Drought Tip

Water Reliability

## Water Quality Report Now Available

### Be In the Know

Finding out what's in your water is as transparent as water itself.

The 2014 edition of the Water Quality Report is now available. Know exactly the measures IRWD takes to ensure safe, reliable, quality drinking water. Simply visit [www.irwd.com](http://www.irwd.com) and click on "Water Quality Report." Then you'll be in the know with the 2014 edition.

To request a printed copy, email [info@irwd](mailto:info@irwd) with the subject line: Water Quality Report, or call 949-453-5500.

### Your Water at a Glance

- Meets or exceeds all state and federal water quality standards
- 250,000+ quality tests conducted annually
- More than 100 sample points throughout the District

## Drought Tip of the Month

Water your landscape in the early morning to reduce evaporation caused by the sun's heat and overspray caused by the wind.

Reset your sprinkler timers or leave watering for the weekend when you have more time in the mornings.

Download a watering schedule at [www.irwd.com/calsscape](http://www.irwd.com/calsscape).

# Save Water & Money with Conservation Rebates

Looking for ways to save water because of the drought? Use an IRWD conservation rebate to save money on high-efficiency water equipment. Here are some of the rebates currently available:

**Smart Timer: \$500**

**Rotating Sprinkler Nozzle: \$4** per nozzle

**Turf Removal: \$2** per square foot removed

**Rain Barrel: \$75**

**Soil Moisture Sensor: \$380**

**High-Efficiency Clothes Washer: \$275**

**High-Efficiency Toilet: \$100**

All rebates are subject to change. Please visit [www.irwd.com/rebates](http://www.irwd.com/rebates) for latest information.

## How We Keep Your Water Flowing

The new IRWD Water Reliability video shows our strong commitment to maintaining a diversified water supply and making sure water flows from your tap at all times. Through thoughtful planning and prudent fiscal policies, we cost-effectively manage our water resources, while continuing to diversify supplies to enhance future reliability.

IRWD boasts a highly diverse water supply, using local groundwater, recycled water and water banking to reduce our dependence on costly imported water. In 1990, imported water made up approximately 64 percent of IRWD's water supply; today, it accounts for only 28 percent.

Reducing the District's reliance on imported water:

- Protects IRWD customers from statewide supply fluctuations
- Keeps costs low
- Reduces our carbon footprint by decreasing the amount of imported water moved across the state to meet IRWD demands
- Helps reduce demand on the environmentally sensitive Sacramento-San Joaquin Delta

Ecological protection and restoration of the Delta is vital to ensuring the health and reliability of California's future water supply and economy.
