. The application sought Proposition 1 funds available from the CWC through the Water Storage Investment Program (WSIP). The CWC has conditionally awarded \$89.1 million to the Kern Fan Project and the District is currently pursuing additional funding opportunities.

Water Rights

The District also owns property with rights to State Water Project water which can be stored in the IRWD Water Bank. The water is available as a result of the District's acquisition of property located within the Dudley Ridge Water District, including the rights to use approximately 1,750 acre feet of Table A State Water Project water allocated to Dudley Ridge. The District can store its Table A water in the IRWD Water Bank with half of the water being available for future use in the District's service area. The acquisition also includes certain participation rights in the Kern Water Bank allowing the District to store up to approximately 9,500 acre feet of water.

The District owns approximately 3,100 acres of agricultural land (Palo Verde Properties) in Riverside County, California. IRWD's Palo Verde Properties are located within Palo Verde Irrigation District (PVID), which has first priority rights on the Colorado River. The properties are included in a Metropolitan Water District of Southern California and PVID fallowing program under which MWD makes payments to landowners (up to approximately 970 acres of IRWD's Palo Verde Properties) in exchange for letting land lie fallow. Water that is conserved through fallowing is available for use within MWD's service area (which includes the District's service area). The District leases the Palo Verde Properties to tenant farmers for agricultural uses.

Syphon Recycled Water Seasonal Storage Reservoir

Syphon Reservoir, located north of Irvine, is a sixty-year-old water storage reservoir historically used for agricultural purposes. The District purchased Syphon Reservoir in January 2010, and in 2015 completed the process of converting the reservoir into a recycled water seasonal storage facility. Seasonal storage reservoirs allow the District to store excess recycled water produced in the winter months for use in higher demand summer months. This will increase water reliability by reducing the District's dependency on imported water from MWD used to supplement the recycled water system.

In 2013, the District completed a feasibility study to increase storage capacity in Syphon Reservoir from its current capacity of 450 acre feet to approximately 5,000 acre feet. Additional storage capacity would allow the District to utilize more of the recycled water it produces. An expansion of Syphon Reservoir to approximately 5,000 acre feet would allow for recycling 100% of the sewage flows tributary to MWRP. The District recently completed the preliminary design for the reservoir expansion and is advancing final design, which is anticipated to be complete in late 2023. Construction of the expanded reservoir is anticipated to be complete in Summer 2028.

Expanded Water Recycling Options, Resource Recovery and System Reliability

The District is continuing its program to increase the reliability of the sewage system by diversifying treatment options and increasing the reliability of critical sewage collections facilities. The goals of the program are to collect sewage in the most cost effective method available, create a high quality and reliable recycled water supply for irrigation and commercial uses and minimize environmental impacts and risks. Sewage collected throughout the District is treated at three locations: The Michelson Water Recycling Plant (MWRP), the Los Alisos Water Recycling Plant (LAWRP) and at the Orange County Sanitation District (OC San). The District owns and operates the MWRP and LAWRP and owns capacity in the OC San facilities.

The most recent example of expanded water recycling reliability was a major capacity expansion of the MWRP from 18 million gallons per day (mgd) to 28 mgd, completed in 2014. The two plants operated by the District currently have capacities of 28 (MWRP) and 7.5 (LAWRP) mgd, with a collective capacity of 35.5 mgd. Expanding existing infrastructure for sewage treatment has four primary benefits including:

- Increased recycled water production and utilization.
- Decreased exposure to third party treatment costs and operational constraints.
- Decreased dependency on imported water supplies.
- Lower total cost.

In addition to the projects identified above, the District evaluated alternative approaches to recover the solids generated by its water recycling facilities. The evaluation of alternative approaches for handling MWRP solids, historically conveyed to Fountain Valley for treatment by OC San, included consideration of many factors such as costs and potential community impacts.

As a result, in FY 2013-14, the District began construction of a new state- of-the-art organic dewatering and biogas recovery system at the MWRP. The system makes efficient and sustainable use of locally generated renewable resources by creating a beneficial use of biosolids and biogases that are produced during the sewage treatment/recycling process. This project aligns with IRWD's sustainable business practices, while at the same time creating an effective cost management of sewage/recycling services for IRWD customers. The biosolids treatment process allows for the conversion of biogas into electricity thereby further reducing the District's dependency on its electricity provider. The MWRP Biosolids and Energy Recovery Facilities began operation in December 2021.

Community Education and Outreach

With California in its third year of historic drought and the governor calling for voluntary reductions in water use, Irvine Ranch Water District has been mindful of the potential for message fatigue when asking customers to save water. COVID-19, inflation, and other crises have turned people off to messages about problems, and traditional top-down calls to action have grown stale. Breaking through that static, IRWD

in 2021-2022 took a different approach by leveraging humor to engage customers in conversation about drought and water savings.

Social media: IRWD's #HowDoYouDrought social media campaign set records for the District, with 5.1 million impressions and 33,243 likes, comments and shares on Facebook and Instagram. Set up as a sweepstakes, #HowDoYouDrought included open-ended posts that encouraged participants to comment, tag friends, and follow. Humorous pieces were designed to spark a reaction. Comments ignited lively customer debate on the state of water in California, providing an educational opportunity for the District to share links and resources to inform the community. Wastey, the worst mascot ever, was created as a part of the campaign.

Video series: Fiscal Year 2021-22 also marked the creation of The Shed Show, IRWD's landscape-themed video series designed to inspire and help customers save water outdoors. Episode 1 addresses the benefits of native pollinator gardens to save water and attract bees, birds and bugs that help plants reproduce, while delivering bursts of color to a garden. It features tips on plants, design, and irrigation. Episode 2 walks customers through the process of replacing turf with an eye-popping landscape of native and climate-friendly plants — proving that even small spaces can look lush and inviting. Episodes can be viewed at IRWD.com/ShedShow.

Water education: Students in IRWD's service area are virtually diving into sewage treatment, thanks to the wonders of computergenerated imagery. The District's awardwinning Virtual Recycled Water Adventure, a joint project with Discovery Cube Orange County, is taking students into interactive, digital worlds where they can explore and learn about recycled water. A 360-degree video pairs an operations staff member with a computer-generated robot named "Cleanbot" on an interactive adventure through IRWD's

Michelson Water Recycling Plant. The project features searchable 360-degree video taken at the plant, allowing students to explore the headworks, settling tanks, Membrane Bio Reactor, ultraviolet light station, and chlorine contact basin. Virtual stations and activities helps explain the treatment process with tasks that include identifying nonflushable items in sewer water at the headworks; watching Cleanbot sing about troublesome fats, oils and grease; and "swimming" in activated sludge. This is the second 360-degree learning project completed in partnership with Discovery Cube, which coordinates IRWD's water education outreach with local schools. A similar tool was developed last year to describe the plants and animals living at the District's San Joaquin Marsh and the science behind IRWD's Natural Treatment System.

Outreach: The District's monthly "Pipelines" newsletter and quarterly gardening newsletter, "The Dirt," continued to inform customers and inspire them to appreciate the value of water. News articles promoting similar messages were published in local newspapers. Irvine Ranch Water District was profiled extensively in coverage about the drought throughout the year.

Also in FY 2021-22, IRWD implemented a suite of workshops, and creative and targeted outreach initiatives promoting water use efficiency. This included promotions for smart controller rebates, a "Mulch Madness" 50% discount program, and the District's highest turf removal rebate ever - at \$5 for every square foot of lawn removed.

Looking ahead, IRWD approved plans to redesign and consolidate District websites. Future segments of The Shed Show will focus on segmented short clips addressing irrigation upgrades, and several droughtrelated events and community presentations are being planned to extend the successful outreach achieved this past year.

Awards and Acknowledgments

The Government Finance Officers Association (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Irvine Ranch Water District for its annual comprehensive financial report (ACFR) for the fiscal years ended June 30, 2004 through June 30, 2021. In order to be awarded a Certificate of Achievement, IRWD was required to publish an easily readable and efficiently organized ACFR that satisfied both GAAP and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year. We believe that our current ACFR continues to meet the Certificate of Achievement Program's requirements and will be submitting it to the GFOA to determine its eligibility for another certificate.

Staff would like to acknowledge the IRWD Board of Directors for their support and for maintaining the highest standards of professionalism in the management of the District's operations and finances. We would also like to thank the dedicated employees of the District for their commitment to providing high quality service to the District's customers. The preparation of this report would not have been possible without the efficient and dedicated service of the entire Finance Department staff. We also wish to express our appreciation to all staff that assisted and contributed to the preparation of this report.

Respectfully submitted,

Paul A. Cook

Certificate of Achievement for Excellence in Financial Reporting

Presented to

Irvine Ranch Water District California

For its Annual Comprehensive Financial Report For the Fiscal Year Ended

June 30, 2021

Financial Section

Irvine Ranch Water District Fiscal Year Ended June 30, 2022

Independent Auditor's Report

Board of Directors Irvine Ranch Water District Irvine, California

Report on the Audit of the Financial Statements

Opinions

We have audited the financial statements of the business-type activities and the aggregate remaining fund information of Irvine Ranch Water District (the District), as of and for the year June 30, 2022, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

In our opinion, the accompanying financial statements present fairly, in all material respects, the respective financial position of the business-type activities and the aggregate remaining fund information of Irvine Ranch Water District, as of June 30, 2022, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

During the year ended June 30, 2022, the District implemented Governmental Accounting Standards Board (GASB) Statement No. 87: Leases. Our opinion is not modified with respect to this matter.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the District and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

The District's management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the

District's ability to continue as a going concern for one year after the date that the financial statements are issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the District's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, schedule of changes in net pension liability and related ratios, schedule of contributions – defined benefit pension plan, schedule of changes in the OPEB liability and related ratios, and schedule of contributions – OPEB be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's

responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Report on Summarized Comparative Information

We have previously audited the District's 2021 financial statements, and we expressed an unmodified audit opinion on those audited financial statements in our report dated December 1, 2021. In our opinion, the summarized comparative information presented herein as of and for the year ended June 30, 2021 is consistent, in all material respects, with the audited financial statements from which it has been derived.

Other Information

Management is responsible for the other information included in the Annual Comprehensive Financial Report. The other information comprises the *introductory section* and *statistical section* but does not include the financial statements and our auditor's report thereon. Our opinions on the financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated November 30, 2022 on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control over financial reporting and compliance.

Irvine, California November 30, 2022

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following discussion and analysis of the financial performance of the Irvine Ranch Water District (District) provides an overview of the District's financial activities for the fiscal year ended June 30, 2022. This section should be read in conjunction with the basic financial statements and notes to the basic financial statements, which follow this analysis.

Financial Highlights

- Total assets and deferred outflows of resources exceed total liabilities and deferred inflows of resources by \$2,112.0 million (net position), consisting of \$1,362.3 million in net investment in capital assets, \$358.3 million restricted for water services and \$391.4 million restricted for sewer services. This is an increase of \$37.8 million or 1.8 percent over the prior fiscal year net position of \$2,074.2 million.
- Total assets are \$2,912.1 million, an increase of \$19.3 million or 0.7 percent over the prior fiscal year. Total assets consist primarily of \$401.1 million in cash and investments, \$80.2 million in receivables, \$2,029.8 million in net capital assets, and \$384.0 million in noncurrent assets. The increase from the prior year is due primarily to a \$26.0 million increase in a receivable from the Orange County Sanitation District (OC San), a \$8.9 million increase in real estate investments, a \$6.0 million increase in capital assets, a \$5.2 million increase in investment in joint venture, a \$3.9 million increase in other receivables for the water banking program agreements, and a \$2.5 million increase in leases receivable. These were partially offset by a \$20.9 million decrease in the District's cash and investments and a \$13.1 million decrease in the fair value of pension benefits trust investments.
- Total liabilities are \$802.7 million, a decrease of \$59.1 million or 6.9 percent from the prior year. Liabilities consist primarily of \$669.3 million of debt, net pension and OPEB liabilities of \$64.6 million, accounts payable and other liabilities of \$58.5 million, and swap liability of \$10.3 million. The total decrease over the prior year is due primarily to a decrease of \$34.9 million in net pension liability, total principal debt payments of \$17.9 million made during the fiscal year, and a decrease of \$10.0 million in accumulated losses associated with the fair value of interest rate swaps.
- The Irvine Ranch Water District Post-Employment Benefits Trust (Pension Benefits Trust) was established in June 2013 to assist in funding the District's CalPERS unfunded liability. As of June 30, 2022, the District's total pension assets (including the CalPERS and Pension Benefits Trust assets) as a percentage of its total pension liability is 121.1 percent. For more detail, see Note 13 of the Notes to the Basic Financial Statements.
- Total revenues are \$271.9 million, a decrease of \$47.6 million or 14.9 percent over the prior fiscal year. Revenues consist primarily of \$188.2 million in water and sewer related revenues generated from rates, \$70.8 million in property taxes, \$16.4 million in real estate income and a \$18.0 million reduction in the fair value of pension benefit trust assets. Operating revenues increased \$9.4 million due primarily to a Board approved rate increase effective February 2022. In addition, the District recognized \$3.9 million from the sale and exchange of the water banking program's banked water. Non-operating revenues decreased \$57.0 million due primarily to decreases in the fair value of real estate assets and pension benefits trust investments.
- Total expenses are \$280.4 million, an increase of \$11.9 million or 4.4 percent over the prior fiscal year. Operating expenses consist primarily of \$171.3 million in water and sewer related revenues to operating the systems, \$79.0 million of depreciation, and \$20.7 million of interest expense. Operating expenses increased \$9.6 million due primarily to increased depreciation expense, increased costs associated with the imported water purchases, and increased costs associated with the water system maintenance. These were partially offset by decreased general and administration expenses due to lower pension expense and lower flows to OC San for handing, treatment, and disposal of sewage solids. Non-operating expenses increased by \$2.3 million due to the write-off of customer accounts receivable as a result of the federal funding received from the California Water and Wastewater Arrearage Payment Program provided by the California State Water Resources Control Board.

Financial Highlights (Continued)

• Capital contributions are \$46.3 million, an increase of \$14.9 million or 47.5 percent over the prior fiscal year. This is due primarily to a \$20.4 million increase in the number of donated facilities that were completed and donated from developers to the District and a \$3.0 million increase in grants received, partially offset by a \$8.5 million decrease in connection fees paid by developers.

More detailed analysis about the overall District's financial position and operations is provided in the following sections.

Overview of the Financial Statements

The basic financial statements of the District consist of the financial statements (the Statement of Net Position, the Statement of Revenues, Expenses, and Changes in Net Position, and the Statement of Cash Flows), Statement of Fiduciary Net Position, Statement of Changes in Fiduciary Net Position and notes to the basic financial statements. The basic financial statements are prepared using the accrual basis of accounting. This report also contains other supplementary information in additional to the basic financial statements.

Statement of Net Position depicts the District's financial position at June 30, the end of the District's fiscal year. The statement of net position shows all financial assets and liabilities of the District. Net position represents the District's residual interest after liabilities and deferred inflows of resources are deducted from assets and deferred outflows of resources. Net position is displayed in two components: net investment in capital assets and restricted for water and sewer services.

Statement of Revenues, Expenses and Changes in Net Position provides information on the District's operations and can be used to determine whether the District has recovered all of its costs through operating and non-operating revenues.

Statement of Cash Flows provides information on the District's cash receipts, cash payments and changes in cash resulting from operations, investments and financing activities.

Fiduciary Fund is used to account for assets held by the District as a custodian for the San Joaquin Wildlife Sanctuary (SJWS).

Notes to the Basic Financial Statements provide additional information essential to a full understanding of the data provided in the basic financial statements.

The **Other Information** includes *required supplementary information* concerning the District's progress in funding its obligations to provide pension and other post-employment benefits to its employees.

Financial Analysis of the District

The following condensed schedules contain summary financial information extracted from the basic financial statements to assist general readers in evaluating the District's overall financial position and results of operations as described in this Management's Discussion and Analysis (MD&A). Increases or decreases in these schedules can be used as performance indicators to assess whether the District's overall financial position has improved or deteriorated. Other external factors such as changes in economic conditions, customer growth, and legislative mandates should also be considered as part of this analysis.

Financial Position Summary

The Statement of Net Position reflects the District's financial position as of June 30. The statement includes assets, deferred outflow of resources, liabilities, and deferred inflows of resources. The net position represents the District's net worth including, but not limited to, capital contributions and net investment in capital assets. A condensed summary of the District's total net position at June 30 is set forth below:

| Table 1 - Summary of Net Position (in millions) | | | | | | |
|---|-----------|-----------|---------------------|------------|--|--|
| | | | Increase/(Decrease) | | | |
| | 2022 | 2021 | Amount | Percentage | | |
| Assets | | | | _ | | |

| Total net position | \$2,112.0 | \$2,074.2 | \$ 37.8 | 1.8% | | |
| | | | | | | |

As shown in Table 1, the District's total assets increased \$19.3 million or 0.7 percent during the current fiscal year. Current assets increased \$10.0 million. Current assets include amounts due from other agencies relating to cash deposits held by OC San, the District's third-party provider for excess sewage flows, which increased by \$26.0 million based on the agreements between the two agencies for future obligations. The increase in current assets also includes to a \$3.9 million increase in other receivables relating to the water banking programs. The increase is partially offset by a \$20.9 million decrease in cash and investments balances.

Capital assets increased \$6.0 million or 0.3 percent during the current fiscal year. The District added \$359.7 million in water and sewer assets during the year partially offset by an increase of \$77.2 million in accumulated depreciation. During the current fiscal year, the \$293.1 million Michelson Water Recycling Plant Biosolids and Energy Recovery Facilities project, a multiple year project was completed and transferred from the construction in progress to the sewer plant in service capital assets. The largest capital spending during the current fiscal year was \$7.6 million for the Water System's General System Modification and Replacement Water System Project and \$7.1 million for the Zone A to Rattlesnake Reservoir Pump Station Project.

Other noncurrent assets increased \$3.3 million or 0.9 percent during the current fiscal year. Noncurrent assets include the District's real estate investments and the pension benefits trust investments which was established in 2013 to help fund the District's pension liability.

Financial Position Summary (Continued)

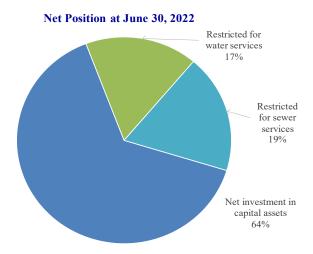

The real estate investments increased by \$8.9 million due primarily to an increase in the fair value of real estate investments. The investment in joint venture increased by \$5.2 million due primarily to a cash contribution to the Groundwater Banking Joint Powers Authority for property acquisitions. In addition, the District recorded a \$2.4 million noncurrent leases receivable due to the implementation of the Governmental Accounting Standards Board (GASB) Statement Number 87: Leases. The increase is partially offset by a \$13.1 million decrease in the fair value of pension benefits trust investments.

The District's deferred outflows of resources decreased by \$12.8 million or 28.5 percent over the prior fiscal year. This is due primarily to a \$10.0 million decrease in accumulated losses associated with the fair value of interest rate swaps and a \$3.5 million decrease in pension and OPEB actuarial related changes in assumptions and experience.

The District's total liabilities decreased \$59.1 million or 6.9 percent in the current fiscal year. This was due primarily to \$34.9 million in net pension liability, \$17.9 million in principal payments of the District's general obligation bonds, certificates of participation, and notes payable during the current fiscal year, and \$10.0 million in accumulated losses associated with the fair value of interest rate swaps. The decrease was partially offset by a \$1.4 million increase in OPEB liability and a \$4.8 million increase in the accounts payable to various vendors.

The District's deferred inflows of resources increased \$27.8 million or 1,635.3 percent in the current fiscal year. This was primarily due to a \$25.3 million increase in pension and OPEB actuarial related changes in assumptions and experience and a \$2.5 million increase in leases as a result of the implementation of the GASB Statement Number 87: Leases.

Net position at the end of the current fiscal year increased \$37.8 million or 1.8 percent. Net position consists of net investment in capital assets and restricted net positions.

Net investment in capital assets are capital assets, net of accumulated depreciation/amortization and liabilities (such as debt) attributable to the acquisition, construction. improvement of those assets. investment in capital assets was \$1,362.3 million or 64.5 percent of total net position, an increase of \$25.6 million from the prior fiscal year. The change is due primarily to \$6.0 million in net capital asset additions, \$17.9 million of debt principal payments and \$2.2 million amortization of premiums in the current fiscal year.

Restricted net position for water services was \$358.3 million or 17.0 percent of total net position. Restricted net position for sewer services was \$391.4 million or 18.5 percent of total net position. Restricted net positions are restricted by legislation which imposes requirements that District assets be used only for the specific purposes for which it was formed.

Activities and Changes in Net Position
The Statement of Revenues, Expenses, and Changes in Net Position summarizes the District's operations during the current fiscal year. A Summary of the District's changes in net position for the fiscal years ended June 30, is included in Table 2 below:

| Table 2 - Revenues, Expenses and | Cha | nges in | Net: | Positio | n (iı | n millio | ns) |

| | | | | | | | |

Revenues

As shown in Table 2, the District's operating revenues total \$188.2 million or 69.2 percent of total revenues. Water sales contributed \$103.3 million or 54.9 percent to total operating revenues and sewer sales contributed \$84.9 million or 45.1 percent to total operating revenues. Operating revenues increased by \$9.4 million or 5.3 percent from the prior fiscal year. This is primarily due to a Board approved rate increase effective February 2022 as well as customer growth. In addition, the District recognized \$3.9 million from the sale and exchange of the water banking program's banked water.

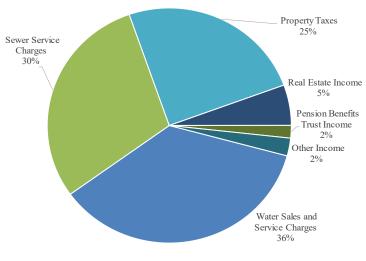

The chart below illustrates the sources of revenue for the fiscal year ended June 30, 2022.

Non-operating revenues total \$83.7 million and account for 30.8 percent of total revenue for the fiscal year ended June 30, 2022. This is a decrease of \$57.0 million or 40.5 percent from the prior fiscal year. The decrease in the current fiscal year is due to:

- A decrease of \$55.8 million in changes in the fair value of the Pension Benefits Trust investments, real estate investments, and the District's fixed income investments.
- A decrease of \$6.1 million in the District's fixed income investment interest income.
- An increase of \$3.1 million in one percent and ad valorem property tax revenue associated with higher assessed values in the District's service area.

Revenues for Fiscal Year Ended June 30, 2022 (excluding changes in fair value of investments,

- An increase of \$1.0 million in income from the real estate investments.
- An increase of \$0.6 million in the Pension Benefits Trust interest and dividends income.
- Other net increases of \$0.2 million.

Expenses

As shown in Table 2, operating expenses total \$250.3 million, of which \$171.3 million relates to the cost of providing water and sewer services to the District's customers. Water service operating costs are 103.0 percent of revenues and sewer service operating costs are 76.4 percent of revenues. Water and sewer operating expenses, excluding depreciation, decreased by \$1.4 million or 0.8 percent over the prior fiscal year.

Water expenses totaled \$106.4 million, an increase of \$4.7 million or 4.6 percent primarily due to:

- An increase of \$3.7 million in water costs due primarily to higher imported water purchases.
- An increase of \$2.5 million in electricity for potable and untreated water treatment and system maintenance.
- An increase of \$1.9 million in expensed water projects related to the District's capital program.
- An increase of \$1.5 million in operating supplies, equipment usages, and other professional fees.

Expenses (Continued)

- A decrease of \$5.2 million in general and administration expenses due to a decrease in pension expense.
- Other net increases of \$0.3 million.

Sewer service expenses totaled \$64.9 million, a decrease of \$6.1 million or 8.6 percent over the prior fiscal year. The decrease is due primarily to:

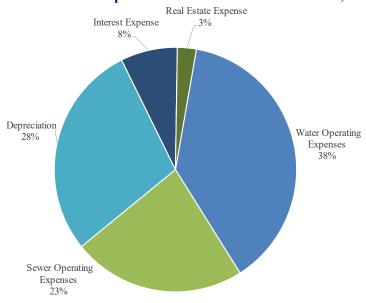

- A decrease of \$7.7 million in the cost of handling, treatment, and disposal of sewage solids sent to the District's third-party provider OC San due to lower flows and a full year operation of the biosolids facilities.
- A decrease of \$3.7 million in expensed sewer and recycled water projects relating to the District's capital program.
- A decrease of \$3.0 million in general and administration expenses due to a decrease in pension expense.
- An increase of \$6.4 million in electricity, chemicals, operating supplies, and repair costs for sewage treatment and recycled water system maintenance.
- An increase of \$1.4 million in untreated water purchased for the recycled water system to meet customer demands.
- An increase of \$0.6 million in labor costs.
- Other net decreases of \$0.1 million.

Depreciation expense totaled \$79.0 million, an increase of \$11.0 million or 16.2 percent over the prior fiscal year. The increase is the result of the completion of several capital projects.

Non-operating expenses totaled \$30.1 million, an increase of \$2.3 million or 8.3 percent from the prior year primarily due to:

An increase of \$1.4 million in other non-operating expenses associated with the write-off of customer accounts receivable as a result of federal funding received from the California Water and Wastewater Arrearage Payment Program provided

Functional Expenses for Fiscal Year Ended June 30, 2022

by the California State Water Resources Control Board.

- An increase of \$1.0 million in real estate expense.
- A decrease of \$0.1 million in interest expense associated with the District's debt.

Capital Contributions

Capital contributions totaled \$46.3 million, an increase of \$14.9 million or 47.5 percent from the prior fiscal year. Donated facilities from developers increased \$20.4 million due to an increased number of projects that were completed and donated to the District. Connection fees paid by developers were \$10.4 million, a decrease of \$8.5 million from the prior year due to a lower number of new units resulting from a slowdown in residential construction. The District also received \$3.0 million more from grants / contributions from federal, state, and local agencies compared to the prior year.

Capital Assets

The District's investment in capital assets consists of the following as of June 30:

| Table 3 - Capital Assets, Net of Depreciation (in millions) | | | | | | |
|---|---------------------|------------|---------|------------|--|--|
| | Increase/(Decrease) | | | | | |
| | 2022 | 2021 | Amount | Percentage | | |
| Water assets | \$ 1,273.6 | \$ 1,228.1 | \$ 45.5 | 3.7% | | |
| Sewer assets | 1,682.2 | 1,367.9 | 314.3 | 23.0% | | |
| Less: accumulated depreciation | (1,133.1) | (1,055.9) | (77.2) | 7.3% | | |
| Land and water rights | 126.6 | 126.6 | - | 0.0% | | |
| Construction in progress | 80.5 | 357.1 | (276.6) | -77.5% | | |
| Total | \$ 2,029.8 | \$ 2,023.8 | \$ 6.0 | 0.3% | | |

Capital assets, net of depreciation increased \$6.0 million or 0.3 percent in the current fiscal year. Construction in Progress added \$102.1 million during the current fiscal year. Total projects transferred from Construction in Progress to Capital Assets and depreciated during the fiscal year ended June 30, 2022 were \$378.7 million. The District's accumulated depreciation increased by \$77.2 million for depreciation expense in the current fiscal year. The following is a list of the top 10 capital projects expenditures which accounted for 37.1 percent of total capital assets additions incurred in the current fiscal year (in millions):

| Project Description | Amount |
|--|---------|
| General System Modification and Replacement Water System | \$ 7.6 |
| Zone A to Rattlesnake Pump Station | 7.1 |
| Chlorine Gas Disinfection System Conversion | 4.2 |
| Rehabilitation of Collection System Siphons | 4.1 |
| Zone 1 Reservoir Replacement Interior Coating | 3.3 |
| Syphon Reservoir Improvements | 3.0 |
| Improvement of NTS Facility Plan Orchard Estates Retarding Basin | 2.3 |
| Zone C Pump Station Location | 2.2 |
| Woodbridge Recycled Water Pipeline Replacement | 2.1 |
| General System Modification and Replacement Recycled Water | 2.0 |
| Total | \$ 37.9 |

Additional information on the District's capital assets can be found in Note 5 of the Notes to the Basic Financial Statements.

MANAGEMENT'S DISCUSSION AND ANALYSIS (Continued)

Debt Administration

As shown below in Table 4, as of June 30, 2022, the District had total debt outstanding of \$669.3 million, a decrease of \$19.6 million or 2.8 percent from the prior fiscal year.

| Table 4 - Outstanding Debt (including current portions) (in millions) | | | | | | |
|---|-------|---|---------------------------|---|--|--|
| | | | | I | ncrease/ | (Decrease) |
| | 2022 | | 2021 | | Amount | Percentage |
| \$ | 535.3 | \$ | 550.4 | \$ | (15.1) | -2.7% |
| | 133.2 | | 138.2 | | (5.0) | -3.6% |
| | 0.3 | | 0.3 | | - | 0.0% |
| | 0.5 | | - | | 0.5 | 100.0% |
| \$ | 669.3 | \$ | 688.9 | \$ | (19.6) | -2.8% |
| | Ì | 2022 \$ 535.3 133.2 0.3 0.5 | \$ 535.3 \$ 133.2 0.3 0.5 | 2022 2021 \$ 535.3 \$ 550.4 133.2 138.2 0.3 0.3 0.5 - | 2022 2021 \$ 535.3 \$ 550.4 \$ 133.2 0.3 0.3 0.5 - | 2022 2021 Amount \$ 535.3 \$ 550.4 \$ (15.1) 133.2 138.2 (5.0) 0.3 0.3 - 0.5 - 0.5 |

During the current fiscal year, the decreases in the District's total debt were primarily due to \$17.9 million in debt payments and \$2.2 million of premium amortization. The decrease was offset by a \$0.5 million increase in leases payable due to the implementation of the GASB Statement Number 87: Leases. The District's rated debt obligations have received the following ratings from the three major rating agencies:

Fitch Ratings: AAA
Moody's: Aa1
Standard and Poor's: AAA

Additional information on the District's long-term debt can be found in Note 10 of the Notes to the Basic Financial Statements.

Contacting the District's Financial Management

This financial report is designed to provide our citizens, taxpayers, customers, investors and creditors with a general review of the District's finances and to show the District's accountability for the money it receives. If you have questions about this report or need additional financial information, contact the Executive Director of Finance and Administration at the Irvine Ranch Water District, 15600 Sand Canyon Avenue, Irvine, California 92618-7500.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022

(1) Summary of Significant Accounting Policies

(a) Reporting Entity

The Irvine Ranch Water District (District) was formed in 1961 as a special district under Division 13 of the California Water Code (the Act). The District provides potable and recycled water service as well as sewage collection, treatment, and disposal to users within its boundaries.

The District is divided geographically into eight water and ten sewer improvement districts (IDs), as well as several planning areas (PAs) that function as informal improvement districts. Each improvement district is a sub-fund of the District and their primary purpose is to allocate costs and funding on an equitable basis for the construction of water, sewer, and recycled water infrastructure. Most improvement districts have authority to issue general obligation bonds to finance the construction of capital facilities that were identified and valued in a Plan of Works specific to the improvement district. Each improvement district with authority to issue general obligation bonds also has the authority to levy and collect connection fees and ad valorem taxes on the land within its legal boundaries sufficient to meet its general obligation bond indebtedness.

Connection fees which are paid by developers and property taxes which are paid by property owners vary by improvement district based upon, among other considerations, total capital costs, ratio of developed to undeveloped land, and development densities; however, water and sewer user fees are uniform throughout the District.

Description of the Reporting Entity

The financial statements of the District include the financial activities of the following sub-fund improvement districts and planning areas:

Area Excluded from IDs 111/222 112/212 Former El Toro Marine Base 113/213 Former Tustin Marine Base 125/225 Developed/Underlay 240 Newport Coast/Newport Ridge 252 Santiago Hills 153/253 Irvine Business District /Spectrum /Shady Canyon/Laguna Laurel/East Orange 154 Santiago Canyon(s) 256 Orange Park Acres 185/285 Los Alisos Area 188/288 Portola Hills Commercial 110/210 Overall District Boundary

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(1) Summary of Significant Accounting Policies (Continued)

(a) Reporting Entity (Continued)

Blended Component Units - Blended component units although legally separate entities, are, in substance, part of the District's operations since they have the same governing board. The District has both financial accountability and operational responsibility for the blended component units. The District has the following blended component units:

The Irvine Ranch Water District Water Service Corporation – In January 1997, the District formed a 501(c)(4) corporation for the purpose of financing and acquiring water, sewer and other public improvements. The Corporation was created to effect the merger of the Santa Ana Heights Water Company and the issuance of the 2002 Certificates of Participation, 2008 Refunding Certificates of Participation, 2010 Refunding Certificates of Participation, and 2016 Certificates of Participation. The Corporation's bylaws mandate that the members of the District's Board of Directors shall constitute the Corporation's five-member Board of Directors. The Irvine Ranch Water District Water Service Corporation does not issue separate financial statements.

Bardeen Partners, Inc. – In March 1991, the District formed a 501(c)(4) corporation for the purpose of accounting for the financial data and transactions for certain District real estate investments, including the investments in Wood Canyon Villas, Sycamore Canyon Apartments, and Irvine Technology Center. Bardeen Partners is governed by a Board of Directors consisting of the five members of the District's Board of Directors. Bardeen Partners does not issue separate financial statements.

(b) Basic Financial Statements

The basic financial statements are comprised of the Statement of Net Position, the Statement of Revenues, Expenses and Changes in Net Position, the Statement of Cash Flows, the Statement of Fiduciary Net Position - Fiduciary Fund – Custodial Fund, the Statement of Changes in Fiduciary Net Position - Fiduciary Fund – Custodial Fund, and the Notes to the Basic Financial Statements.

(c) Measurement Focus, Basis of Accounting and Financial Statement Presentation
The District's financial activities are accounted for as an enterprise fund (proprietary fund type). A fund is an accounting entity with a self-balancing set of accounts established to record the financial position and results of operations of a specific governmental activity. The activities of enterprise funds closely resemble those of ongoing businesses in which the purpose is to conserve and add to basic resources while meeting operating expenses from current revenues. Enterprise funds account for operations that provide services on a continuous basis and are substantially financed by revenues derived from user charges.

Fiduciary Fund is used to account for assets held by the District as a custodian for the activities of the San Joaquin Wildlife Sanctuary (SJWS) and are accounted as a custodial fund (fiduciary fund type).

Both the enterprise fund and fiduciary fund utilize the accrual basis of accounting. Revenues are recognized when earned and expenses are recognized as they are incurred. Internal activity has been eliminated in the accompanying basic financial statements.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(1) Summary of Significant Accounting Policies (Continued)

(c) Measurement Focus, Basis of Accounting and Financial Statement Presentation (Continued)

The District distinguishes operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with water and sewer operations. The principal operating revenues of the District are charges to customers for sales and services. Operating expenses include cost of sales and services, general and administrative expenses and depreciation of capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

Capital contributions consist of contributed capital assets, connection fees, grants and other charges that are legally restricted for capital expenditures by state law or by the Board action that established those charges.

Net position of the District is classified into two components: (1) net investment in capital assets and (2) restricted net position. These classifications are defined as follows:

Net Investment in capital assets – This component of net position consists of capital assets, net of accumulated depreciation reduced by the outstanding balances of notes or borrowing(s) that are attributable to the acquisition of the asset, construction, or improvement of those assets. If there are significant unspent related debt proceeds at year-end, the portion of the debt attributable to the unspent proceeds are not included in the calculation of net investment in capital assets.

Restricted net position – This component of net position consists of constraints placed on net position use through external constraints imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments or constraints imposed by law through constitutional provisions or enabling legislation.

When both restricted and unrestricted resources are available for use, the District uses unrestricted resources first, and then restricted resources as they are needed. For capital expenditures, legally available restricted bond proceeds are used first, then other restricted resources, and then unrestricted resources are used if needed.

(d) **Property Taxes**

The District is authorized under the Act to levy taxes on all taxable property (lands only) within its boundaries for the purposes of paying certain of its debt obligations, subject to certain limitations in the Act, the Revenue and Taxation Code and the California Constitution. The District also receives a portion of the County's 1% ad valorem property taxes from certain lands within its boundaries. Property tax revenue is recognized in the fiscal year in which the taxes are levied. The property tax calendar is as follows:

Lien date: January 1 Levy date: July 1

Due date: First installment – November 1

Second installment – February 1 First installment – December 10

Delinquent date: First installment – December 1 Second installment – April 10

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(1) Summary of Significant Accounting Policies (Continued)

(d) **Property Taxes (Continued)**

The assessment, levy and collection of property taxes are the responsibility of the County of Orange, and are remitted to the District periodically.

(e) Cash and Cash Equivalents

For the purposes of the statement of cash flows, cash equivalents are defined as short-term, highly liquid investments that are both readily convertible to known amounts of cash or so near to their maturity that they present insignificant risk of changes in value because of changes in interest rates, and have an original maturity date of 3 months or less.

(f) District Investments

Investments are reported in the accompanying Statement of Net Position at fair value, except for certain investment contracts that are reported at cost because they are not transferable and they have terms not affected by changes in market interest rates.

Changes in fair value that occur during the fiscal year are recognized as increase (decrease) in fair value of investments reported for that fiscal year. Interest income includes interest earnings on the District's investments.

(g) Pension Benefits Trust Investments

Investments of the Pension Benefits Trust are reported in the accompanying Statement of Net Position at fair value.

Changes in fair value that occur during the fiscal year are recognized as increase (decrease) in fair value of investments reported for that fiscal year. Interest income is recorded on the accrual basis. Dividends are recorded on the payment date.

(h) Real Estate Investments

Real estate investments consist of a wholly-owned apartment complex and four commercial office properties. The District is also a party to a real estate limited partnership in which the District has more than a 50% ownership interest but does not exercise control. All real estate investments are reported at fair value. Changes in fair value that occur during the fiscal year are recognized as increase (decrease) in fair value of real estate investments reported for that fiscal year.

(i) Fair Value Measurements

Certain assets and liabilities are required to be reported at fair value. The fair value framework provides a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value.

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of fair value hierarchy are described as follows:

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(1) Summary of Significant Accounting Policies (Continued)

(i) Fair Value Measurements (Continued)

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly and fair value is determined through the use of models or other valuation methodologies including:

- Quoted prices for similar assets or liabilities in active markets
- Quoted prices for identical or similar assets or liabilities in markets that are inactive
- Inputs other than quoted prices that are observable for the asset or liability
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement. These unobservable inputs reflect the District's own assumptions about the inputs market participants would use in pricing the asset or liability (including assumptions about risk). These unobservable inputs are developed based on the best information available in the circumstances and may include the District's own data.

(j) Inventory and Prepaid Items

Water inventory related to water stored in its banking facilities in Kern County is stated at its purchase cost or at a rate equivalent to what the District would charge for storage. The District's warehouse materials and supplies are valued using the average cost method. Inventory is recorded when purchased, and expensed at the time the inventory is consumed. Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items.

(k) Capital Assets and Depreciation

Capital assets are valued at cost where historical records are available and at an estimated historical cost where no historical records exist. Donated assets are valued at their estimated acquisition value on the date received. The District capitalizes all assets with a historical cost of at least \$10,000 and a useful life of at least three years. The cost of normal maintenance and repairs that do not add to the value of the assets or materially extend asset lives are not capitalized. Depreciation is computed utilizing the straight-line method over the following estimated useful lives:

Buildings and Structures 3 to 100 years Transmissions and Distributions 10 to 75 years Machinery and Equipment 3 to 50 years

(1) Compensated Absences

The District's policy permits employees to accumulate earned but unused vacation and sick leave benefits up to certain limits. Earned vacations pay to a maximum of 400 hours (or more with written approval of the General Manager). Sick leave hours accrue at the rate of one day per month and employees may elect to receive cash for accumulated sick leave for up to 96 hours in excess of the first 80 hours accumulated. Fifty percent of accumulated sick leave up to a maximum of 960 hours may be paid upon termination of employment. All accumulated vacation and vested sick leave pay is recorded as expense at the time the benefit is earned.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(1) Summary of Significant Accounting Policies (Continued)

(m) **Pensions**

For purposes of measuring the net pension liability, deferred outflows and inflows of resources relating to pensions and pension expense, information about the fiduciary net position of the District's California Public Employees' Retirement System (CalPERS) plan (Plan) and additions to/deductions from the Plan's fiduciary net position have been determined on the same basis as they are reported by CalPERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

GASB requires that the reported results must pertain to liability and asset information within certain defined timeframes. For this report, the following timeframes are used:

Valuation Date (VD) June 30, 2020 Measurement Date (MD) June 30, 2021

Measurement Period (MP) July 1, 2020 to June 30, 2021

(n) Other Post-Employment Benefits (OPEB)

The OPEB liability, deferred outflows and inflows of resources relating to OPEB and OPEB expense have been determined by an independent actuary. Benefit payments are recognized when currently due and payable in accordance with the benefit terms.

GASB requires that the reported results pertain to liability and asset information within certain defined timeframes. For this report, the following timeframes are used:

Valuation Date (VD) June 30, 2020 Measurement Date (MD) June 30, 2021

Measurement Period (MP) July 1, 2020 to June 30, 2021

(o) Deferred Outflows/Inflows of Resources

In addition to assets, the Statement of Net Position reports a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net assets that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The deferred amounts related to refunding charges, accumulated decreases in fair value of swap agreements, employer contributions subsequent to measurement date for pension and OPEB, and actuarial amounts related to pension and OPEB.

In addition to liabilities, the Statement of Net Position reports a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net assets that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The deferred amounts related to actuarial amounts related to pension and OPEB and leases.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(1) Summary of Significant Accounting Policies (Continued)

(p) Leases

Lessee: The District is a lessee for the noncancellable leases of production well sites. The District recognizes a lease liability and an intangible right-to-use the lease asset (lease asset) in the basic financial statements. The District recognizes lease liabilities with an initial, individual value of \$10,000 or more and a useful life of at least three years.

At the commencement of a lease, the District initially measures the lease liability at the present value of payments expected to be made during the lease term. Subsequently, the lease liability is reduced by the principal portion of lease payments made. The lease asset is initially measured as the initial amount of the lease liability, adjusted for lease payments made at or before the lease commencement date, plus certain initial direct costs. Subsequently, the lease asset is amortized on a straight-line basis over the shorter of the lease term or the useful life of the underlying asset, unless the lease contains a purchase option that the District has determined is reasonably certain to be exercised. In those situations, the lease is amortized over the useful life of the underlying asset.

Key estimates and judgements related to leases include how the District determines (1) the discount rate it uses to discount the expected lease payments at present value, (2) lease term, and (3) lease payments.

- The District uses the interest rate charged by the lessor as the discount rate. When the interest rate charged by the lessor is not provided, the District generally uses its estimated incremental borrowing rate as the discount rate for leases.
- The lease term includes the noncancellable period of the lease. Lease payments included in the measurement of the lease liability are composed of fixed payments and purchase option price that the District is reasonably certain to exercise.

The District monitors changes in circumstances that would require a remeasurement of its lease and will remeasure the lease asset and liability if certain changes occur that are expected to significantly affect the amount of the lease liability.

Lease assets are reported with other capital assets and lease liabilities are reported with long-term liabilities on the Statement of Net Position.

Lessor: The District is a lessor for the noncancellable leases of land properties. The District recognizes a lease receivable and a deferred inflow of resources in the basic financial statements.

At the commencement of a lease, the District initially measures the lease receivable at the present value of payments expected to be received during the lease term. Subsequently, the lease receivable is reduced by the principal portion of lease payments received. The deferred inflow of resources is initially measured as the initial amount of the lease receivable is adjusted for lease payments received at or before the lease commencement date. Subsequently, the deferred inflow of resources is recognized as revenue over the life of the lease term.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(1) Summary of Significant Accounting Policies (Continued)

(p) Leases (Continued)

Key estimates and judgements include how the District determines (1) the discount rate it uses to discount the expected lease receipts to present value, (2) lease term, and (3) lease receipts.

- The District uses its estimated incremental borrowing rate as the discount rate for leases.
- The lease term includes the noncancellable period of the lease. Lease receipts included in the measurement of the lease receivable are composed of fixed payments from the lessee.

The District monitors changes in circumstances that would require a re-measurement of its lease, and will remeasure the lease receivable and deferred inflows of resources if certain changes occur that are expected to significantly affect the amount of the lease receivable.

(q) Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

(r) Comparative Financial Statements and Reclassifications

The information included in the accompanying financial statements for the prior year has been presented for comparison purposes only and does not represent a complete presentation in accordance with generally accepted accounting principles. Certain amounts presented in the prior year financial statements have been reclassified in order to be consistent with the current year's presentation.

(2) Cash and Investments

Cash and investments as of June 30, 2022 are classified in the accompanying financial statements as follows (in thousands):

Statement of Net Position:

| Statement of feet I ostion. | |
|------------------------------------|------------|
| District Cash and Investments | \$ 401,056 |
| Pension Benefits Trust Investments | 94,828 |
| Total Cash and Investments | 495,884 |
| Fiduciary Fund - Custodial Fund: | |
| Cash and Investments | 933 |
| Total Cash and Investments | \$ 496,817 |

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(2) Cash and Investments (Continued)

Cash and investments as of June 30, 2022 consist of the following (in thousands):

| District Cash and Investments: | |
|--|---------------|
| Cash on hand | \$ 3 |
| Deposits with financial institutions | 2,713 |
| Investments | 398,340 |
| Total District Cash and Investments | 401,056 |
| Pension Benefits Trust Cash and Investments: | |
| Equities - mutual funds | 74,332 |
| Fixed income bonds - mutual funds | 20,459 |
| Money market - mutual funds | 37 |
| Total Pension Benefits Trust Cash and Investments | 94,828 |
| Fiduciary Fund - Custodial Fund: | |
| Deposits with financial institutions | 933 |
| Total Cash and Investments | \$ 496,817 |

The following table identifies the investment types that are authorized for the District by the California Government Code, the California Water Code, and the District's investment policy, whichever is most restrictive. The table also identifies certain provisions that address interest rate risk and concentration of credit risk.

| Authorized Investment Type | Maximum Maturity ⁽¹⁾ | Maximum Percentage of Portfolio | Maximum Investment in One Issuer |
|-------------------------------------|------------------------------------|---------------------------------------|--|
| Local Agency Bonds | 5 years | None | None |

Pension Benefits Trust (The Trust) Authorized Investment Strategy

The District recognizes that defined benefit plans and the related future pension obligations pose significant issues for many government agencies. The District has taken a proactive approach to address the issue and in 2013, established a Pension Benefits Trust (The Trust) to substantially fund its CalPERS unfunded liability. The Trust's investment policy authorizes investment of Trust assets in financial instruments in three broad categories: equity, fixed income, and real estate. These financial instruments can include, but are not limited to, corporate bonds, commercial paper, U.S. government securities, common and preferred stock, real estate investment trusts, and mutual funds. Investments may include derivatives, options and futures as portfolio protection strategies. The following is a summary of the Trust's investment policy.

The Trust is governed by a Retirement Board (the Board) which consists of two IRWD Board members and the General Manager. The Board designates one or more investment advisors to manage the assets under their supervision subject to the laws of the State of California and Investment Guidelines established by the Board. The long-term asset allocation policy including the minimum-maximum asset allocation range for each asset class is as follows:

| Asset Classes | Minimum | Maximum |
|---|---------|---------|
| Cash | 0% | 30% |
| Public Equity- Domestic & International | 30% | 80% |
| Private Equity | 0% | 5% |
| Fixed Income | 10% | 40% |
| Real Estate | 0% | 10% |

The asset allocation policy will be pursued by the Trust on a long-term basis and may be revised if necessary due to market conditions. The Board will monitor the current asset allocation against the long-term allocation policy and rebalance as it deems necessary.

Cash equivalent reserves shall consist of cash instruments having a quality rating of A-1, P-1 or higher, as established by Moody's or Standard & Poor's. Bankers' acceptances, certificates of deposit and savings accounts must be made of United States banks or financial institutions or United States branches of foreign banks, which are federally insured with unrestricted capital of at least \$50 million. Short-term corporate obligations must be rated A or better by Moody's or by Standard & Poor's.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(2) Cash and Investments (Continued)

Pension Benefits Trust Authorized Investment Strategy (Continued)

Equity investments are restricted to high quality, readily marketable securities of corporations that are actively traded on a major exchange. Not more than 5% of the total stock portfolio valued at fair value may be invested in the common stock of any one corporation. Ownership of the shares of one company shall not exceed 2% of those outstanding. Not more than 25% of stock valued at fair value may be held in any one industry category. The overall non-U.S. equity allocation should include a diverse global mix of at least 10 countries. The emerging markets exposure as defined by Morgan Stanley Capital International Inc. should be limited to 35% of the non-U.S. portion of the portfolio.

Fixed income securities of any one issuer shall not exceed 5% of the total bond portfolio, at time of purchase. The 5% limitation does not apply to issues of the U.S. Treasury or other Federal Agencies. The overall rating of the fixed income assets shall be at least "A", according to one of the three rating agencies (Fitch, Moody's or Standard & Poor's). In cases where the yield spread adequately compensates for additional risk, securities where two of the three rating agencies (Fitch, Moody's or Standard & Poor's) have assigned ratings of Baa3 or BBB- ratings, can be purchased up to a maximum of 20% of total fair value of fixed income securities.

Custodial Credit Risk

Custodial credit risk for *deposits* is the risk that, in the event of the failure of a depository financial institution, a government will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial credit risk for *investments* is the risk that, in the event of the failure of the counterparty (e.g., broker-dealer) to a transaction, a government will not be able to recover the value of its investment or collateral securities that are in the possession of another party. The California Government Code requires that a financial institution secure deposits made by state or local governmental units by pledging securities in an undivided collateral pool held by a depository regulated under state law (unless so waived by the governmental unit). The fair value of the pledged securities in the collateral pool must equal at least 110% of the total amount deposited by the public agencies. California law also allows financial institutions to secure public agency deposits by pledging first trust deed mortgage notes having a value of 150% of the secured public deposits.

(2) Cash and Investments (Continued)

Disclosures Relating to Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates. One of the ways that the District manages its exposure to interest rate risk is by purchasing a combination of shorter term and longer term investments and by timing cash flows from maturities so that a portion of the portfolio is maturing or coming near to maturity as necessary to provide the cash flow and liquidity needed for District operations.

Information about the sensitivity of the fair values of the District's and Pension Benefits Trust's investments to market interest rate fluctuations is provided by the following table that shows the distribution of the investments by maturity (in thousands):

| | | Remaining Maturity | | | | | | | |
|-------------------------------------|------------|--------------------|------------|-----------|------------|--|--|--|--|
| | | 12 Months | 13 to 36 | 37 Months | Not | | | | |
| Investment Type | Amount | Or Less | Months | Or More | Applicable | | | | |
| Federal Agency Securities | \$ 39,661 | \$ 29,840 | \$ 9,821 | \$ - | \$ - | | | | |
| US Treasury Note | 315,245 | 227,560 | 87,685 | - | - | | | | |
| Local Agency Investment Fund | 43,434 | 43,434 | - | - | - | | | | |
| Total District Investments | 398,340 | 300,834 | 97,506 | - | | | | | |
| Mutual Funds - Equities | 74,332 | - | - | - | 74,332 | | | | |
| Mutual Funds - Fixed Income Bonds | 20,459 | 229 | 6,542 | 13,688 | - | | | | |
| Mutual Funds - Money Market | 37 | 37 | - | - | | | | | |
| Total Pension Benefits Trust | | | | | | | | | |
| Investments | 94,828 | 266 | 6,542 | 13,688 | 74,332 | | | | |
| Total | \$ 493,168 | \$ 301,100 | \$ 104,048 | \$ 13,688 | \$ 74,332 | | | | |

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(2) Cash and Investments (Continued)

Disclosures Relating to Credit Risk

Generally, credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization. Presented below is the actual rating as of year-end for each investment type (in thousands):

District Cash and Investments:

| | | | Not |
|------------------------------|------------|------------|-----------|
| Investment Type | Amount | AAA | Rated |
| Federal Agency Securities | \$ 39,661 | \$ 29,683 | \$ 9,978 |
| US Treasury Note | 315,245 | 315,245 | - |
| Local Agency Investment Fund | 43,434 | - | 43,434 |
| Total | \$ 398,340 | \$ 344,928 | \$ 53,412 |

Pension Benefits Trust Investments:

| Investment Type | 4 | _ | |
|-----------------------------------|----|--------|-----|
| Mutual Funds - Equities | \$ | 74,332 | (1) |
| Mutual Funds - Fixed Income Bonds | | 20,459 | (2) |
| Mutual Funds - Money Market | | 37 | (3) |
| Total | \$ | 94,828 | _ |

⁽¹⁾ Equity Mutual Funds as of 6/30/2022 include five "index funds" and are each comprised of diversified portfolios of equity securities. Credit ratings are not provided for Equity Mutual Funds.

The District is a voluntary participant in the Local Agency Investment Fund (LAIF) that is regulated by the California Government Code under the oversight of the Treasurer of the State of California. The fair value of the District's investment in this pool is reported in the accompanying financial statements at amounts based upon the District's pro-rata share of the fair value provided by LAIF for the entire LAIF portfolio (in relation to the amortized cost of that portfolio). The balance available for withdrawal is based on the accounting records maintained by LAIF, which are recorded on an amortized cost basis.

⁽²⁾ Fixed Income Mutual Funds are comprised of three diversified portfolios of fixed income securities. As of 6/30/2022, 62.59% of the holdings were rated A-AAA, 36.05% of the holdings were rated B-BBB, and 1.37% of the holdings were rated below B or Not Rated.

⁽³⁾ The Money Market Mutual Fund is not rated.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

<u>(2)</u> **Cash and Investments (Continued)**

Concentration of Credit Risk

The investment policy of the District contains no limitations on the amount that can be invested in any one issuer beyond that stipulated by the California Government Code. Investments in any one issuer (other than U.S. Treasury securities, mutual funds, and external investment pools) that represent 5% or more of total District investments are as follows (in thousands):

| Issuer | Investment Type | Amount |
|--------|-------------------------|-----------|
| FHLB | Federal Agency Security | \$ 24,801 |
| | Total | \$ 24,801 |

Disclosures Relating to Fair Value Measurements

The District categorizes its fair value investments within the fair value hierarchy established by generally accepted accounting principles. The District has the following fair value measurements as of June 30, 2022 (in thousands):

District Cash and Investments:

| | | | _ | Fair Value Measurements | | | | |
|------------------------------|----|---------|-----|-------------------------|---------|---------|--------|--|
| Investment Type | | Amount | | | Level 1 | Level 2 | | |
| Federal Agency Securities | \$ | 39,661 | | \$ | - | \$ | 39,661 | |
| US Treasury Note | | 315,245 | | | 315,245 | | - | |
| Local Agency Investment Fund | | 43,434 | (1) | | - | | - | |
| Total | \$ | 398,340 | | \$ | 315,245 | \$ | 39,661 | |

Pension Benefits Trust Cash and Investments:

| | | | Fa | ir Value | | |
|--|----|--------|-----|-----------|--|--|
| | | | Mea | surements | | |
| Investment Type | | Amount | I | Level 1 | | |
| Mutual Funds - Equities | \$ | 74,332 | \$ | 74,332 | | |
| Mutual Funds - Fixed Income Bonds | | 20,459 | | 20,459 | | |
| Mutual Funds - Money Market | | 37 (| 1) | - | | |
| Total | \$ | 94,828 | \$ | 94,791 | | |
| (1) These are not subject to the fair value measurements classification. | | | | | | |

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(<u>3</u>) Interest Rate Swap Agreements

In September 2003, the District's Board of Directors approved a policy regarding the use of interest rate swap transactions. The policy provides that interest rate swap transactions will be designed to enhance the relationship between risk and return with respect to an investment or a program of investments entered into by the District; and/or to reduce the amount or duration of payment, rate, spread, or similar risk; and/or result in a lower cost of borrowing when used in combination with bonds or other indebtedness of the District. Pursuant to the policy, the Board of Directors may authorize general parameters for interest rate swap transactions while the Finance and Personnel Committee would structure any specific transactions within the Board-authorized parameters. The Treasurer, with the concurrence of the Chairman of the Finance and Personnel Committee, is authorized to enter into interest rate swap transactions that are within all authorized parameters.

The International Swaps and Derivatives Association, Inc. (ISDA) Master Agreement, including the schedule and credit support annex, is used as the form of contract with interest rate swap counterparties. The District is compliant with all Dodd-Frank Protocol provisions regarding swap advisor representation and transparency.

The outstanding interest rate swaps are pay-fixed, receive variable swaps ("fixed payer swaps"). As of June 30, 2022, the notional amount and fair value balance of the District's interest rate swaps are \$60.0 million and \$(10.3) million, respectively. For the year ended June 30, 2022, the increase in fair value of the fixed payer interest rate swaps was \$10.0 million.

The fair value of the swap agreements at June 30, 2022 is calculated using a zero-coupon method (Level 2 inputs). This method calculates the future net settlement payments required by the swaps, assuming, for the LIBOR fixed payer swaps, that the current LIBOR forward rates implied by the LIBOR yield curves correctly anticipate future LIBOR spot interest rates. These payments are discounted using the spot rates implied by the current yield curves for hypothetical zero-coupon bonds due on the date of each future net settlement of the swaps.

The District's fixed payer swaps were executed in 2004 and became effective in 2007. The purpose of the fixed payer swaps was to hedge a portion of the interest rate risk exposure associated with the District's 100% variable rate debt structure at the time the swaps were executed. The interest rate swap notional amounts and maturities are not specifically related to a particular District debt issue, however are considered a hedge of a pooled portion of the District's variable rate debt exposure.

The following table displays the objective and terms of the District's interest rate swaps outstanding at June 30, 2022, along with the credit rating of the associated counterparty.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(3) Interest Rate Swap Agreements (Continued)

Current Year Active Interest Rate Swaps (in thousands):

| Туре | Objective | Notional Amount | Effective Date | Maturity Date | Terms | Counterparty Rating |
|-------|------------------|--------------------|-------------------|------------------|------------|------------------------|
| Fixed | Hedge of | \$30,000 | 3/10/07 | 3/10/29 | Pay | Aa2/A+/AA |
| Payer | changes in cash | | | | 5.687%; | |
| • | flows on pool | | | | receive 1- | |
| | of variable rate | | | | Mo. LIBOR | |
| | debt issues | | | | | |
| Fixed | Hedge of | \$30,000 | 3/10/07 | 3/10/29 | Pay | Aa3/A+/A+ |
| Payer | changes in cash | | | | 5.687%; | |
| • | flows on pool | | | | receive 1- | |
| | of variable rate | | | | Mo. LIBOR | |
| | debt issues | | | | | |

The ISDA agreements for the above referenced interest rate swaps include a provision that the counterparties shall be required to post collateral should the mark-to-market value of the total interest rate swap portfolio with the respective counterparty, including any current outstanding swap accruals, exceed a threshold of \$(15.0) million. The amount of the collateral posted shall be the amount of the mark-to-market value and outstanding swap accrual amounts in excess of \$(15.0) million. As of June 30, 2022, the mark-to-market value of the total interest rate swaps with Citibank N.A. and Bank of America, N.A. as counterparties did not exceed the threshold amount.

Credit risk: The District is exposed to credit risk on interest rate swaps. To minimize its exposure to loss related to credit risk, the District's policy requires that the Finance and Personnel Committee evaluate and approve the counterparty creditworthiness of each counterparty prior to executing an ISDA Agreement, and all current swap agreements include collateral posting provisions. These terms require full collateralization of the fair value of interest rate swaps in asset positions (net of the effect of applicable netting arrangements) should the counterparty's credit rating fall below BBB+ as issued by Fitch Ratings and Standard & Poor's or Baa1 as issued by Moody's Investors Service. Collateral posted is to be in the form of U.S. Treasuries, or other approved securities, held by a third-party custodian.

The District has executed interest rate swap transactions with Bank of America, N.A. and Citibank N.A. Their ratings are Aa2/A+/AA (50% of net exposure to credit risk) and Aa3/A+/A+ (50% of net exposure to credit risk), respectively, as of June 30, 2022.

Interest rate risk: The District is exposed to interest rate risk on its interest rate swaps. On its fixed payer swaps, as the 1-month LIBOR index decreases, the District's net payment on the swap increases. Alternatively, on its fixed payer swaps, as the 1-month LIBOR index increases, the District's net payment on the swap decreases.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(3) Interest Rate Swap Agreements (Continued)

Basis risk: The District is exposed to basis risk on its fixed payer swaps because the variable-rate payments received by the District on these swaps are based on a rate or index other than interest rates the District pays on its variable-rate debt, which is remarketed daily or weekly.

Termination risk: The District or its counterparties may terminate an interest rate swap if the other party fails to perform under the terms of the contract. If at the time of termination, an interest rate swap is in a liability position, the District would be liable to the counterparty for a payment equal to the liability, subject to netting arrangements.

Collateral requirements: The District's interest rate swaps include provisions that require the District to post collateral in the event its credit rating falls below A as issued by Fitch Ratings and Standard & Poor's or A2 as issued by Moody's Investors Service.

The collateral posted is to be in the form of U.S. Treasuries or other approved securities in the amount of the fair value of interest rate swaps in liability positions net of the effect of applicable netting arrangements. If the District does not post collateral, the swaps may be terminated by the counterparty. The District's credit rating is Aa1/AAA/AAA; therefore, no collateral has been posted at June 30, 2022.

(4) Inventories

Inventories consist of available water in storage and materials and supplies in the District's warehouse facilities. As of June 30, 2022, the District had 1,355.9 acre-feet of water stored in the Irvine Lake at a cost of \$1.1 million. In addition, the District had 25,712.7 acre-feet of banked water in various water bank facilities at a cost of \$5.3 million. Inventories at June 30, 2022 consisted of the following (in thousands):

| Water in storage | \$ 6,394 |
|------------------------|----------|
| Materials and supplies | 9,726 |
| Total | \$16,120 |

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(<u>5</u>) Capital Assets

Capital asset activity for the year ended June 30, 2022 is as follows (in thousands):

| | Balance June 30, 2021 Additions | | | | | Deletions | Balance June 30, 2022 | | |
|---------------------------------------|---------------------------------|-------------|----|----------|----|------------|--------------------------|-------------|--|

| Sub-total | | (1,055,866) | | (78,975) | | 1,759 | | (1,133,082) | |
| Total depreciable capital assets, net | | 1,540,143 | | 309,345 | | (26,814) | | 1,822,674 | |
| Capital assets, non-depreciable: | | | | | | | | | |
| Land and water rights | | 126,565 | | 4 | | - | | 126,569 | |
| Construction in progress | | 357,075 | | 102,145 | | (378,685) | | 80,535 | |
| Total capital assets, net | \$ | 2,023,783 | \$ | 411,494 | \$ | (405,499) | \$ | 2,029,778 | |

Total projects transferred from Construction in Progress to Capital Assets and depreciated during the fiscal year ended June 30, 2022 were \$378.7 million. The District's proportionate share of the Orange County Sanitation District's jointly funded capital assets decreased \$17.7 million during the fiscal year ended June 30, 2022.

Certain administrative and general expenses relating to assets under construction are charged to construction-in-progress until the assets are ready for their intended use. The amount of administrative and general expenses capitalized to construction-in-progress for the fiscal year ended June 30, 2022 was \$11.5 million.

(6) Orange County Sanitation District (OC San)

The District, with OC San, negotiated an agreement as of July 1, 1985, which has been amended from time to time. The District agreed to annually fund payment of the District's proportionate share of OC San's joint capital outlay revolving fund (CORF) budget requirements and certain capital improvements, calculated on an annual flow basis using the four highest months of actual flows, during the term of the agreement.

The capital assets associated with this agreement are co-owned by the two agencies and provide an operational benefit to both agencies. During the fiscal year ended June 30, 2022, the District received a credit of \$23.6 million of the equity integration adjustment of OC San's capital assets. In addition, the District's CORF payments to OC San for the fiscal year totaled \$5.6 million.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(6) Orange County Sanitation District (OC San) (Continued)

The District's share of the jointly funded capital assets and CORF in the amount of \$67.7 million is included in capital assets in the District's basic financial statements.

In May 2018, the District and OC San agreed to extend the agreement, providing for treatment and disposal by OC San of District solids and the temporary lease of capacity in OC San's solids treatment and disposal facilities through December 31, 2021. The capacity lease for the fiscal year ended June 30, 2022, estimated at \$0.3 million, is included in Sewer Services as an operating expense.

The accompanying basic financial statements reflect management's best estimate of balances pertaining to this agreement based upon information provided by OC San. Periodically this information is subjected to further review based on the performance of agreed upon procedures when the records for such review have been made available to the District. Adjustments pertaining to the accounting estimates associated with this agreement are recognized as the information for such adjustments becomes available. As of June 30, 2022, the District had a net receivable of \$53.9 million from OC San which is reflected as a due from other agencies in the District's basic financial statements.

(<u>7</u>) Leases Receivable

During the current fiscal year, the District implemented GASB Statement No. 87, Leases. In prior years, the District entered into two agreements that leased the District's property to third parties. These leases are in effect through 2036 and 2041. Payments to the District are based on the terms in each agreement and include certain variable payments not included in the measurement of the lease receivable. During the fiscal year, the District received monthly payments ranging from \$1,500 to \$89,309 and recognized \$0.1 million in lease revenue and \$54,261 in interest revenue related to these leases. As of June 30, 2022, the District's receivable for lease payments was \$2.5 million. Also, the District has a deferred inflow of resources associated with these leases that will be recognized as revenue over the lease terms. As of June 30, 2022, the balance of the deferred inflow of resources was \$2.5 million. The following schedule is the expected future minimum payments under these agreements (in thousands):

| Fiscal Year | Pri | Principal | | terest | Total | |
|-------------|-----|-----------|----|--------|-------|-------|
| 2023 | \$ | 139 | \$ | 57 | \$ | 196 |
| 2024 | | 115 | | 54 | | 169 |
| 2025 | | 119 | | 51 | | 170 |
| 2026 | | 123 | | 49 | | 172 |
| 2027 | | 128 | | 46 | | 174 |
| 2028-2032 | | 708 | | 181 | | 889 |
| 2033-2037 | | 774 | | 93 | | 867 |
| 2038-2041 | | 419 | | 17 | | 436 |
| Total | \$ | 2,525 | \$ | 548 | \$ 3 | 3,073 |

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(8) Real Estate Investments

Real estate investments as of June 30, 2022 consist of the following (in thousands):

| Real estate investments at fair value | \$ 278,570 |
|---------------------------------------|------------|
| Other assets | 1,772 |
| Total | \$ 280,342 |

The District has the following fair value measurements for the real estate investments (Level 3 inputs) (in thousands):

| | Increase / | | | | | | |
|---------------------------------|------------|------------|------|-----------|---------|------------|--|
| | J | Balance | (de | ecrease) | Balance | | |
| | Jun | e 30, 2021 | in F | air Value | Jun | e 30, 2022 | |
| Wood Canyon Villas, L.P. | \$ | 32,259 | \$ | 1,935 | \$ | 34,194 | |
| Sycamore Canyon Apartments | | 170,000 | | 4,250 | | 174,250 | |
| 230 Commerce Office Property | | 12,000 | | 240 | | 12,240 | |
| Waterworks Way Business Park | | 11,600 | | 232 | | 11,832 | |

| Total | \$ | 271,009 | \$ | 7,561 | \$ | 278,570 | |

Net real estate income as of June 30, 2022 is as follows (in thousands):

| Real estate income | \$ 16,361 |
|--|--------------|
| Increase (decrease) in fair value of real estate | |
| investments | 7,561 |
| Real estate expense | (6,605) |
| Net real estate income | \$ 17,317 |

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(8) Real Estate Investments (Continued)

Included in real estate investments are two apartment properties and four commercial office buildings. The District, through Bardeen Partners, Inc., is the sole limited partner in Wood Canyon Villas, L.P. (Wood Canyon), and the sole owner of both Sycamore Canyon Apartments and a commercial office building (230 Commerce). Separate from Bardeen Partners, Inc., the District is the sole owner of three other commercial office buildings (Waterworks Way Business Park, Sand Canyon Professional Center, and Sand Canyon General Office).

The construction of Wood Canyon Villas, a 230-unit apartment property, was completed in 1993. The property is located in Orange County, California, and was 99% occupied at June 30, 2022. The Wood Canyon partnership agreement provides the District with a 9% cumulative preferred return on its unrecovered contribution accounts, as defined in the agreement (\$6.0 million contribution). The property's fair value and the District's partnership interest were based on a fixed growth factor included in the limited partnership agreement.

In 1992, the District acquired a 450-unit apartment property (original cost, \$34.1 million) in Orange County, California known as Sycamore Canyon Apartments. The property was 96% occupied at June 30, 2022. The property's fair value was determined using an appraisal valuation in 2021 and adjusted with a growth factor in 2022.

In 2003, the District completed construction of the 41,000 square foot for-lease 230 Commerce professional office building located in Irvine, California. Land and construction costs for the project totaled \$5.6 million and the building was 93% occupied as of June 30, 2022. The property's fair value was determined using an appraisal valuation in 2021 and adjusted with a growth factor in 2022.

In November 2008, the District completed construction of a 37,200 square foot for-lease R&D office building located in Irvine, California known as the Waterworks Way Business Park. The building was constructed land owned by IRWD adjacent to a District water treatment facility. Land and construction costs for the office project totaled \$9.0 million. As of June 30, 2022, the building was 100% occupied. The property's fair value was determined using an appraisal valuation in 2021 and adjusted with a growth factor in 2022.

In April 2012, the District completed construction of a 16,350 square foot for-lease medical office building located in Irvine, California known as the Sand Canyon Professional Center. Land and construction costs for the project totaled \$8.4 million and the building was 100% occupied as of June 30, 2022. The property's fair value was determined using an appraisal valuation in 2021 and adjusted with a growth factor in 2022.

In August 2020, the District completed construction of a new for-lease 70,000 square foot office building located in Irvine, California known as the Sand Canyon General Office. Land and construction costs for the project totaled \$25.4 million and the building was 100% occupied as of June 30, 2022. The property's fair value was determined using an appraisal valuation in 2021 and adjusted with a growth factor in 2022.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(9) Investment in Joint Venture

The District is a participant with the Rosedale-Rio Bravo Water Storage District (RRB) in a joint venture to design, build and operate a Kern Fan Groundwater Storage Project. Groundwater Banking Joint Powers Authority (GBJPA), a legally separate public agency, was created for that purpose effective July 1, 2020. GBJPA is governed by a four-member board composed of two appointees from the District and two appointees from the RRB. The District and the RRB are each obligated by contract to provide equal funding (50-50) of the costs and are each entitled to one-half of GBJPA's annual operating income or loss, if any. The District's net investment in the joint venture represents its proportionate share of capital and operating expenses of GBJPA. The District's investment in GBJPA was \$6.1 million at June 30, 2022. Complete financial statements for GBJPA can be obtained from GBJPA's office at 849 Allen Road, Bakersfield, CA 93314.

(10) Long-Term Liabilities

Long-term liability activity for the year ended June 30, 2022 is as follows (in thousands):

| | Balance June 30, 2021 | Additions | Deletions | Balance June 30, 2022 | Due within One Year | Due in more than one Year |

⁽²⁾ Available water, sewer, and recycled water revenues.

⁽³⁾ Proceeds from the sale of property.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(<u>10</u>) Long-Term Liabilities (Continued)

General Obligation Bonds (Continued)

The above table incorporates the net receipts/payments of the hedging instruments that are associated with the variable rate debt issue(s). The amounts assume that current interest rates on variable rate bonds and the current reference rates of the hedging instruments will remain the same for their term. As these rates vary, interest payments on variable rate bonds and net receipts/payments on the hedging instruments will vary. Additionally, the above table includes the most recent BABs subsidy reduction of 5.7% under the Congressionally-mandated sequestration which began in FY 2012-13. Refer to Note 3 for additional information regarding the hedging instruments associated with the debt of the District.

Certificates of Participation

In September 2016, the Irvine Ranch Water District Service Corporation issued \$116.7 million of Certificates of Participation Series 2016 (the Series 2016 Certificates) to finance the cost of certain capital improvements and to refund a portion of the outstanding Certificates of Participation Refunding Series 2010 (the Series 2010 Certificates).

The annual debt service requirements for the Certificates of Participation, including principal and interest payments, are as follows (in thousands):

| Fiscal Year | Principal | Interest | Total |
|---------------------------|------------|-----------|------------|
| 2023 | \$ 3,940 | \$ 5,483 | \$ 9,423 |
| 2024 | 4,220 | 5,286 | 9,506 |

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(<u>10</u>) Long-Term Liabilities (Continued)

Notes Payable

The District has one outstanding loan, which was assumed as a result of its consolidation with the Santiago County Water District. The original loan amount was \$1.3 million. The loan is payable semi-annually with interest at 2.32%. The loan matures in July 2025. Amounts required to amortize notes payable at June 30, 2022 are as follows (in thousands):

| Fiscal Year | Pri | Principal | | erest | Total | |
|-------------|-----|-----------|----|-------|-------|-----|
| 2023 | \$ | 76 | \$ | 6 | \$ | 82 |
| 2024 | | 77 | | 4 | | 81 |
| 2025 | | 79 | | 2 | | 81 |
| 2026 | | 41 | | 1 | | 42 |
| Total | \$ | 273 | \$ | 13 | \$ | 286 |

Leases Payable

During the current fiscal year, the District implemented GASB Statement No. 87, Leases. In prior years, the District entered into two agreements as the lessee for the right to use certain property for production wells. An initial lease liability of \$524,259 was recorded at the beginning of the current fiscal year for one of the leases. As of June 30, 2022, the lease liability was \$494,259. The District makes annual principal and interest payments of \$30,000, adjusted periodically based on the terms identified in the lease agreement. The lease term ends on June 30, 2043 and the lease used an implicit interest rate of 2.32%. For the second lease, the annual lease payment for the year ended June 30, 2022 was approximately \$224,000 and the lease term ends on June 30, 2039. No lease liability was recorded for the second lease since the annual lease payments are variable based on a formula. The annual lease payment requirements for the first lease, including principal and interest payments, are as follows (in thousands):

| Fiscal Year | Pri | Principal | | terest | Total | |
|-------------|-----|-----------|----|--------|-------|-----|
| 2023 | \$ | 19 | \$ | 11 | \$ | 30 |
| 2024 | | 19 | | 11 | | 30 |
| 2025 | | 19 | | 11 | | 30 |
| 2026 | | 20 | | 10 | | 30 |
| 2027 | | 20 | | 10 | | 30 |
| 2028-2032 | | 109 | | 41 | | 150 |
| 2033-2037 | | 122 | | 28 | | 150 |
| 2038-2042 | | 137 | | 13 | | 150 |
| 2043 | | 29 | | 1 | | 30 |
| Total | \$ | 494 | \$ | 136 | \$ | 630 |

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(11) Unearned Revenue

Unearned revenue at June 30, 2022 consisted of the following (in thousands):

| Unearned revenue, current portion | \$ 565 |
|--|-------------|
| Unearned revenue, net of current portion | 3,698 |
| Total | \$ 4,263 |

On November 10, 2008, the Board approved the South Orange County – Irvine Ranch Water District Interconnection Projects Participation Agreement (Agreement). The Agreement was effective on November 2008 between the District, City of San Clemente (CSC), Laguna Beach County Water District (LBCWD), Moulton Niguel Water District (MNWD), Santa Margarita Water District (SMWD), South Coast Water District (SCWD), Municipal Water District of Orange County (MWDOC), and Orange County Water District (OCWD). The purpose of the Agreement is to allow the South County water agencies (CSC, LBCWD, MNWD, SMWD, and SCWD) to reserve capacity in the District system and reimburse the District for various new intertie facilities which provide that up to 25 cfs of water supply per month may be made available during a water supply disruption. The total cost of the agreement was paid in full by each party in the fiscal year ended June 30, 2009. The amount of unearned revenue related to the South County Water Agencies is amortized over 20 years, the term of the Agreement. The amount of amortization for the fiscal year ended June 30, 2022 was \$0.5 million.

(12) Letters of Credit

The District has letters of credit securing the payment of principal and interest on certain General Obligation Bonds. The letters of credit are issued in favor of the trustees and enable the trustees to make drawings against the letters of credit for payment of principal and interest amounts.

The terms of the letters of credit, as of June 30, 2022 are summarized as follows (in thousands):

| Letter of Credit | Trustee | Amount | Expiration Date |
|---|--------------------------------------|------------------|----------------------------|
| Bank of America: 2009 Series B Consolidated | U.S. Bank | \$ 50,559 | April 21, 2025 |
| Sumitomo Mitsui: 2008 Series A Refunding | Bank of New York Mellon | 43,636 | May 28, 2025 |
| U.S. Bank: 1993 Consolidated 2009 Series A Consolidated | Bank of New York Mellon U.S. Bank | 23,310 50,559 | May 1, 2025 May 1, 2025 |

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(13) Defined Benefit Pension Plan

Plan Descriptions

All qualified employees are eligible to participate in the District's agent multiple-employer public employee defined benefit pension plan which is administrated by the California Public Employees' Retirement System (CalPERS). CalPERS acts as a common investment and administrative agent for participating public entities within the State of California. Benefit provisions and all other requirements are established by State statute and the District's Board of Directors. CalPERS issues publicly available reports that include a full description of the pension plans regarding benefit provisions, assumptions and membership information that can be found on the CalPERS website at www.calpers.ca.gov.

Benefits Provided

CalPERS provides service retirement and disability benefits, annual cost of living adjustments and death benefits to plan members, who must be public employees and beneficiaries. Benefits are based on years of credited service, equal to one year of full time employment. The Plan's provisions and benefits in effect at June 30, 2022, are summarized as follows:

| | | Hire Date | |
|-----------------------------|--------------------|--------------------------|------------------------|
| | | On or after | |
| | Prior to | October 1, 2012 to | On or after |
| | October 1, 2012 | December 31, 2012 | January 1, 2013 |
| Benefit Formula | 2.5% @ 55 | 2.0% @ 60 | 2.0% @ 62 |
| Benefit Vesting Schedule | 5 Years of Service | 5 Years of Service | 5 Years of Service |
| Benefit Payments | Monthly for Life | Monthly for Life | Monthly for Life |
| Minimum Retirement Age | 50 | 50 | 52 |
| Monthly Benefits, as a % of | 2.0% to 2.5% | 1.092% to 2.418% | 1.0% to 2.5% |
| Eligible Compensation | | | |
| Required Employee | 8.00% | 7.00% | 6.50% |
| Contribution Rate | | | |
| Required Employer Normal | 9.270% | 9.270% | 9.270% |
| Cost Rate | | | |

In addition, the District made a \$6.8 million unfunded liability contribution during the current fiscal year.

Employees Covered

As of June 30, 2020 (valuation date), the following employees were covered by the benefit terms for the Plan:

| Active Employees | 396 |
|--|-----|
| Inactive Employees or Beneficiaries Currently Receiving Benefits | 313 |
| Inactive Employees Entitled to But not Yet Receiving Benefits | 212 |
| Total | 921 |

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(13) Defined Benefit Pension Plan (Continued)

Contributions

Section 20814(c) of the California Public Employees' Retirement Law (PERL) requires that the employer contribution rates for all public employers be determined on an annual basis by the actuary and shall be effective on the July 1 following notice of a change in the rate. The total plan contributions are determined through the CalPERS' annual actuarial valuation process. The actuarially determined rate is the estimated amount necessary to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. The employer is required to contribute the difference between the actuarially determined rate and the contribution rate of employees. Employer contribution rates may change if plan contracts are amended. Payments made by the employer to satisfy contribution requirements that are identified by the pension plan terms as plan member contribution requirements are classified as plan member contributions.

Actuarial Methods and Assumptions Used to Determine Total Pension Liability

As of June 30, 2022, the total pension liability was determined using the following actuarial methods and assumptions:

| Actuarial Cost Method | Entry Age Normal in accordance with the |
|----------------------------------|---|
| | requirements of GASB 68 |
| Actuarial Assumptions: | |
| Discount Rate | 7.15% |
| Inflation | 2.50% |
| Salary Increases | Varies by Entry Age and Service |
| Mortality Rate Table (1) | Derived using CalPERS' Membership Data for all Funds |
| Post Retirement Benefit Increase | The Lesser of Contract COLA up to 2.50% until Purchasing Power Protection Allowance Floor |
| | on Purchasing Power applies, 2.50% thereafter |

⁽¹⁾ The mortality table used was developed based on CalPERS' specific data. The probabilities of mortality are based on 2017 CalPERS Experience Study for the period from 1997 to 2015. Pre-retirement and Post-retirement mortality rates include 15 years of projected mortality improvement using 90% of Scale MP-2016 published by the Society of Actuaries. For more details on this table, please refer to the CalPERS Experience Study and Review of Actuarial Assumptions report from December 2017 that can be found on the CalPERS website.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(13) Defined Benefit Pension Plan (Continued)

Long-term Expected Rate of Return

The long-term expected rate of return on pension plan investments was determined using a building-block method in which expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class.

In determining the long-term expected rate of return, CalPERS took into account both short-term and long-term market return expectations as well as the expected pension fund cash flows.

Using historical returns of all of the funds' asset classes, expected compound (geometric) returns were calculated over the short-term (first 10 years) and the long-term (11+ years) using a building-block approach. Using the expected nominal returns for both short-term and long-term, the present value of benefits was calculated for each fund. The expected rate of return was set by calculating the rounded single equivalent expected return that arrived at the same present value of benefits for cash flows as the one calculated using both short-term and long-term returns. The expected rate of return was then set equal to the single equivalent rate calculated above and adjusted to account for assumed administrative expenses.

The expected real rates of return by asset class are as follows:

| Asset Class (1) | Assumed Asset Allocation | Real Return Years 1 – 10 ⁽²⁾ | Real Return Years 11+ ⁽³⁾ |
|------------------|-----------------------------|--|---|
| Public Equity | 50.0% | 4.80% | 5.98% |
| Fixed Income | 28.0% | 1.00% | 2.62% |
| Inflation Assets | 0.0% | 0.77% | 1.81% |
| Private Equity | 8.0% | 6.30% | 7.23% |
| Real Estates | 13.0% | 3.75% | 4.93% |
| Liquidity | 1.0% | 0.00% | (0.92%) |
| Total | 100% | | |

⁽¹⁾ In the CalPERS' ACFR, Fixed Income is included in Global Debt Securities; Liquidity is included in Short-term Investments; Inflation Assets are included in both Global Equity Securities and Global Debt Securities.

⁽²⁾ An expected inflation of 2.00% used for this period.

⁽³⁾ An expected inflation of 2.92% used for this period.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(<u>13</u>) Defined Benefit Pension Plan (Continued)

Discount Rate

The discount rate used to measure the total pension liability was 7.15 percent. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current member contribution rates and that contributions from employers will be made at statutorily required rates, actuarially determined. Based on those assumptions, the Plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Pension Plan Fiduciary Net Position

The plan fiduciary net position disclosed in the GASB 68 accounting valuation report may differ from the plan assets reported in the funding actuarial valuation report due to several reasons. For example, for the accounting reports, CalPERS must keep items such as deficiency reserves and fiduciary self-insurance included as assets. These amounts are excluded for rate setting purposes in the funding actuarial valuation.

Changes in the Net Pension Liability

The changes in the net pension liability for the Plan were as follows (in thousands):

| | Increase (Decrease) | | | | | |
|--|----------------------------|--------------------------------|-------------------------------|--|--|--|
| | Total Pension Liability | Plan Fiduciary Net Position | Net Pension Liability/(Asset) | | | |
| | (a) | (b) | (c) = (a) - (b) | | | |
| Balance at June 30, 2021 | \$ 306,889 | \$ 232,184 | \$ 74,705 | | | |
| Changes Recognized for the Period: | | | | | | |
| Service Cost | 6,161 | - | 6,161 | | | |
| Interest | 21,815 | - | 21,815 | | | |
| Difference between Expected and | 1,990 | - | 1,990 | | | |
| Actual Experience | | | | | | |
| Contributions – Employer | _ | 9,569 | (9,569) | | | |
| Contributions – Employees | _ | 2,855 | (2,855) | | | |
| Net Investment Income | - | 52,638 | (52,638) | | | |
| Benefit Payments, Including Refunds of | (13,708) | (13,708) | - | | | |
| Employee Contributions | | | | | | |
| Administrative Expense | - | (232) | 232 | | | |
| Net Change | 16,258 | 51,122 | (34,864) | | | |
| Balance at June 30, 2022 | \$ 323,147 | \$ 283,306 | \$ 39,841 | | | |

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(13) Defined Benefit Pension Plan (Continued)

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The following presents the net pension liability of the Plan, calculated using the discount rate of 7.15 percent, as well as what the net pension liability would be if it were calculated using a discount rate that is 1 percentage-point lower (6.15 percent) or 1 percentage-point higher (8.15 percent) than the current rate (in thousands):

| | D | Discount | | Current | | scount |
|------------------------------|----|----------|------|-----------|----|--------|
| | R | ate -1% | Disc | ount Rate | Ra | te +1% |
| | (| 6.15%) | (| 7.15%) | (8 | 3.15%) |
| Plan's Net Pension Liability | \$ | 82,868 | \$ | 39,841 | \$ | 4,195 |

Funding of CalPERS Plan and Pension Benefits Trust

The District recognizes that defined benefit plans and the related future pension obligations pose significant issues for many government agencies. The District has taken a proactive approach to address the issue and in 2013, established a Pension Benefits Trust to substantially fund its CalPERS unfunded liability. The Pension Benefits Trust provides the District with an alternative to CalPERS that allows for investment by a professional fund management team selected and monitored by the District. The Pension Benefits Trust holds the funding contributions for the District pending future remittance to the CalPERS pension trust fund which will pay all retiree benefit payments to employees associated with the plan. Future contributions will be transferred from the Pension Benefits Trust to CalPERS at the District's discretion.

As of June 30, 2022, the total value of the assets in the Pension Benefits Trust was approximately \$94.8 million.

The following schedule shows the District's total pension liability, CalPERS assets, Pension Benefits Trust assets, and the relationship of the total pension liability (in thousands):

| | | | | | | Pension Benefits | Total |
|-------------------|----------------------|-------------------|----------------------|------------------------|-------------------------|-------------------------|--------------------------|
| | | | | | CalPERS Assets | Trust Assets | Pension Assets |
| | Total | | Net Pension | Pension | as a Percentage | as of Percentage | as a Percentage |

| Year (1) 06/30/20 | Liability \$ 291,334 | Assets \$ 222,867 | (Asset) \$ 68,467 | Trust Assets \$ 78,389 | Pension Liability 76.5% | Pension Liability 26.9% | Pension Liability 103.4% |
| | | | | | | | |

⁽¹⁾ As of the measurement date June 30, 2019, 2020, and 2021 respectively.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(13) Defined Benefit Pension Plan (Continued)

Subsequent Events

On July 12, 2021, CalPERS reported a preliminary 21.3% net return on investments for fiscal year 2020-21. Based on the thresholds specified in CalPERS Funding Risk Mitigation policy, the excess return of 14.3% prescribes a reduction in investment volatility that corresponds to a reduction in the discount rate used for funding purposes of 0.20%, from 7.00% to 6.80%. Since CalPERS was in the final stages of the four-year Asset Liability Management (ALM) cycle, the board elected to defer any changes to the asset allocation until the ALM process concluded, and the board could make its final decision on the asset allocation in November 2021.

On November 17, 2021, the CalPERS board adopted a new strategic asset allocation. The new asset allocation along with the new capital market assumptions, economic assumptions and administrative expense assumption support a discount rate of 6.90% (net of investment expense but without a reduction for administrative expense) for financial reporting purposes. This includes a reduction in the price inflation assumption from 2.50% to 2.30% as recommended in the November 2021 CalPERS Experience Study and Review of Actuarial Assumptions. This study also recommended modifications to retirement rates, termination rates, mortality rates and rates of salary increases that were adopted by the board. These new assumptions will be reflected in the GASB 68 accounting valuation reports for the June 30, 2022, measurement date.

Amortization of Deferred Outflows and Deferred Inflows of Resources

Under GASB 68, gains and losses related to changes in total pension liability and fiduciary net position are recognized in pension expense systematically over time.

The first amortized amounts are recognized in pension expense for the year the gain or loss occurs. The remaining amounts are categorized as deferred outflows and deferred inflows of resources related to pensions and are to be recognized in future pension expense.

The amortization period differs depending on the source of the gain or loss:

| Net Difference between Projected and | 5 year straight-line amortization |
|--------------------------------------|--|
| Actual Earnings on Pension Plan | |
| Investments | |
| All Other Amounts | Straight-line amortization over the expected average remaining service lifetime (EARSL) of all members that are provided with benefits (active, inactive, and retired) as of the beginning of the measurement period |

The EARSL for the Plan for the fiscal year ended June 30, 2022 was 4.8 years, which was obtained by dividing the total service years of 4,397 (the sum of remaining service lifetimes of the active employees) by 921(the total number of participants: active, inactive, and retired). Inactive employees and retirees have remaining service lifetimes equal to 0. Total future service is based on the members' probability of decrementing (leaving employment) due to an event other than receiving a cash refund.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(13) Defined Benefit Pension Plan (Continued)

Pension Expense and Deferred Outflows and Deferred Inflows of Resources Related to Pensions

For the fiscal year ended June 30, 2022, the District recognized pension expense of \$3.14 million. At June 30, 2022, the District reported deferred outflows and deferred inflows of resources related to pensions from the following sources (in thousands):

| | Deferred Outflows of Resources | | Deferred Inflows of Resources | | |
|--|--------------------------------------|--------|-------------------------------------|--------|--|
| Pension Contributions made Subsequent to the Measurement Date | \$ | 10,467 | \$ | - | |
| Differences between Expected and Actual Experiences | | 3,419 | | 35 | |
| Changes in Assumptions | | - | | 239 | |
| Net Difference between Projected and Actual Earnings on Pension Plan Investments | | - | | 26,134 | |
| Total | \$ | 13,886 | \$ | 26,408 | |

\$10.5 million reported as deferred outflows of resources related to employer contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the fiscal year ending June 30, 2023. (\$23.0) million net of deferred outflows of resources and deferred inflows of resources related to pensions will be recognized as pension expense as follows (in thousands):

| | Deferred Outflows/ | | | |
|-------------|-----------------------|--|--|--|
| | (Inflows) of | | | |
| Fiscal Year | Resources | | | |
| 2023 | \$ (5,612) | | | |
| 2024 | (4,897) | | | |
| 2025 | (5,587) | | | |
| 2026 | (6,893) | | | |
| Total | \$ (22,989) | | | |

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(<u>14</u>) Other Post-Employment Benefits

Plan Descriptions

The District administers three other post-employment benefits (OPEB) plans which are subject to changes based on the discretion of the Board:

- **PEMHCA:** The District provides an agent multiple-employer defined benefit healthcare plan to retirees through the California Public Employee Retirement System (CalPERS) under the California Public Employees Medical and Hospital Care Act (PEMHCA), commonly referred to as CalPERS Health. Employees are eligible for this lifetime benefit if they retire from the District and are eligible to begin drawing a CalPERS pension. Participation in PEMHCA is financed in part by the District through a contribution of \$149 per month per participating retiree.
- RHCAP: The District also administers a single-employer defined benefit Retiree Health Costs Assistance Program (RHCAP), which provides medical benefits to covered employees and their eligible dependents. The duration of the benefit is based on employees' years of service as follows: 12 months of benefits for employees with 3-7 years of service; 24 months of benefits for employees with 8-9 years of services; 36 months of benefits for employees with 10-14 years of service; 48 months of benefits for employees with at least 20 years of service. Employees are eligible for this benefit if they retire from the District on or after age 55 with at least three years of service. The District reimburses retirees for eligible healthcare costs of up to \$160 per month (for retirees with at least three years of service at the District), to a maximum of \$600 per month after 25 years of service.
- **Death Benefit**: The District administers a single-employer defined benefit Retiree Death Only plan (Death Benefit). Employees hired on or before December 31, 2008 and who retire from the District on or after age 55 with at least 10 years of service at the District are eligible for term life insurance with a face amount equal to 100% of their final annual salary at the time of retirement. Employees hired after December 31, 2008 are not currently eligible for this plan.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(<u>14</u>) Other Post-Employment Benefits (Continued)

Employees Covered

As of the June 30, 2021 measurement date, the following employees were covered by the benefit terms under each Plan:

| | | | Death | |
|---|---------------|-------|---------|-------|
| | PEMHCA | RHCAP | Benefit | Total |
| Inactive Employees or Beneficiaries Currently Receiving Benefits | 114 | 46 | - | 160 |
| Inactive Employees Entitled to But not Yet Receiving Benefits | 89 | - | 135 | 224 |
| Active Employees | 408 | 408 | 123 | 939 |
| Total | 611 | 454 | 258 | 1,323 |

Contributions

The contributions for the District's various other post-employment benefits are based on pay-as-you-go financing requirements.

For the fiscal year ended June 30, 2022, the District's cash contributions were \$0.5 million and estimated implied subsidy was \$0.3 million resulting in total payments of \$0.8 million. The following shows contributions by each OPEB plan (in thousands):

| | | | | | De | eath | | |
|---------------------------|-----|-------------|----|------|----|-------|----|-------|
| | PEN | ИНСА | RE | ICAP | Be | nefit | T | 'otal |
| Cash Contributions | \$ | 203 | \$ | 263 | \$ | 20 | \$ | 486 |
| Estimated Implied Subsidy | | 332 | | - | | - | | 332 |
| Total | \$ | 535 | \$ | 263 | \$ | 20 | \$ | 818 |

Change in Assumptions

For the fiscal year ended June 30, 2021 measurement period, the discount rate was decreased from 2.21 percent to 2.16 percent based on the municipal bond rate.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(<u>14</u>) Other Post-Employment Benefits (Continued)

Discount Rate

The discount rate used to measure the total OPEB liability was 2.16 percent which was based on the Bond Buyer 20-Bond G.O. Index.

Changes in the OPEB Liability

The changes in the OPEB liability were as follows (in thousands):

| | Death | | | | | | |
|---|-------|--------|----|-------|----|----------|--------|
| | PF | EMHCA | F | RHCAP | В | Benefit | Total |
| Balance at June 30, 2021 | \$ | 18,054 | \$ | 3,584 | \$ | 1,731 \$ | 23,369 |
| Changes Recognized for the Period: | | | | | | | |
| Service Cost | | 1,194 | | 225 | | 38 | 1,457 |
| Interest | | 420 | | 81 | | 39 | 540 |
| Changes in Assumptions | | 157 | | 11 | | 6 | 174 |
| Benefit Payments | | (493) | | (288) | | (20) | (801) |
| Net Change | | 1,278 | | 29 | | 63 | 1,370 |
| Balance at June 30, 2022 | \$ | 19,332 | \$ | 3,613 | \$ | 1,794 \$ | 24,739 |

Sensitivity of the OPEB Liability to Changes in the Discount Rate

The following presents the OPEB liability, calculated using a discount rate that is one percentage point lower or one percentage higher than the current rate for the measurement period ended June 30, 2021 (in thousands).

| | Discount | Current | Discount |
|----------------|------------------|----------------------|------------------|
| | Rate - 1% | Discount Rate | Rate + 1% |
| OPEB Liability | (1.16%) | (2.16%) | (3.16%) |
| PEMHCA | \$ 22,930 | \$ 19,332 | \$ 16,501 |
| RHCAP | 3,836 | 3,613 | 3,402 |
| Death Benefit | 1,926 | 1,794 | 1,675 |
| Total | \$ 28,692 | \$ 24,739 | \$ 21,578 |

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(<u>14</u>) Other Post-Employment Benefits (Continued)

Sensitivity of OPEB Liability to Changes in the Healthcare Trend Rates (Continued)

The following presents the OPEB liability, calculated using health care cost trend rates that are one percentage point lower or one percentage higher than the current rate for the measurement period ended June 30, 2021(in thousands).

| | Healthcare Trend | Curent Healthcare | Healthcare Trend |
|----------------|---------------------|----------------------|---------------------|
| OPEB Liability | Rates -1% | Trend Rates | Rates +1% |
| PEMHCA | \$ 15,864 | \$ 19,332 | \$ 23,940 |
| RHCAP | 3,613 | 3,613 | 3,613 |
| Death Benefit | 1,794 | 1,794 | 1,794 |
| Total | \$ 21,271 | \$ 24,739 | \$ 29,347 |

Subsequent Events

There were no subsequent events that would materially affect the results presented in this disclosure.

Amortization of Deferred Outflows and Deferred Inflows of Resources

Gains and losses related to changes in total OPEB liability is recognized in OPEB expense systematically over time.

The first amortized amounts are recognized in OPEB expense for the fiscal year the gain or loss occurs. The remaining amounts are categorized as deferred outflows and deferred inflows of resources related to OPEB and are to be recognized in future OPEB expense.

The amortization period differs depending on the source of the gain or loss. Straight line amortization over the expected average remaining service lifetime (EARSL) of all members that are provided with benefits (active and retired) as of the beginning of the measurement period is used for each Plan.

OPEB Expense and Deferred Outflows and Deferred Inflows of Resources Related to **OPEB**

For the fiscal year ended June 30, 2022, the District recognized OPEB expense of \$2.6 million which consisted of \$2.2 million for PEMHCA, \$0.4 million for RHCAP and \$0.03 million for Death Benefit.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(<u>14</u>) Other Post-Employment Benefits (Continued)

OPEB Expense and Deferred Outflows and Deferred Inflows of Resources Related to OPEB (Continued)

At June 30, 2022, the District reported deferred outflows and deferred inflows of resources related to OPEB from the following sources (in thousands):

| | | Defer | re d | Outflo | ws of | Reso | arce | es | | De fe | rre d | Inflow | vs of | Resou | rces | |
|---------------------------|----|-------|------|-------------|-------|--------|------|-------|-----|-------------|-------|--------|-------|-------|------|------|
| | | | | | Do | e ath | | | | | | | De | e ath | | |
| | PE | MHCA | RH | ICAP | Be | ne fit | - | Γotal | PEN | ИНСА | RH | CAP | Be | nefit | T | otal |

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(<u>15</u>) **Deferred Compensation Plans**

Retirement for Part Time Employees

The District provides pension benefits for all of its part-time employees through a defined contribution plan, in lieu of providing social security benefits. In a defined contribution plan, benefits depend solely on amounts contributed to the plan plus investment earnings. The plan is administered as part of the District's Section 457 plan. All part-time and seasonal employees are eligible to participate from the date of employment. For the year ended June 30, 2022, the District's payroll covered by the plan was \$107,009. The District made no employer contributions. Employees contributed \$8,111 for the fiscal year ended June 30, 2022.

Deferred Compensation

All regular, full-time District employees are eligible to participate in the District's deferred compensation program pursuant to Section 457 of the Internal Revenue Code (Plan) whereby they can voluntarily contribute a portion of their earnings into a tax-deferred fund administered by the District and invested through a third party provider. Pursuant to the Economic Growth and Tax Relief Reconciliation Act of 2001 (EGTRRA), effective January 1, 2002, employees may contribute the lesser of 100% of includible compensation or the maximum dollar amount allowable under Internal Revenue Code Section 457 in effect for the year. The dollar amount currently in effect for calendar year 2022 is \$20,500.

Effective January 1, 2008, for employees with one year or more of services, the District provides 100% matching up to an annual maximum of 3% of the employee's base salary after one year of service. Such employer contribution amounts are deposited into a money purchase plan pursuant to Section 401(a) of the Internal Revenue Code. All full-time employees who have completed two years of regular, full-time service with the District, are eligible for an additional District contribution. Beginning with the first month following an employee's second anniversary date, the District will deposit to the employee's 401 (a) Plan account on a per-pay period basis an amount equal to 1% of the employee's base salary. During the fiscal year ended June 30, 2022, the District contributed \$1.4 million to employee accounts under the 401(a) plan.

The assets in both plans are held in trust for the exclusive benefit of the participants and their beneficiaries, and are therefore not reported in the basic financial statements of the District.

(16) Risk Management

The District is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions, and natural disasters for which the District carries commercial insurance.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

(<u>16</u>) Risk Management (Continued)

Property, Boiler and Machinery insurance is provided by the Public Risk Innovation, Solutions, and Management (PRISM) formerly the California State Association of Counties Excess Insurance Authority (CSAC-EIA). Property insurance includes flood insurance for all properties, and earthquake insurance for the District's real estate investment properties. General and excess liability coverage and workers compensation insurance are provided through participation in the PRISM program. Pollution and legal liability coverage for the Irvine Desalter Project is provided by a policy with Ironshore Holdings, a Liberty Mutual Company.

Liabilities are reported when it is probable that a loss has occurred and the amount of the loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported (IBNRs). The result of the process to estimate the claims liability is not an exact amount as it depends on many complex factors, such as inflation, changes in legal doctrines, and damage awards. Accordingly, claims are reevaluated periodically to consider the effects of inflation, recent claim settlement trends (including frequency and amount of payouts), and other economic and social factors. The estimate of the claims liability also includes amounts for incremental claim adjustment expenses related to specific claims and other claim adjustment expenses regardless of whether allocated to specific claims. Estimated recoveries, for example from salvage or subrogation, are another component of the claims liability estimate. Excess coverage insurance policies cover individual general liability claims in excess of \$100,000, property claims in excess of \$25,000 and workers compensation claims in excess of \$125,000.

Changes in the reported liability resulted from the following (in thousands):

(<u>17</u>) Commitments and Contingencies

Legal Actions

The District is a defendant in various legal actions arising out of the conduct of the District's operations. Management believes that, based on current knowledge, the outcome of these matters will not have a material adverse effect on the District's financial position.

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2022 (Continued)

⁽¹⁾ During Fiscal Year 2017-18, as a result of Governmental Accounting Standards Board Statement (GASB) No. 75, Accounting and Financial Reporting for Post-employment Benefit Plans Other than Pensions (GASB 75), CalPERS reported its proportionate share of activity related to postemployment benefits for participation in the State of California's agent OPEB plan. Accordingly, CalPERS recorded a one-time expense as a result of the adoption of GASB 75.

⁽²⁾ Includes any beginning of year adjustment.

(a) Schedule of Changes in the Net Pension Liability and Related Ratio (in thousands) (Continued)

Notes to Schedule of Changes in the Net Pension Liability and Related Ratio

Benefit Changes: The figures above include any liability impact that may have resulted from voluntary benefit changes that occurred on or before the Measurement Date. However, offers of Two Years Additional Service Credit (a.k.a. Golden Handshakes) that occurred after the Valuation Date are not included in the figures above, unless the liability impact is deemed to be material by the plan actuary.

Changes of Assumptions: None in 2019 to 2021. In 2018, demographic assumptions and inflation rate were changed in accordance to the CalPERS Experience Study and Review of Actuarial Assumptions December 2017. There were no changes in the discount rate. In 2017, the discount rate reduced from 7.65 percent to 7.15 percent. In 2016, there were no changes. In 2015, amounts reported reflect an adjustment of the discount rate from 7.5 percent (net of administrative expense) to 7.65 percent (without a reduction for pension plan administration expense.) In 2014, amounts reported were based on the 7.5 percent discount rate.

⁽¹⁾ Historical information is required only for measurement periods from which GASB 68 is applicable. Fiscal Year 2015 was the first year of GASB 68 implementation.

⁽²⁾ Employers are assumed to make contributions equal to the actuarially determined contributions. However, some employers may choose to make additional contributions towards their unfunded liability. Employer contributions for such plans exceed the actuarially determined contributions.

(1) Defined Benefit Pension Plan – California Public Employees' Retirement System (Continued)

(b) Schedule of Contributions (in thousands) (Continued)

Notes to Schedule of Contributions

The actuarial methods and assumptions used to set the actuarially determined contributions for the fiscal year ended June 30, 2022 were from the June 30, 2019 public agency valuations.

| Actuarial Cost Method | Entry Age Normal |
|----------------------------|--|
| Amortization Method/Period | Level Percent of Payroll |
| Asset Valuation Method | Fair Value of Assets |
| Inflation | 2.50% |
| Salary Increases | Varies by Entry Age and Service |
| | |
| Payroll Growth | 2.75% |
| Investment Rate of Return | 7.00% Net of Pension Plan Investment and Administrative |
| | Expenses; includes Inflation |
| Retirement Age | The probabilities of Retirement are based on the 2017 |
| | CalPERS Experience Study for the period from 1997 to |
| | 2015. |
| Mortality | The probabilities of mortality are based on the 2017 |
| | CalPERS Experience Study for the period from 1997 to |
| | 2015. Pre-retirement and Post-retirement mortality rates |
| | include 15 years of projected on-going mortality |
| | improvement using 90% of Scale MP 2016 published by |
| | the Society of Actuaries. |

Changes in Assumptions: On December 21, 2016, the CalPERS Board of Administration lowered the discount rate from 7.50 percent to 7.00 percent using a three-year phase-in beginning with the June 30, 2016 actuarial valuations. The minimum employer contributions for Fiscal Year 2021-22 were calculated using a discount rate of 7.00 percent.

Subsequent Event: The CalPERS Board of Administration has adopted a new amortization policy effective with the June 30, 2019 actuarial valuation. The new policy shortens the period over which actuarial gains and losses are amortized from 30 years to 20 years with the payments computed using a level dollar amount. In addition, the new policy removes the 5-year ramp-up and ramp-down on Unfunded Accrued Liability (UAL) bases attributable to assumption changes and non-investment gains/losses. The new policy removes the 5-year ramp-down on investment gains/losses. These changes will apply only to new UAL bases established on or after June 30, 2019.

Statistical Section

Irvine Ranch Water District Fiscal Year Ended June 30, 2022

This section of the Irvine Ranch Water District's Annual Comprehensive Financial Report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the District's overall financial health.

<u>Financial Trends Schedules</u> – These schedules contain trend information to help the reader understand how the District's financial performance and well-being have changed over time.

Net Position Changes in Net Position

<u>Revenue Capacity Schedules</u> – These schedules contain information to help the reader assess the factors affecting the District's ability to generate its property and sales taxes.

Water Sold by Type of Customer Water Rates Largest Water Customers Sewer Rates Largest Sewer Customers Ad Valorem Property Tax Rates

<u>Debt Capacity Schedules</u> – These schedules present information to help the reader assess the affordability of the District's current levels of outstanding debt and the District's ability to issue additional debt in the future.

Assessed Valuation and Estimated Actual Value of Taxable Property and 1% Property Tax Revenue Direct and Overlapping Property Tax Rates
Principal Property Taxpayers
Property Tax Collections/Delinquency
Outstanding Debt by Type
Outstanding General Obligation Bonds by Improvement District
Ratio of General Obligation Debt to Assessed Values
Ratio of Annual Debt Service Expenditures to Total General Expenditures
Debt Service Coverage

<u>Demographic and Economic Information</u> – These schedules offer demographic and economic indicators to help the reader understand the environment within which the District's financial activities take place and to help make comparisons over time and with other governments.

Principal Employers Demographic and Economic Statistics

Operating Information – These schedules contain information about the District's operations and resources to help the reader understand how the District's financial information relates to the services the District provides and the activities it performs.

Operating Indicators by Function – Water and Sewer Service Connections
Operating Indicators by Function – New Service Connections
Operating Indicators by Function – Average Monthly Usage
Source of Supply and Demand in Acre Feet
Capital Asset Statistics
Full-Time Employees

Source: Irvine Ranch Water District

Note:

⁽¹⁾ The water charge to the typical residential customer is based upon an average of 12 ccf per month. The first 5 ccf are at the District's low volume rate, which is \$0.53 less than the commodity base rate in FY 2021. The fixed monthly service charge includes components to add enhancement and replacement funds to assist with the District's aging infrastructure.

⁽²⁾ Rates increased effective February 1, 2022.

Source: Orange County Auditor-Controller and Orange County Tax Collector.

In 1978, the voters of the State of California passed Proposition 13 which limited property taxes to a total maximum rate of 1% based upon the assessed value of the property being taxed. Each year, the assessed value of property may be increased by an "inflation factor' (limited to a maximum increase of 2%). With few exceptions, property is only reassessed at the time that it is sold to a new owner. At that point, the new assessed value is reassessed at the purchase price of the property sold.

Source: County of Orange Tax Ledger

⁽¹⁾ The estimated levy for one percent revenue is generated internally and it is based on prior year receipts and developer growth projections.

⁽²⁾ The estimated levy for G.O. tax receipts is based on the county's assessed value projection multiplied by the tax rate assessed within each improvement district.

⁽³⁾ The General Obligation column for Collected tax receipts includes an unbudgeted utility tax revenue from improvement districts 190/290 that adds approximately \$400K per year.

⁽¹⁾ The additional demands are met with runoff capture and imported water.

⁽²⁾ Extremely dry conditions led to a considerable increase in demands.

⁽³⁾ State mandated reduction in usage resulted in a significant decrease in overall demand.

⁽⁴⁾ Significant rainfall resulted in a decrease in overall demand.

⁽¹⁾ Miles of Line include laterals.

⁽²⁾ Total number of tanks excludes IRWD's storage capacity with East Orange County Water District. However, this capacity is accounted for in the maximum storage capacity estimate (467 AF). This number also includes the two 16-MG tanks at the Baker location and the newly constructed 4.3 MG Zone 1 Tank at the existing Zone 1 tank location.

⁽³⁾ Excludes Serrano Water District's capacity in Irvine Lake, which equals 25% of total capacity.

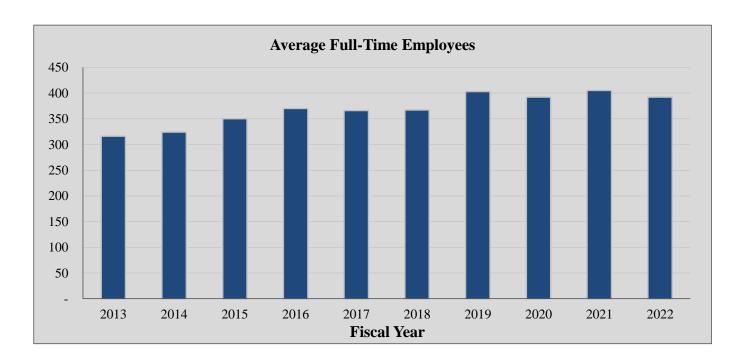

⁽⁴⁾ Accounts for active production wells only (Excludes SGU Injection Well).

 $^{^{(5)}}$ Excludes lift stations serving individual IRWD facilities.

REQUIRED AUDIT COMMUNICATIONS

Board of Directors Irvine Ranch Water District Irvine, California

We have audited the financial statements of Irvine Ranch Water District (the District) as of and for the year ended June 30, 2022, and have issued our report thereon dated November 30, 2022. Professional standards require that we advise you of the following matters relating to our audit.

Our Responsibility in Relation to the Financial Statement Audit

As communicated in our engagement letter dated March 4, 2022, our responsibility, as described by professional standards, is to form and express an opinion(s) about whether the financial statements that have been prepared by management with your oversight are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America. Our audit of the financial statements does not relieve you or management of your respective responsibilities.

Our responsibility, as prescribed by professional standards, is to plan and perform our audit to obtain reasonable, rather than absolute, assurance about whether the financial statements are free of material misstatement. An audit of financial statements includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control over financial reporting. Accordingly, as part of our audit, we considered the internal control of the District solely for the purpose of determining our audit procedures and not to provide any assurance concerning such internal control.

We are also responsible for communicating significant matters related to the audit that are, in our professional judgment, relevant to your responsibilities in overseeing the financial reporting process. However, we are not required to design procedures for the purpose of identifying other matters to communicate to you.

Planned Scope and Timing of the Audit

We conducted our audit consistent with the planned scope and timing we previously communicated to you in our letter dated August 29, 2022.

Compliance with All Ethics Requirements Regarding Independence

The engagement team, others in our firm, and our firm have complied with all relevant ethical requirements regarding independence.

We identified self-review threats to independence as a result of non-attest services provided. Those non-attest services included recording journal entries detected during the audit process. To mitigate the risk, management has compared the draft financial

statements and footnotes to the underlying accounting records to verify accuracy and has reviewed a disclosure checklist to ensure footnotes are complete and accurate.

Significant Risks Identified

We have identified the following significant risks:

- Implementation of the new lease accounting standard. We reviewed the District's inventory of leases and selected a sample of lease agreements to test the calculations of the lease transactions. We ensured the District's lease disclosure footnotes were accurate and complete in accordance with the new standard.
- Risk of unrecorded receivable or payables related to transactions with Orange County Sanitation District (OC San): We compared the information in the reports to the transactions in the District's records to ensure significant amounts were reconciled. We evaluated the need to record additional receivables or payables based on transactions that have occurred after the date of the most recent agreed upon procedures report.
- Risk of errors associated with real estate investments. We evaluated the District's categorizations of fair values in the financial statement footnotes for reasonableness. We reviewed appraisals and other documentation supporting the fair value of the District's Real Estate Investments.

Qualitative Aspects of the Entity's Significant Accounting Practices

Significant Accounting Policies

Management has the responsibility to select and use appropriate accounting policies. A summary of the significant accounting policies adopted by the District is included in Note 1 to the financial statements. As described in Notes 7 and 10 to the financial statements, the District changed accounting policies related to leases by adopting Statement of Governmental Accounting Standards (GASB Statement) No. 87, Leases, in the fiscal year 2022. No matters have come to our attention that would require us, under professional standards, to inform you about (1) the methods used to account for significant unusual transactions and (2) the effect of significant accounting policies in controversial or emerging areas for which there is a lack of authoritative guidance or consensus.

Significant Accounting Estimates

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's current judgments. Those judgments are normally based on knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ markedly from management's current judgments.

The most sensitive accounting estimates affecting the financial statements include:

- Judgments concerning which capital project expenditures should be capitalized and depreciated versus expensed in the financial statements and judgments concerning which projects should be placed in service.
- Judgements regarding the fair value of real estate investments.
- Judgments regarding the fair value of interest rate swap agreements.

- Judgements involving the calculation of the net pension liability and related transactions
- Judgements involving the calculation of the other post-employment benefit (OPEB) liability and related transactions.

We evaluated the key factors and assumptions used to develop the estimates and determined that it is reasonable in relation to the basic financial statements taken as a whole and in relation to the applicable opinion units.

Financial Statement Disclosures

Certain financial statement disclosures involve significant judgment and are particularly sensitive because of their significance to financial statement users. The most sensitive disclosures affecting the financial statements were:

- The disclosure of investment fair value in note 2 to the financial statements
- The disclosure of interest rate swap agreements in note 3 to the financial statements
- The disclosure of pensions in note 13 to the financial statements
- The disclosure of OPEB in note 14 to the financial statements.

The financial statement disclosures are neutral, consistent, and clear.

Significant Unusual Transactions

For purposes of this communication, professional standards require us to communicate to you significant unusual transactions identified during our audit. There were no unusual transactions noted as a result of our audit procedures.

Significant Difficulties Encountered during the Audit

We encountered no significant difficulties in dealing with management relating to the performance of the audit.

Uncorrected and Corrected Misstatements

For purposes of this communication, professional standards also require us to accumulate all known and likely misstatements identified during the audit, other than those that we believe are trivial, and communicate them to the appropriate level of management. Further, professional standards require us to also communicate the effect of uncorrected misstatements related to prior periods on the relevant classes of transactions, account balances or disclosures, and the financial statements as a whole and each applicable opinion unit. Uncorrected misstatements or matters underlying those uncorrected misstatements could potentially cause future-period financial statements to be materially misstated, even though the uncorrected misstatements are immaterial to the financial statements currently under audit. There was one uncorrected misstatement detected during the audit process to record unbilled customer accounts receivable for service that occurred in June and subsequently billed until after the end of the fiscal year.

In addition, professional standards require us to communicate to you all material, corrected misstatements that were brought to the attention of management as a result of our audit procedures. There were no material misstatements noted as a result of our audit procedures.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a matter, whether or not resolved to our satisfaction, concerning a financial accounting, reporting, or auditing matter, which could be significant to the District's financial statements or the auditor's report. No such disagreements arose during the course of the audit.

Representations Requested from Management

We have requested certain written representations from management in a letter dated November 30, 2022.

Management's Consultations with Other Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters. Management informed us that, and to our knowledge, there were no consultations with other accountants regarding auditing and accounting matters.

Other Significant Matters, Findings, or Issues

In the normal course of our professional association with the District, we generally discuss a variety of matters, including the application of accounting principles and auditing standards, significant events or transactions that occurred during the year, operating and regulatory conditions affecting the entity, and operational plans and strategies that may affect the risks of material misstatement. None of the matters discussed resulted in a condition to our retention as the District's auditors.

Other Information Included in the Annual Comprehensive Financial Report

Pursuant to professional standards, our responsibility as auditors for other information, whether financial or nonfinancial, included in the District's annual report, does not extend beyond the information identified in the audit report, and we are not required to perform any procedures to corroborate such other information. However, in accordance with such standards, we have read the information and considered whether such information, or the manner of its presentation, was materially inconsistent with its presentation in the financial statements.

Our responsibility also includes communicating to you any information which we believe is a material misstatement of fact. Nothing came to our attention that caused us to believe that such information, or its manner of presentation, is materially inconsistent with the information, or manner of its presentation, appearing in the financial statements.

This report is intended solely for the information and use of the Board of Directors and management of the District and is not intended to be and should not be used by anyone other than these specified parties.

Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance With Government Auditing Standards

Independent Auditor's Report

Finance Personnel Committee Irvine Ranch Water District Irvine, California

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States the financial statements of Irvine Ranch Water District (the "District") as of and for the year ended June 30, 2022, and the related notes to the financial statements, which collectively comprise the District's basic financial statements, and have issued our report thereon dated November 30, 2022.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the District's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we do not express an opinion on the effectiveness of the District's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the District's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

Davis Far LLP

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

CONSENT CALENDAR

2022 GENERAL DISTRICT ELECTION RESULTS

SUMMARY:

At the November 8, 2022 General District Election, held in accordance with the procedures set forth in Section 35175 et seq of the Water Code, under Division 3 Doug Reinhart was reelected to a four-year term of office ending December 4, 2026 (as provided in Exhibit A). Additionally, Steve LaMar and Peer Swan were unopposed on their candidate filings and have been appointed by the County in lieu of election to a four-year term of office ending December 4, 2026 (as provided in Exhibit B) under Divisions 2 and 5 respectively. The election results along with the Certificate of Appointment in lieu of election have been certified by the County Registrar of Voters and a resolution (as provided in Exhibit C) is submitted for the Board's action, declaring the election results as well as appointments by resolution.

Exhibit "C"

RESOLUTION NO. 2022-19

RESOLUTION OF THE BOARD OF DIRECTORS OF IRVINE RANCH WATER DISTRICT DECLARING RESULTS OF NOVEMBER 8, 2022 GENERAL DISTRICT ELECTION

On November 8, 2022, the Irvine Ranch Water District held its 2022 General District Election in accordance with the procedures set forth in Section 35175 et seq. of the Water Code for the purpose of electing three persons to three offices of Director of the Irvine Ranch Water District.

The Registrar of Voters has delivered a Certified Statement of Votes Cast to the General Manager of this District based upon the canvass of all votes cast at the General District Election held November 8, 2028, which statement shows that Doug Reinhart was elected Director for Division 3, and due to being unopposed in their elections, incumbent candidates Steve LaMar and Peer Swan were appointed as Directors in Divisions 2 and 5 respectively, in lieu of election.

The Board of Directors of Irvine Ranch Water District therefore resolves as follows:

<u>Section 1.</u> That the Registrar of Voters' Statement of Votes Cast for the Irvine Ranch Water District General District Election held November 8, 2022 be received and filed.

<u>Section 2.</u> That the Board declares that the following Directors have been elected or appointed for a term of office extending until the November 2026 General District Election and the qualification of their respective successors:

- Division 2: Steve LaMar
- Division 3: Doug Reinhart
- Division 5: Peer A. Swan.

ADOPTED SIGNED and APPROVED this 12th day of December 2022.

AUTHORIZATION FOR PURCHASING BACKHOE LOADERS

SUMMARY:

IRWD's two existing two backhoes were purchased in 1998 and have been used extensively since that time. With over 7,000 operating hours of use, staff recommends that the Board authorize the General Manager to execute a contract with Coastline Equipment Company in the amount of \$309,858 to replace these two backhoe loaders.

BACKGROUND:

IRWD utilizes backhoes for many purposes, including excavation of dirt and removal of asphalt. The backhoes are important to maintain high productivity and jobsite safety. IRWD's two existing backhoes, purchased in 1998, have been used extensively, accumulating over 7,000 operating hours. Both units require replacement due to equipment age, condition, emissions compliance, frequency of maintenance, and limited availability of replacement parts.

Coastline Equipment Company has provided a proposal, provided as Exhibit "A", to supply two new backhoes for an amount of \$309,858. Coastline is a member of the Sourcewell Cooperative Purchasing Agreement and meets IRWD's requirements for competitive bidding.

FISCAL IMPACTS:

Funds for this purchase are included in the Fiscal Year 2022-23 Operating Budget.

ENVIRONMENTAL COMPLIANCE:

This item is not a project as defined in the California Environmental Quality Act (CEQA), Code of Regulations, Title 14, Chapter 3, Section 15378.

COMMITTEE STATUS:

This item was not reviewed by a Committee.

RECOMMENDATION:

THAT THE BOARD AUTHORIZE THE GENERAL MANAGER TO EXECUTE A CONTRACT WITH COASTLINE EQUIPMENT COMPANY IN THE AMOUNT OF \$309,858 FOR THE PURCHASE OF TWO BACKHOE LOADERS.

IRWD GENERAL COUNSEL CONTRACT FOR 2023

SUMMARY:

IRWD's General Counsel provides legal services related to municipal law, transactional and non-complex issues, rate-setting, and other routine general counsel matters. Since 2020, IRWD has contracted with Hanson Bridgett for general counsel services; its current contract expires on December 31, 2022. Staff recommends that the Board authorize the General Manager to execute a Professional Services Agreement with Hanson Bridgett for general counsel legal services with a term of January 1, 2023, to December 31, 2023, for a not-to-exceed amount of \$1,155,000.

BACKGROUND:

IRWD has a team approach for legal services, dividing legal responsibilities among several law firms. The approach utilizes a General Counsel who provides legal services related to municipal law, transactional and non-complex issues, rate-setting, and other routine legal matters. The General Counsel also coordinates with IRWD's other legal counsel. IRWD's non-General Counsel legal firms provide services related to complex issues, complex litigation, and legal matters related to water resources and policy issues. Staff provides legal services management and legal service continuity, along with other duties.

In March 2018, the Board selected Lewis Brisbois & Smith LLP to provide general counsel services to the District, and named Claire Hervey Collins, who was with the firm at that time, to serve in the role of General Counsel for IRWD. On January 1, 2020, Ms. Collins transitioned her employment to the firm of Hanson Bridgett. Upon receiving notice that Ms. Collins was transitioning to Hanson Bridgett, the Board on December 11, 2019, appointed Hanson Bridgett to provide general counsel services to IRWD. It also renamed Ms. Collins to serve in the role of General Counsel for IRWD effective January 1, 2020.

Claire Hervey Collins continues to serve in the role of General Counsel for IRWD. As General Counsel, Ms. Collins, and on occasion other members of the Hanson Bridgett firm, provides general counsel legal services for IRWD focused on municipal law, transactional and noncomplex issues, and rate-setting. While Ms. Collins provides the majority of the legal services required by IRWD, Mr. Paul Beck assists Ms. Collins, serving as an Assistant General Counsel for IRWD to assist with the legal workload and to ensure continuity of service should Ms. Collins become unavailable.

Proposed Contract with Hanson Bridgett LLP:

The number of billable hours estimated for this 12-month period includes the estimated amount of time required to represent, advise, and counsel IRWD regarding matters related to municipal law, transactional and non-complex issues and rate-setting, and the estimated amount of time

No. 10 IRWD General Counsel Contract

Consent Calendar: 2023 General Counsel Contract

December 12, 2022

Page 2

required to coordinate with the District's other legal counsel. The total not-to-exceed value of the contract is proposed at \$1,155,000 – which is 10 percent higher than the 2022 contract. The proposed not-to-exceed value is based on the hourly rates listed below:

| | 2022 Rate | 2023 Rate |
|-----------------------------|-----------|-----------|
| Partners | \$410 | \$455 |
| Counsel / Senior Counsel | \$375 | \$415 |
| Associate / Other Attorneys | \$335 | \$390 |
| Practice Support Analyst | \$270 | \$275 |
| Paralegal / Law Clerk | \$190 | \$225 |

Staff recommends that the Board authorize the General Manager to enter into a Professional Services Agreement with Hanson Bridgett. The proposed contract term would run from January 1, 2023, until December 31, 2023.

FISCAL IMPACTS:

The total not-to-exceed amount for the contract is \$1,155,000. Services associated with this contract will be charged to the Fiscal Year 2022-2023 and Fiscal Year 2023-2024 Operating Budgets, as appropriate. Legal services related to capital projects will be billed to the capital budgets, as appropriate.

ENVIRONMENTAL COMPLIANCE:

Not applicable.

COMMITTEE STATUS:

This item was not reviewed by a Committee.

RECOMMENDATION:

THAT THE BOARD AUTHORIZE THE GENERAL MANAGER TO EXECUTE A PROFESSIONAL SERVICES AGREEMENT WITH HANSON BRIDGETT LLP FOR GENERAL COUNSEL LEGAL SERVICES FOCUSED ON MUNICIPAL LAW, TRANSACTIONAL AND NON-COMPLEX ISSUES, AND RATE-SETTING WITH A TERM OF JANUARY 1, 2023, TO DECEMBER 31, 2023, AND A NOT-TO-EXCEED VALUE OF \$1,155,000.

LIST OF EXHIBITS:

EXHIBIT "A"

HANSON BRIDGETT LLP SUMMARY OF THE SCOPE OF WORK AND PROPOSED HOURLY RATES

Summary of Scope of Work:

Hanson Bridgett LLP will provide general counsel legal services and representation to IRWD and its subsidiaries, and other affiliates. The firm will perform the work, duties, and responsibilities consistent with the position of general counsel for IRWD and its subsidiaries and other affiliates understanding that the firm's roles as general counsel will be to:

- 1. Provide expert legal advice to IRWD and its subsidiaries and other affiliates;
- 2. Independently represent IRWD and its subsidiaries and other affiliates in a variety of matters and forums; and
- 3. Develop and implement proactive legal strategies to position IRWD and its subsidiaries and other affiliates to best meet its legal, regulatory, and policy objectives.

The scope of the general counsel services provided by Hanson Bridgett to IRWD will consist of a broad range of legal services including regulatory and public policy tracking, interpretation, advice, counsel, legal representation and other services with respect to a variety of legal areas such as:

A. TYPICAL AREAS OF MUNICIPAL LAW, INCLUDING:

- 1. Agenda and Agenda Item Review;
- 2. Basic CEQA and Other Environmental Document Review;
- 3. Brown Act and Open Meeting Compliance;
- 4. Claims Processing;
- 5. Collections:
- 6. Cortese-Knox-Hertzberg Local Government Reorganization Act;
- 7. Election Procedures and Challenges;
- 8. Fair Political Practices Commission Regulations and Political Reform Act;
- 9. Joint Powers Authorities;
- 10. Non-complex Litigation;
- 11. Ordinance, Rule and Regulation Creation and Adoption;
- 12. Public Contracting and Prevailing Wage;
- 13. Public Records Act;
- 14. Public Works Bidding;
- 15. Real Property;
- 16. Records Retention and Destruction;
- 17. Review of Contracts and Other Legal Documents; and
- 18. Tort Claims.

HANSON BRIDGETT LLP SUMMARY OF THE SCOPE OF WORK AND PROPOSED HOURLY RATES (continued)

B. LAWS AND REGULATIONS GOVERNING CALIFORNIA WATER DISTRICTS, INCLUDING:

- 1. California Government Code;
- 2. California Health and Safety Code;
- 3. California Water Code;
- 4. California Water District Code;

TURTLE ROCK ZONE 3 RESERVOIR CHLORAMINE BOOSTER STATION BUDGET INCREASE AND CONSTRUCTION AWARD

SUMMARY:

The Turtle Rock Zone 3 Reservoir Chloramine Booster Station project will construct a chlorine and ammonia dosing facility and a reservoir mixing system to improve water quality and prevent nitrification in the reservoir. Staff recommends that the Board:

- Authorize the General Manager to execute a construction contract with Pacific Hydrotech Corporation in the amount of \$2,881,680 for the Turtle Rock Zone 3 Reservoir Chloramine Booster Station project; and
- Authorize a budget increase in the amount of \$2,308,000, from \$1,705,000 to \$4,013,000.

BACKGROUND:

This project will install a chloramine booster station at the Turtle Rock Zone 3 Reservoir and Zone 3 to 4 Pump Station site to improve water quality and reduce nitrification events by maintaining proper chlorine residual and mixing in the reservoir. Construction of these improvements will replace the existing in-pipe chloramine injection facility at the Turtle Rock Zone 1 to 3 Pump Station that has had operational issues due to chemical precipitation in the injection line. The scope of work for this project includes a new chloramine booster station building with chemical storage and dosing facilities, reservoir mixing system, and miscellaneous site improvements. A map of Turtle Rock Zone 3 Reservoir is shown in Exhibit "A".

In April 2021, Lee & Ro was retained to design the new facilities and site improvements. The new chemical building will be constructed within District property, adjacent to the Turtle Rock Zone 3 to 4 Pump Station, and the site improvements include modifying the existing block wall to incorporate the new building, widening the driveway, and replacing the existing chain link access gate with a new ornamental steel gate to provide better access for chemical deliveries and to improve the aesthetics of the facility. A new stairway will also be constructed to allow staff to access the reservoir roof from the Chloramine Booster Station building. The existing concrete access road to the reservoir will be widened and realigned to improve maintenance access.

Staff coordinated extensively with the Turtle Rock Crest Homeowners Association (HOA) throughout the design process to ensure that the new building roof and block wall will match the existing pump station wall and the aesthetics of the community. A new ornamental steel security fence will also be added on the reservoir access road to address the HOA's concerns about trespassers possibly using the road to access the City of Irvine's open space beyond the existing HOA fence.

No. 11 TR Zone 3 Res Chloramine Booster Sta

Action Calendar: Turtle Rock Zone 3 Reservoir Chloramine Booster Station Budget Increase

and Construction Award December 12, 2022

Page 2

Construction Award:

After completion of the design in October 2022, the project was advertised for construction bids in November 2022 to a select list of 21 mechanical contractors. The bid opening was held December 1, 2022, with bids received from Pacific Hydrotech Corporation, RC Foster, Orion Construction, and GSE Construction Corporation, Inc. Pacific Hydrotech Corporation is the apparent low bidder with a bid amount of \$2,881,680 which was below the Engineers estimate of \$3,920,000. Pacific Hydrotech Corporation's bid information is attatched as Exhibit "B", and a summary of the four bids received is provided below:

| Bidder | Bid Amount |
|--------------------------------|-------------|
| Pacific Hydrotech Corporation | \$2,881,680 |
| RC Foster Corporation | \$3,199,600 |
| Orion Construction | \$3,287,000 |
| GSE Construction Company, Inc. | \$3,340,900 |
| Engineer's Estimate | \$3,920,000 |

Staff reviewed Pacific Hydrotech Corporation's bid and has determined that it is responsive. Staff recommends that the Board authorize the General Manager to award a construction contract to Pacific Hydrotech Corporation in the amount of \$2,881,680.

Material Sole Source:

Certain materials are routinely sole sourced on IRWD projects in order to match other products in use on a particular public improvement or in order to obtain a necessary item that is only available from one source. While most sole sourced items are individually under \$35,000 and only require a single bid per the District's procurement policy, there are occasionally items that are of higher value. On this project, the following higher value items were sole-sourced:

- Submersible mixers sourced to Pax Water Technologies with an estimated value of \$141,570, and
- Aqueous Ammonia System sourced to Superior Water Technologies with an estimated value of \$91,000.

FISCAL IMPACTS:

The Turtle Rock Zone 3 Reservoir Chloramine Booster Station, Project 11840, is included in the FY 2022-23 Capital Budget and is funded through the standard split pattern for potable water. A budget increase is required to fund the construction and engineering support services during construction for the project as shown in the table below.

| Project | | Addition | Total |
|---------|----------------|-------------------------|-------------|
| No. | Current Budget | <reduction></reduction> | Budget |
| 11840 | \$1,705,000 | \$2,308,000 | \$4,013,000 |

Action Calendar: Turtle Rock Zone 3 Reservoir Chloramine Booster Station Budget Increase and Construction Award
December 12, 2022
Page 3

ENVIRONMENTAL COMPLIANCE:

This project is subject to the California Environmental Quality Act (CEQA) and in conformance with California Code of Regulations Title 14, Chapter 3, Article 6, a Notice of Intent to adopt a Mitigated Negative Declaration (IS/MND) for the Project was filed with the Orange County Clerk/Recorder on February 28, 2007 and was made available for public review for 30 days. The IS/MND was adopted by IRWD's Board of Directors on April 30, 2007, and a Notice of Determination was filed with the CA State Clearinghouse. Addendum #1 to the Project IS/MND was prepared for changes to the proposed project, and it was approved by IRWD's Board of Directors on May 11, 2015. On May 12, 2015, staff re-filed the Notice of Determination with the Orange County Clerk/Recorder and the CA State Clearinghouse. Addendum #2 to the Project IS/MND was prepared for changes to the proposed project, and it was approved by IRWD's Board of Directors on December 13, 2021. On December 14, 2021, staff re-filed the Notice of Determination with the Orange County Clerk/Recorder and the CA State Clearinghouse.

COMMITTEE STATUS:

Construction awards are not routinely taken to Committee prior to submittal to the Board.

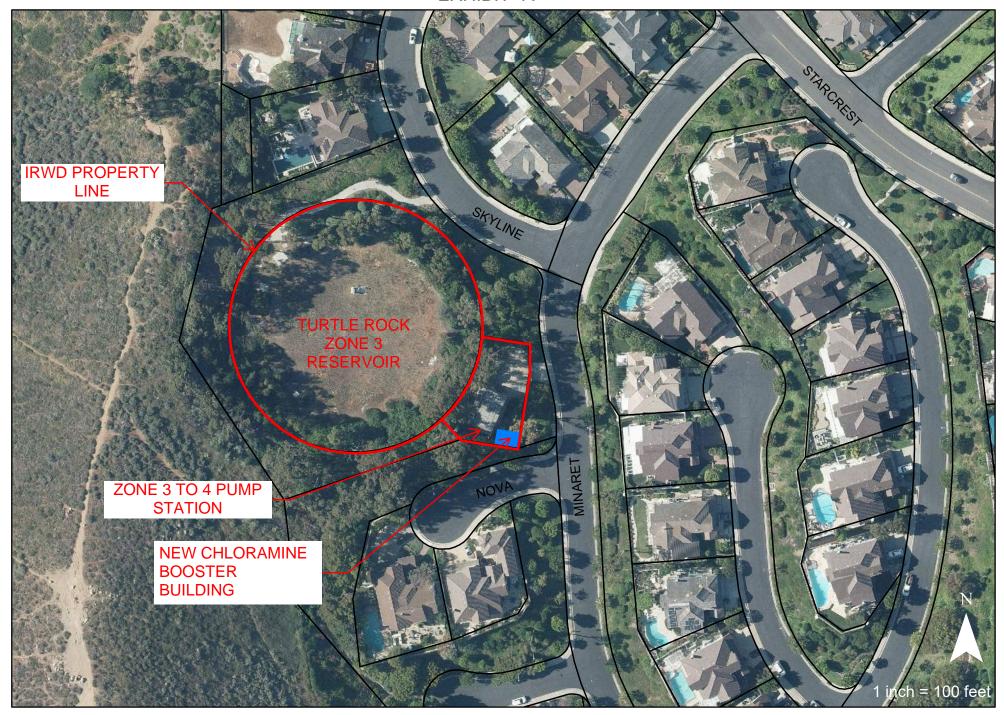

RECOMMENDATION:

THAT THE BOARD AUTHORIZE A BUDGET INCREASE IN THE AMOUNT OF \$2,308,000, FROM \$1,705,000 TO \$4,013,000, AND AUTHORIZE THE GENERAL MANAGER TO EXECUTE A CONSTRUCTION CONTRACT WITH PACIFIC HYDROTECH CORPORATION IN THE AMOUNT OF \$2,881,680 FOR THE TURTLE ROCK ZONE 3 RESERVOIR CHLORAMINE BOOSTER STATION, PROJECT 11840.

ACTION CALENDAR

CONCEPTUAL TERMS FOR SPECIAL ACTIVITIES AGREEMENT WITH THE GROUNDWATER BANKING JOINT POWERS AUTHORITY

SUMMARY:

The Groundwater Banking Joint Powers Authority (GBJPA), a collaboration between the Irvine Ranch Water District and the Rosedale-Rio Bravo Water Storage District, is planning, designing, and preparing to construct the Kern Fan Groundwater Storage Project in concurrent phases. Near-term activities will involve construction of recharge and recovery facilities on properties secured for the project in 2021. The agreement that formed the GBJPA provides for the implementation of Special Activities Agreements approving independent operating projects or programs. Until the full project is operational, a Special Activities Agreement between the GBJPA and its members is needed to ensure that IRWD has access to existing conveyance facilities to utilize its share of the recharge and recovery facilities to be constructed on the secured properties. Staff has prepared conceptual terms for the Special Activities Agreement as presented below. Staff recommends the Board authorize the General Manager to execute an agreement based on these terms.

BACKGROUND:

The Kern Fan Project is being implemented in concurrent phases by the GBJPA of which IRWD and Rosedale-Rio Bravo Water Storage District are members. Near-term project activities include the construction of recharge and recovery facilities on two properties secured for the project in 2021. These properties are the West Enos and Stockdale North sites, previously referred to as the Bolthouse and Diamond Properties. Subsequent phases of the project will involve construction of additional recharge and recovery facilities as well as conveyance features to connect the project to the State Water Project (SWP).

West Enos and Stockdale North Project Facilities:

In 2021, the GBJPA purchased the West Enos and Stockdale North properties. A location map for the proposed West Enos and Stockdale North projects is provided as Exhibit "A". The Stockdale North property is currently being leased back to the sellers until 2024. The design of recharge facilities on the West Enos site is currently at a 60% level and construction of these facilities is expected to begin in summer 2023. The design of recovery facilities on the West Enos site is in progress. The design of facilities on the Stockdale North site will begin in 2023. It is estimated that the West Enos and Stockdale North project sites will have a combined storage capacity of approximately 28,000 acre-feet (AF), a recharge capacity of up to 15,000 AF per year and recovery capacity of 14,480 AF per year. Through the GBJPA, IRWD and Rosedale will share equally in the use of these capacities.

Action Calendar: Conceptual Terms for Special Activities Agreement with the Groundwater

Banking Joint Powers Authority

Page 2

Access to Existing Conveyance Facilities:

The conveyance facilities connecting the Kern Fan Project to the SWP will not be constructed until 2028. Until the conveyance is constructed, water would need to be conveyed to and from the West Enos and Stockdale North sites via Rosedale's Gooselake Channel, Central Intake Pipeline, and Rosedale Intake Canal. A Special Activities Agreement is proposed among the GBJPA and its members to facilitate the use of these existing conveyance facilities.

Terms for Special Activities Agreement:

In April 2020, Rosedale and IRWD executed a Joint Powers Agreement that formed the GBJPA. The agreement allows each party to enter into a Special Activities Agreement with the GBJPA describing and approving an independent operating program or project. Staff has prepared terms for a Special Activities Agreement that would provide IRWD access to capacities in Rosedale's Gooselake Channel, Central Intake Pipeline, and the Rosedale Intake Canal to facilitate IRWD's use of its 50% share of the capacities at the West Enos and Stockdale North sites. The draft terms are included as Exhibit "B".

FISCAL IMPACTS:

The California Water Commission has awarded conditional funding to the Kern Fan Project in the amount of \$89.1 million. Staff has submitted a Feasibility Study to the Bureau of Reclamation for construction of the West Enos and Stockdale North facilities. Reclamation's acceptance of the Feasibility Study is needed to consider a Small Storage Project grant application for up to \$9.8 million. IRWD and Rosedale will fund the remaining cost of the Kern Fan Project. The proposed Special Activities Agreement would require IRWD to pay Rosedale for the use of conveyance facilities to deliver water to and from the West Enos and Stockdale North properties.

ENVIRONMENTAL COMPLIANCE:

An Environmental Impact Report for the Kern Fan Groundwater Storage Project was prepared, certified, and approved in compliance with California Environmental Quality Act (CEQA) of 1970 (as amended), codified at California Public Resources Code Sections 21000 et. seq., and the State CEQA Guidelines in the Code of Regulations, Title 14, Division 6, Chapter 3. The Groundwater Banking Joint Powers Authority, as lead agency, filed a Notice of Determination for the Kern Fan Groundwater Storage Project with the County of Kern. Rosedale, as a responsible agency, filed a Notice of Determination with the County of Kern. IRWD, as a responsible agency, filed Notices of Determination with the County of Orange and with the County of Kern.

COMMITTEE STATUS:

This item was reviewed at the December 6, 2022 Water Supply Reliability Programs Committee meeting.

RECOMMENDATION:

THAT THE BOARD AUTHORIZE THE GENERAL MANAGER TO EXECUTE A SPECIAL ACTIVITIES AGREEMENT WITH THE GROUNDWATER BANKING AUTHORITY JOINT POWERS AUTHORITY AND ROSEDALE-RIO BRAVO WATER STORAGE DISTRICT FOR USE OF THE WEST ENOS AND STOCKDALE NORTH FACILITIES BASED ON THE TERMS PRESENTED, SUBJECT TO NON-SUBSTANTIVE CHANGES.

LIST OF EXHIBITS:

Recovery Facilities on the West Enos and Stockdale North Properties

EXHIBIT "A"

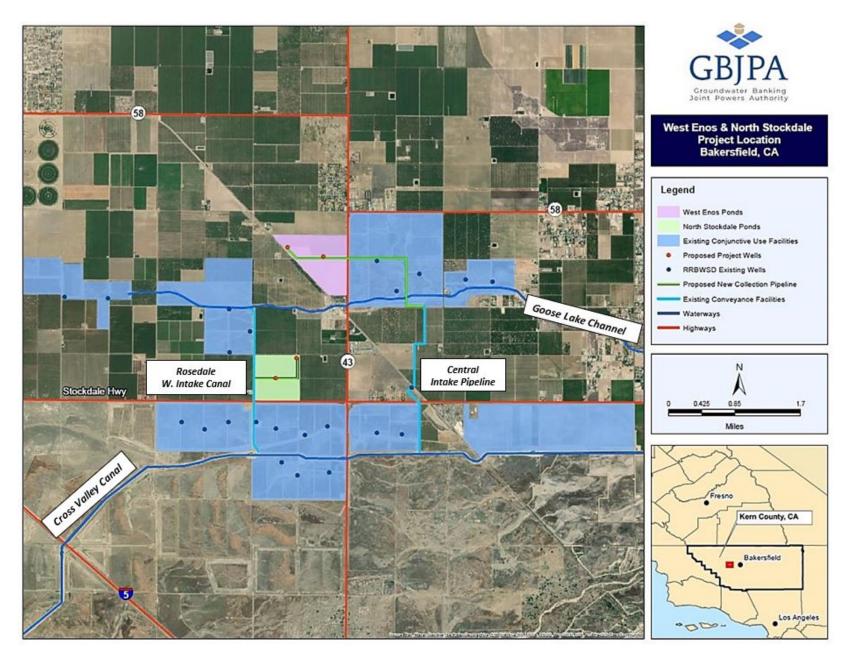

EXHIBIT "B"

Conceptual Terms for Special Activities Agreement for use of Recharge and Recovery Facilities on West Enos and Stockdale North Properties (December 6, 2022)

| Parties | The Irvine Ranch Water District (IRWD), Rosedale-Rio Bravo Water Storage District (Rosedale) and the Groundwater Banking Joint Powers Authority (GBJPA). |
|---|--|
| Description | The GBJPA purchased the West Enos and North Stockdale properties in 2021. The GBJPA is planning and designing recharge and recovery facilities that will be constructed on these properties (Early Project Facilities). Until construction of the Kern Fan Groundwater Storage Project (Kern Fan Project) is complete, a Special Activities Agreement based on the terms presented below will govern the use of the Early Project Facilities. |
| Term | The Special Activities Agreement will provide for the use of the Early Project Facilities until the construction of Kern Fan Project conveyance (480 cfs) and remaining recharge (approximately 1,280 acres) and recovery (12 wells) facilities are complete or as otherwise mutually agreed upon by the Parties. |
| Capacities of Early Project Facilities | The Early Project Facilities are expected to have the following minimum storage, recharge and recovery capacities: • Storage Capacity = 28,000 AF • Recharge Capacity = 15,000 AFY • Recovery Capacity = 14,480 AFY Consistent with the Joint Powers Agreement that formed the GBJPA, IRWD and Rosedale will each have first-priority use of 50 percent of actual capacities and second priority use of capacities not being used by the other Party. |
| Access to Conveyance for Recharge and Recovery of Water | The operations of the Early Project Facilities will rely on the use of the Gooselake Channel, Central Intake Pipeline and the Rosedale Intake Canal (Early Project Conveyances) for the delivery of water for recharge. The recovery of water from the facilities will rely on the use of the Central Intake Pipeline and the Rosedale Intake Canal for reverse flow deliveries to the Cross Valley Canal (CVC). When water is available to both IRWD and Rosedale through independent or joint programs for recharge at the Early Project Facilities, capacities in the Early Project Conveyances will be used by Rosedale to provide delivery of equal amounts of water for recharge at the Early Project Facilities either simultaneously or offset by time consistent with the scheduling requirements below. When both IRWD and Rosedale are recovering water using Early Project Facilities, the Early Project Conveyances (other than the Gooselake Channel) will be used by Rosedale to deliver equal amounts of water to the CVC either simultaneously or offset by time consistent with the scheduling requirements below. |
| Compensation for Access to Conveyance | IRWD will compensate Rosedale for access to the Early Project Conveyances in the amount of \$25 per AF each for both direct recharge operations and for direct recovery operations through the Rosedale Intake Canal. IRWD already |

| | owns capacity in the Central Intake Pipeline that can be used to return water to the CVC. |
|--------------------------------------|--|
| Operating Costs | IRWD will compensate Rosedale for use of CVC capacity consistent with the terms of the Strand Ranch Agreement. Rosedale and IRWD shall pay the GBJPA for operations, maintenance, energy and replacement costs consistent with their respective proportional use of |
| Kern River Flood Water | the Early Project Facilities. Kern River Flood Water shall be recharged at the Early Project Facilities consistent with the GBJPA Joint Powers Authority Agreement. |
| Scheduling of Water | The Parties would coordinate in the scheduling of water for recharge and recovery purposes consistent with the terms of the Strand Ranch Agreement. |
| Losses | Water banking losses will be accounted for in accordance with the Strand Ranch Agreement and related Memorandums of Understanding. |
| Agency Coordination | The Parties will exercise best efforts and due diligence as reasonably required to assist obtaining approval from KCWA, DWR and others for all actions and matters to implement the Special Activities Agreement. |
| No Benefit to State of California | No deliveries of water recharged on the Early Project Facilities under this Special Activities Agreement will be credited to the 25,000 AF Ecosystem Account that is envisioned to provide ecosystem benefits to the State of California. Deliveries to the Ecosystem Account will begin once the Kern Fan Project is complete and all necessary agreements with the State have been executed. |
| Environmental Compliance | The Parties shall comply with California Environmental Quality Act (CEQA) and cooperate with one another with respect to CEQA compliance that may be required to implement the Special Activities Agreement. |
| Termination | Early termination would occur in accordance with the GBJPA Joint Powers Authority Agreement. |
| General Expenses | Each Party would be responsible for its own fees and expenses arising out of the negotiation and execution of the Special Activities Agreement, obtaining necessary approvals, and the like. |

ACTION CALENDAR

ELECTION OF OFFICERS FOR 2023

SUMMARY:

The Bylaws of the District provide that the President and Vice President shall be elected by the Board from among its members. The term of office of the President and Vice President is one year, or until the election and qualification of their successors. On December 13, 2021, Director LaMar was elected to the office of President and Director McLaughlin was elected to the office of Vice President for 2022.

| While there are no formal election procedures set forth in the Bylaws, it is suggested that the General Manager be appointed temporary Chairman to conduct the election of President. The temporary Chairman would open nominations, accept nominations which need not be seconded, accept a motion to close the nominations, and conduct the balloting by voice vote. The President would then conduct the election of the Vice President in a similar manner. |
|---|
| FISCAL IMPACTS: |
| None. |
| ENVIRONMENTAL COMPLIANCE: |
| Not applicable. |
| COMMITTEE STATUS: |
| Not applicable. |
| RECOMMENDATION: |
| THAT AN ELECTION BE CONDUCTED OF THE PRESIDENT AND VICE PRESIDENT OF THE BOARD OF DIRECTORS OF THE IRVINE RANCH WATER DISTRICT FOR 2023. |
| LIST OF EXHIBITS: |
| None. |

13 No. 13 Election of Officers for 2023
